**Sex, Gender, and Kinship** Burton Pasternak, Carol R. Ember, Melvin Ember, 1997 Responding to a growing interest in the nature and place of family in society this text looks at gender families family relationships and the role of larger kin groups from a cross cultural perspective It draws upon ethnographic accounts and cross cultural studies to determine and illustrate possible characteristics and outcomes highlight options that occur more or less frequently and where possible to account for choices made Encyclopedia of Sex and Gender Carol R. Ember, Melvin Ember, 2003-12-31 The central aim of this encyclopedia is to give the reader a comparative perspective on issues involving conceptions of gender gender differences gender roles relationships between the genders and sexuality The encyclopedia is divided into two volumes Topics and Cultures The combination of topical overviews and varying cultural portraits is what makes this encyclopedia a unique reference work for students researchers and teachers interested in gender studies and cross cultural variation in sex and gender It deserves a place in the library of every university and every social science and health department Contents Glossary Cultural Conceptions of Gender Gender Roles Status and Institutions Sexuality and Male Female Interaction Sex and Gender in the World s Cultures Culture Name Index Subject Index **Cross-Cultural Research Methods** Carol R. Ember, Melvin Ember, 2009-07-16 Without ethnography cross cultural comparison would not be possible But without cross cultural comparison we would know nothing of what may be universal or variable across human cultures or why variation exists Cross Cultural Research Methods is an introductory teaching tool that shows students and potential researchers how to describe compare and analyze patterns that occur in different cultures that is how to form and test anthropological sociological psychological medical or political hypotheses about cultural variation **'Good Women do not Inherit Land'** Nitya Rao, 2017-08-03 Land for the adivasi Santal women in Dumka Jharkhand stands for security social position and identity and in this men have a distinct advantage The time period covered is from historic times to the present The role of government administrative bodies NGOs and political leaders is also emphasized Please note Taylor Francis does not sell or distribute the Hardback in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka **Human Cultures through the Scientific Lens** Pascal Boyer, 2021-07-09 This volume brings together a collection of seven articles previously published by the author with a new introduction reframing the articles in the context of past and present questions in anthropology psychology and human evolution It promotes the perspective of integrated social science in which social science questions are addressed in a deliberately eclectic manner combining results and models from evolutionary biology experimental psychology economics anthropology and history It thus constitutes a welcome contribution to a gradually emerging approach to social science based on E O Wilson s concept of consilience Human Cultures through the Scientific Lens spans a wide range of topics from an examination of ritual behaviour integrating neuro science ethology and anthropology to explain why humans engage in ritual actions both cultural and individual to the motivation of conflicts between groups As such the

collection gives readers a comprehensive and accessible introduction to the applications of an evolutionary paradigm in the social sciences This volume will be a useful resource for scholars and students in the social sciences particularly psychology anthropology evolutionary biology and the political sciences as well as a general readership interested in the social sciences

**Insights Into Gender Equity, Equality and Power Relations in Sub-saharan Africa** Mansah Prah,2013 Since gender entered the development discourse in the Seventies African countries have increasingly taken the concept on board in policy and practice This concern may be due to either one or a combination of the following factors the ideological positioning of African countries demands by their donors and development partners and demands by organised local groups and NGOs Gender in the development discourse ought to transform power relations between men and women and shift them to social relations that reflect their equal access to productive resources opportunities and social and material benefits The result of such actions should be an achievement of comparable status of women and men This volume initiated by OSSREA seeks to examine in more depth issues regarding the gender power imbalance in sub Saharan African countries with a specific focus on the eastern and southern African regions The chapters in this book present research that examines and analyses the effectiveness and efficiency of gender mainstreaming policies strategies and projects developed and implemented by national and international actors The themes inter weave with each other although they address gender issues in specific countries and specific contexts This can be explained by the shared colonial and post colonial heritage of African countries It is useful therefore to view the structure of the book as a spiral of inter connected issues that address similar themes approaching them from different levels Purely for ease of reading the contributions have been organised into three parts with over arching themes that at first glance may seem not to fit well together A theme that runs through all the chapters is the persistence of patriarchal values and attitudes in Africa and its constraining effect on the achievement of gender equity and equality

**Simple Heuristics in a Social World** Ralph Hertwig, Ulrich Hoffrage, ABC Research Group, 1999-09-30 *Simple Heuristics in a Social World* invites readers to discover the simple heuristics that people use to navigate the complexities and surprises of environments populated with others The social world is a terrain where humans and other animals compete with conspecifics for myriad resources including food mates and status and where rivals grant the decision maker little time for deep thought protracted information search or complex calculations Yet the social world also encompasses domains where social animals such as humans can learn from one another and can forge alliances with one another to boost their chances of success According to the book's thesis the undeniable complexity of the social world does not dictate cognitive complexity as many scholars of rationality argue Rather it entails circumstances that render optimization impossible or computationally arduous intractability the existence of incommensurable considerations and competing goals With optimization beyond reach less can be more That is heuristics simple strategies for making decisions when time is pressing and careful deliberation an unaffordable luxury become indispensable mental tools As accurate as or even more accurate than complex methods when used in the appropriate social environments these heuristics are good

descriptive models of how people make many decisions and inferences but their impressive performance also poses a normative challenge for optimization models In short the Homo socialis may prove to be a Homo heuristicus whose intelligence reflects ecological rather than logical rationality      The SAGE Handbook of Interpersonal Communication Mark L. Speth, 2004-01-01 Dramatic economic changes transformed an isolated 13th century village of farmer hunters in the arid grasslands of southeastern New Mexico into a community heavily engaged in long distance bison hunting and intense exchange with the Puebloan world to the west      **Handbook of Cross-cultural Psychology: Social behavior and applications** John W. Poortinga, Janak Pandey, 1997 Presenting the human relations in a cultural context this book explores various social psychology concepts and applied topics in the light of cross cultural research It also features the developments in the field as well as diversity in the cultural and theoretical backgrounds of the editors and chapter authors      Agriculture and the Rural Economy in Pakistan David J. Spielman, Sohail J. Malik, Paul Dorosh, Nuzhat Ahmad, 2017-01-23 Historically agriculture has been crucial to Pakistan's economic growth and development and remains so even today The sector employs almost half of the country's labor force supplies key inputs to the country's manufacturing sector generates a significant share of export earnings and nourishes a rapidly growing population Further beyond agriculture is the wider rural economy including nonfarm economic activities such as small enterprises transport services village retail shops local schools and clinics all of which account for an estimated 40 to 57 percent of total rural household income Given the importance of these rural activities the slow growth of agriculture

in recent years averaging just 2.8 percent during the period 2010-2014 should be a source of concern for Pakistan. Can the country's agricultural sector and rural economy once again play a significant role in growth and development? Can it contribute to poverty reduction? Agriculture and the Rural Economy in Pakistan: Issues, Outlooks and Policy Priorities seeks to answer these questions by examining the performance of both agriculture and the rural economy. The authors identify several measures that can promote agricultural productivity growth as well as wider economic and social development. These include increasing the efficiency of water use in the Indus river basin irrigation system especially in the face of climate change; reforming policies and regulations that govern markets for agricultural inputs and commodities; and improving the provision of rural public services for health, education, women's empowerment and community development. The analyses and conclusions in Agriculture and the Rural Economy in Pakistan will be of use to policy makers, development specialists and others concerned with Pakistan's development.

**The Oxford Handbook of Evolutionary Family Psychology** Catherine Salmon, Todd K. Shackelford, 2011-05-27

Relationships with family are important to our emotional health and can play a significant role in our social success. We need our families and yet frequently have a great difficulty understanding them. Hundreds of books have been published with the goal of improving understanding and relationships among family and relationships; few if any have done so with an evolutionary approach. The Oxford Handbook of Evolutionary Family Psychology focuses on the reasons underlying family behavior and how a greater understanding of these factors can help us to better understand our own family behaviors. Recognizing that a deeper understanding of human families can be found through an understanding of similar phenomena in other species, the volume demonstrates how an understanding of family ties can inform understanding of our relationships to non-kin.

**Social Relationships** Joseph P. Forgas, Julie Fitness, 2008

Human beings are an intrinsically gregarious species; our personal relationships are of immense interest to us and are a key factor in achieving happiness and well-being. From the moment of birth, humans crave love and intimacy and we devote much energy to creating and maintaining successful personal relationships throughout our personal and our working lives. However, modern industrialized societies present a particularly challenging environment for sustaining rewarding personal relationships. Understanding how people initiate, develop, maintain and terminate relationships is one of the core issues in psychology and the subject matter of this book. Contributors to this volume are all leading researchers in relationship science and they seek here to explore and integrate the subtle influence that evolutionary, socio-cultural and intra-psychic, cognitive, affective and motivational variables play in relationship

processes In addition to discussing the latest advances in areas of relationship research they also advocate an expanded theoretical approach that incorporates many of the insights gained from evolutionary psychology social cognition and research on affect and motivation The contributions should be highly relevant to researchers teachers students laypersons and to everyone who is interested in the subtleties of human relationships The book is also highly recommended to clinical health and relationship professionals who deal with relationship issues in their daily work
