Sex and Reason Richard A. Posner, 2009-07-01 Sexual drives are rooted in biology but we don't act on them blindly. Indeed, as the eminently readable judge and legal scholar Richard Posner shows, we make quite rational choices about sex based on the costs and benefits perceived. Drawing on the fields of biology, law, history, religion, and economics, this sweeping study examines societies from ancient Greece to today's Sweden and issues from masturbation, incest, taboos, date rape, and gay marriage to Baby M. The first comprehensive approach to sexuality and its social controls, Posner's rational choice theory surprises, explains, predicts, and totally absorbs.

Sex in the Digital Age Paul G. Nixon, Isabel Düsterhöft, 2017-08-16 Shifts in societal development resulting from economic and technological advancements have had an impact upon the development of human sexuality and behaviour, and with the expansion of developments such as the Internet and associated technologies, it is likely that further societal shifts will ensue. This book recognises the importance of new digital spaces for discourses surrounding sexuality, examining issues such as pornography, sex education, and health. LGBTQ sexualities, polysexuality, or polyamory, abstention, sexual abuse and violence, erotic online literature, sex therapy, teledildonics, sex and gaming, online dating, celebrity porn, young people and sexual media, and sexting and sextainment, all of which are prominently affected by the use of digital media. With case studies drawn from the US, the UK, and Europe, *Sex in the Digital Age* engages in discussion about the changing acceptance of sex in the 21st century and part played in that by digital media, and considers the future of sex and sexuality in an increasingly digital age. It will therefore appear to scholars across the social sciences with interests in gender and sexuality, new technologies, and media and cultural studies.

Using Research For Effective Health Promotion Oliver, Sandy,Peersman, Greet,2001-08-01 Well before evidence based practice became fashionable beyond clinical medicine the team at SSRU was telling us what we ought to already know that some interventions work better than others and that that some well meaning attempts at health promotion just like medicine and surgery may do harm This book is a must for policy makers and practitioners who want to make a real difference and understand how research evidence can inform their practice The book will also be an important tool for researchers who will increasingly be using the tools of systematic review if they want to inform and influence those who deliver services Helen Roberts Professor of Child Health City University This book bridges the gap between research and practice in health promotion It advances evidence based health promotion by illustrating how service providers and researchers can change their working practices to benefit the public It addresses the need for health promotion services to be grounded in empirical research and for research to focus on issues important to those delivering as well as those receiving the services Using Research for Effective Health Promotion advances the debate about the relative values of qualitative and experimental research in health promotion and encourages an increased participation of service users in the development and evaluation of services It provides health promotion specialists with time saving tools to draw upon research quickly and critically and is an important resource for students and professionals in fields such as public health nursing education social work and voluntary services

Canada considers the challenges relating to the conceptualization of women's health. While emphasizing the importance of taking an intersectional approach to women's healthcare, this book also focuses on the social and structural determinants at play. This revised and updated second edition brings together a collection of new chapters and contributors who collectively shed light on the problems and risks involved in perceiving women's healthcare using a strictly gender or sex-based lens. Contributors foreground an understanding of power as it is mediated through a range of social relations based on gender, race, culture, ethnicity, sexuality, ability, class, and geography, and the ways in which privilege and oppression intersect to shape health and system responses to health. This new edition includes updates on what is currently known about women's health nationally and internationally and situates the chapters in the current Canadian health care and policy context. Scholarship is foregrounded in new developments in gender and intersectional health research and policy. Collectively, this volume explores the important histories and contemporary realities in women's health experiences.

Mafia Wife Lynda Milito, 2012-12-26 When Lynda Lustig met Louie Milito, she was a sixteen-year-old high school dropout with a taste for adventure and an agonizing childhood. When they were married two years later, he was not yet a made man in the powerful Gambino crime family. Louie was a hairdresser who dabbled in petty thievery. But Lynda was so happy to be out of her domineering mother's loveless house. And over the years, she was willing to forgive her husband for anything: his violent rages, his frequent absences, his shady associates, and the blood on his hands. For twenty-four years, Lynda Milito remained loyal to this charming and dangerous criminal, her children's father and close friend of crime boss John Gotti and underboss Sammy the Bull Gravano. But in 1988, Louie Milito disappeared, murdered by the very people he had always trusted to protect him. A crime story, a family story, a love story, *Mafia Wife* is the shockingly intimate, brutally honest tale of a survivor and of the life she lived in the dark bosom of the underworld. **A**

Feminist Critique of Police Stops Josephine Ross, 2020-12-17 A Feminist Critique of Police Stops examines the parallels between stop and frisk policing and sexual harassment. An expert whose writing, teaching, and community outreach centers on the Constitution's limits on police power, Howard Law Professor Josephine Ross argues that our constitutional rights are a mirage. In reality, we can't say no when police seek to question or search us. Building on feminist principles, Ross demonstrates why the Supreme Court got it wrong when it allowed police to stop, search, and sometimes strip-search people and call it consent. Using a wide range of sources, including her law students' experiences with police, news stories about Eric Garner and Sandra Bland, social science, and the work of James Baldwin, Ross sheds new light on policing. This book should be read by everyone interested in how Court-approved police stops sap everyone's constitutional rights and how this form of policing can be eliminated.
