Landsman, 2005 *The Psychology of Scientific Inquiry* Aaro Toomela, 2019-11-05 This brief sets out on a course to distinguish three main kinds of thought that underlie scientific thinking Current science has not agreed on an understanding of what exactly the aim of science actually is how to understand scientific knowledge and how such knowledge can be

achieved Furthermore no science today also explicitly admits the fact that knowledge can be constructed in different ways and therefore every scientist should be able to recognize the form of thought that undergirds their understanding of scientific theory In response to this this text seeks to answer the questions What is science What is scientific explanation What is causality and why it matters Science is a way to find new knowledge The way we think about the world constrains the aspects of it we can understand Scientists the author suggests should engage in a metacognitive perspective on scientific theory that reflects not only what exists in the world but also the way the scientist thinks about the world **Same Sex** John Corvino,1999 Same Sex presents a comprehensive anthology on homosexuality exploring historical conceptions of homosexuality homosexual identity and a variety of public policy issues Contemporary Research on Sex Work Jeffrey T. Parsons,2014-06-03 Gain important insight and a broader perspective on where why and how sex workers conduct their business For years the focus of sex work research has been on street based male and female sex workers and the HIV related risks they pose to their clients Contemporary Research on Sex Work moves beyond the basic association between sex work and unprotected sex to a fuller description of the varied facets of the industry while still pursuing a better understanding of HIV risk among those working the streets The diverse approaches in this unique book include targeted sampling qualitative and quantitative interviews ethnographic interviews with key informants using sex workers as recruiters and quasi experimental intervention designs Contemporary Research on Sex Work dispels the notion that all sex workers are prostitutes working the streets highlighting instead various aspects of sex work in terms of gender venue and context Social scientists from a variety of disciplines present research collected from across the United States Cambodia the Philippines Argentina and Canada that reflects the efforts to explore interventions and programs designed to improve the social and physical lives of male female and transgender sex workers and their clients The book examines how different circumstances determine different issues of power control health social functioning mental health and HIV STI risk each sex worker faces Contemporary Research on Sex Work examines condom use by transgender female sex workers the association between mental health issues and unprotected sex the influence of structural intervention in reducing biologically sexually transmitted infections STIs the hidden population of women who solicit clients in private locations off the street stigma resistance among male sex workers in Canada the relationship between childhood sexual abuse and subsequent involvement in sex work health services among male sex workers in Argentina how the intersection between race ethnicity affects female sex workers in Los Angeles how sex workers deal with the negativity that surrounds their profession job related risk and safety for sex workers in Canada legal concerns and policy issues and much more Contemporary Research on Sex Work is your guide to the next generation of sex work research highlighting the need to understand sex work as work The book is an essential resource for researchers in the fields of sex research sex work and HIV AIDS prevention and for clinicians who work with those involved in the industry Sex and Gender Hilary M. Lips,2020-04-10 Are sex and gender really two

different things How malleable is gender identity Do both gender and sex have to be conceptualized as binaries as having two distinct but complementary categories Should we emphasize gender differences or is that the wrong question When should we call a gender difference small Are women really nonaggressive or does that label stem from stereotyping How does subtle or modern sexism work on its targets Scholarship on these and other gender related questions has exploded in recent years Hilary Lips synthesizes that research for students in an accessible and readable way Concepts on sex and gender are presented with the social context in which they were developed As in previous editions Lips takes a multicultural approach discussing the gender experiences of people from a wide range of races cultures socioeconomic statuses and gender and sexual identities She emphasizes empirical research but takes a critical approach to that research

Rape by the Numbers Ethan Czuy Levine,2021-09-17 Science plays a substantial though under acknowledged role in shaping popular understandings of rape Statistical figures like 1 in 4 women have experienced completed or attempted rape are central for raising awareness Yet such scientific facts often become points of controversy particularly as conservative scholars and public figures attempt to discredit feminist activists Rape by the Numbers explores scientists approaches to studying rape over more than forty years in the United States and Canada In addition to investigating how scientists come to know the scope causes and consequences of rape this book delves into the politics of rape research Scholars who study rape often face a range of social pressures and resource constraints including some that are unique to feminized and politicized fields of inquiry Collectively these matters have far reaching consequences Scientific projects may determine who counts as a potential victim survivor or aggressor in a range of contexts shaping research agendas as well as state policy anti violence programming and services and public perceptions Social processes within the study of rape determine which knowledges count as credible science and thus who may count as an expert in academic and public contexts
