Metcalf,2020-10-13 How did intricately detailed sixteenth century maps reveal the start of the Atlantic World Beginning around 1500 in the decades following Columbus s voyages the Atlantic Ocean moved from the periphery to the center on European world maps This brief but highly significant moment in early modern European history marks not only a paradigm shift in how the world was mapped but also the opening of what historians call the Atlantic World But how did sixteenth century chartmakers and mapmakers begin to conceptualize and present to the public an interconnected Atlantic World that was open and navigable in comparison to the mysterious ocean that had blocked off the Western hemisphere before Columbus s exploration In Mapping an Atlantic World circa 1500 Alida C Metcalf argues that the earliest surviving maps from this era which depict trade colonization evangelism and the movement of peoples reveal powerful and persuasive arguments about the possibility of an interconnected Atlantic World Blending scholarship from two fields historical cartography and Atlantic history Metcalf explains why Renaissance cosmographers first incorporated sailing charts into their maps and began to reject classical models for mapping the world Combined with the new placement of the Atlantic the visual imagery on Atlantic maps which featured decorative compass roses animals landscapes and native peoples communicated the accessibility of distant places with valuable commodities Even though individual maps became outdated quickly Metcalf reveals new mapmakers copied their imagery which then repeated on map after map Individual maps might fall out of date be lost discarded or forgotten but their geographic and visual design promoted a new way of seeing the world with an interconnected Atlantic World at its center Describing the negotiation that took place between a small cadre of explorers and a wider class of cartographers chartmakers cosmographers and artists Metcalf shows how exploration informed mapmaking and vice versa Recognizing early modern cartographers as significant agents in the intellectual history of the Atlantic Mapping an Atlantic World circa 1500 includes around 50 beautiful and illuminating historical maps

this unique volume explores the dramatic history of the Americas through the birth and development of the hemisphere's great cities. Written by award-winning author David F. Marley, *Historic Cities of the Americas* covers the hard-to-find information of these cities' earliest years, including the unique aspects of each region's economy and demography, such as the growth of local mining, trade, or industry. The chronological layout, aided by the numerous maps and photographs, reveals the exceptional changes, relocations, destruction, and transformations these cities endured to become the metropolises they are today. *Historic Cities of the Americas* provides over 70 extensively detailed entries covering the foundation and evolution of the most significant urban areas in the western hemisphere. Critically researched, this work offers a rare look into the times prior to Christopher Columbus' arrival in 1492 and explores the common difficulties overcome by these European-conquered or founded cities as they flourished into some of the most influential locations in the world.

**Turkey's Naval Activism** Serhat Süha Çubukçuoğlu, 2023-10-16. This book explores the significance of Turkey's Blue Homeland (Mavi Vatan) naval concept, which defines its maritime rights and interests in the surrounding seas: Aegean Sea, Black Sea, and the Mediterranean. The concept has a powerful socialized definition and a popular appeal across the political spectrum in Turkey, with important implications for security in the wider Middle East. The book investigates the impact of geopolitics and domestic political factors on the concept and uncovers motivations behind its trajectory since 2004, with a particular focus on the last several years, the period when Turkey's naval assertiveness reached its peak following the failed coup attempt in 2016. Based on in-depth interviews with diplomats, naval officers, academics, and researchers in the field, the book takes the reader through a journey on how the Turkish government has reinforced an activist policy since 2016 due to pressures of regional insecurity, domestic coalition logrolling, and nationalist sentiment.

**Ships on Maps** Richard W. Unger, 2010-08-04. Renaissance map makers produced ever more accurate descriptions of geography, which were also beautiful works of art. They filled the oceans Europeans were exploring with ships, and to describe the real ships, which were the newest and best products of technology. Above all, the ships were there to show the European conquest of the seas of the world.

Falklands Saga Graham Pascoe, 2024-02-15 The Falklands Saga presents abundant evidence from hundreds of pages of documents in archives and libraries in Buenos Aires La Plata Montevideo London Cambridge Stanley Paris Munich and Washington DC some never printed before many printed here for the first time in English and where different in their original languages Spanish French German Italian Latin or Dutch It provides the facts to correct the fallacies and distortions in accounts by earlier authors It reveals persuasive evidence that the Falklands were discovered by a Portuguese expedition at the latest around 1518 19 and not by Vespucci or Magellan It demonstrates conclusively that the Anglo Spanish agreement of 1771 did not contain a reservation of Spanish rights that Britain did not make a secret promise to abandon the islands and that the Nootka Sound Convention of 1790 did not restrict Britain's rights in the Falklands but greatly extended them at the expense of Spain For the first time ever the despairing letters from the Falklands written in German in 1824 to Louis Vernet by his brother Emilio are printed here in full in both the original German and in English translation revealing the total chaos of the abortive 1824 Argentine expedition to the islands This book reveals how tiny the Argentine settlement in the islands was in 1826 33 In April 1829 there were only 52 people and there was a constant turnover of population many people stayed only a few months and the population reached its maximum of 128 only for a few weeks in mid 1831 before declining to 37 people at the beginning of 1833 This work also refutes the falsehood that Britain expelled an Argentine population from the Falklands in 1833 That myth has been Argentina's principal propaganda weapon since the 1960s in its attempts to undermine Falkland Islanders' right to self-determination In fact Britain encouraged the residents to stay and only a handful left the islands A crucial document printed here is the 1850 Convention of Peace between Argentina and Britain At Argentina's insistence this was a comprehensive peace treaty which restored perfect friendship between the two countries Critical exchanges between the Argentine and British negotiators are printed here in detail which show that Argentina dropped its claim to the Falklands and accepted that the islands are British That and the many later acts by Argentina described here definitively ended any Argentine title to the islands The islands' history is placed in its world context with detailed accounts of the First Falklands Crisis of 1764 71 the Second Falklands Crisis of 1831 3 the Years of Confusion 1811 1850 and the Third Falklands Crisis of 1982 the Falklands War as well as a Falklands perspective on the First and Second World Wars including the Battle of the Falklands 1914 and the Battle of the River Plate 1939 with extensive details and texts from German sources The legal status of the Falklands is analysed by reference to legal works to United Nations resolutions on decolonisation and to rulings by the International Court of Justice which together demonstrate conclusively that the islands are British territory in international law and that the Falkland Islanders who have now 2024 lived in their country for over 180 years and for nine generations are a unique people who are holders of territorial sovereignty with the full right of external self-determination
