Sexual Difference Between Psychoanalysis and Vitalism Arun Saldanha,Hoon Song,2015-03-24 Throughout the twentieth century psychoanalysis and feminism were the practico intellectual fields most systematic and subversive in demonstrating that humanity is sexually fissured More recently further advances in the philosophy of difference and renewed emphases on embodiment materiality and life offer possibilities for attending to dimensions of gender and sexuality that were previously underdeveloped This collection examines these possibilities insofar as they can either deepen or displace the traditional centrality of psychoanalysis in matters sexual The authors come from a wide range of backgrounds and defend their approaches to the problem of sexual difference in a variety of idioms drawing on key thinkers such as Lacan Irigaray Deleuze Foucault and Badiou It is rare to come across these thinkers together but sex is too crucial a site for critical thought not to mobilize every conceptual power available This book was originally published as a special issue of the journal *Angelaki The Journal of the Theoretical Humanities* *EPSA Philosophy of Science: Amsterdam 2009* Henk W. de Regt,Stephan Hartmann,Samir Okasha,2011-10-15 This is a collection of high quality research papers in the philosophy of science deriving from papers presented at the second meeting of the European Philosophy of Science Association in Amsterdam October 2009 The

Sexual Paradox Susan Pinker, 2010-01-11 After four decades of eradicating gender barriers at work and in public life why do men still dominate business politics and the most highly paid jobs Why do high achieving women opt out of successful careers Psychologist Susan Pinker explores the illuminating answers to these questions in her groundbreaking first book In The Sexual Paradox Susan Pinker takes a hard look at how fundamental sex differences continue to play out in the workplace By comparing the lives of fragile boys and promising girls Pinker turns several assumptions upside down that the sexes are biologically equivalent that smarts are all it takes to succeed that men and women have identical goals If most children with problems are boys then why do many of them as adults overcome early obstacles while rafts of competent even gifted women choose jobs that pay less or decide to opt out at pivotal moments in their careers Weaving interviews with men and women into the most recent discoveries in psychology neuroscience and economics Pinker walks the reader through these minefields Are men the more fragile sex Which sex is the happiest at work What does neuroscience tell us about ambition Why do some male school drop outs earn more than the bright motivated girls who sat beside them in third grade Pinker argues that men and women are not clones and that gender discrimination is just one part of the persistent gender gap A work world that is satisfying to us all will recognize sex differences not ignore them or insist that we all be the same Who's Afraid of Charles Darwin?

Griet Vandermassen, 2005-02-10 Why should feminism and the biological sciences be at odds And what might be gained from a reconciliation In Who's Afraid of Charles Darwin Vandermassen shows that rather than continuing this enmity feminism and the biological sciences and in particular evolutionary psychology have the need and the potential to become powerful allies Properly understood the Darwinian perspective proposed in this volume will become essential to tackling the major issues in feminism Biosocial Criminology Anthony Walsh, Kevin M. Evolutionary Psychology, Public Policy and Personal Decisions Charles Crawford, Catherine Salmon, 2004-05-20 During the last 15 years human sociobiology has metamorphosed into evolutionary psychology It is concerned with the social problems and stresses hominid and primate ancestors encountered the psychological mechanisms natural selection shaped to deal with these stresses and the way those ancient mechanisms work now Evolutionary psychologists are making great progress in expanding the understanding of human nature however this knowledge has had little impact on policymakers and legislators Supreme Court justices and managers seldom consult evolutionary psychologists to help with their deliberations When faced with private decisions few individuals ask themselves how a Darwinian perspective might help them This volume's aim is to start the process of using theory and findings of evolutionary psychology to help make the world a better place to live This

book takes evolutionary psychology explicitly into applied areas in a way no other book has. It includes a reasonable scope of applications from pornography to psychopaths and from morality to sex differences in the workplace. An applications section provides concrete ideas for dealing with social and policy issues including chapters on women in the workplace, rape, and child support. Providing good coverage of basic issues and theory of the field, this book gives lay people and law policymakers appropriate background to fully understand the applications chapters. Part II provides information on basic psychological mechanisms for group living including chapters on emotions, reciprocity, and legal reasoning and self-deception that impact on how well public policy and law function. The material in the first two sections provides an intellectual basis for the chapters in the third part of the book which deals with the application of evolutionary psychology to a variety of substantive areas related to public policy and personal decisions. A political scientist concludes the book with a commentary on evolutionary psychology and public policy. The book is designed to serve as a stand-alone text in evolutionary psychology and public policy that can be used in a variety of disciplines such as psychology, social work, law, and psychology and public policy.

On the Nature of Human Sexual Difference: A Symposium Timothy Paul Fortin, 2024-11-05. This work offers a symposium on the nature of human sexual difference drawing on Plato's masterpiece having explored the observed phenomena of sexual difference. Four stories are told of the origins, essence, and ends of the human male and female. First, the evolutionists, and then Simone de Beauvoir and Judith Butler, present their accounts. Next, a fourth and unique vision for our age is added: the thought of Thomas Aquinas is placed in dialogue with the evolutionists. Beauvoir and Butler thereby introduce into contemporary discourse a voice that is both ancient and new. The work seeks to trace each protagonist's account to its fonts, so providing a perspective from which various streams of thought might be understood both in their divergence and common origins. It thus hopes to offer a common language and an interpretive key in a realm where confusion and misunderstanding too often reign.

A 150 years' celebration of Darwin's book on human evolution and sexual selection: Its legacy and future prospects Marco Antonio Correa Varela, Jaroslava Varela Valentova, Catherine Salmon, Barnaby James Wyld Dixon, Marina Butovskaya, Anabela Pinto Pinto, Boguslaw Pawlowski, Carol Cronin Weisfeld, 2023-07-06. *Psychology and Evolution* Bruce Bridgeman, 2003-02-06. Bridgeman's *Psychology and Evolution* is a superb textbook in evolutionary psychology. I see it as a landmark in the emergence of evolutionary psychology as no longer a controversial minority current but as a central aspect of the mainstream. The book reflects the state of the art in current work in evolutionary psychology; the reader is brought up to date about evolutionary theory, modern genetics, human prehistory, and relevant issues in modern linguistics. M. Brewster Smith, Emeritus, University of California, Santa Cruz, and Past President, American Psychological Association. This is an important book. Readers partial to evolutionary psychology as well as those who remain skeptical will benefit from a careful reading of this reader-friendly book. The author endorses the core assumptions of evolutionary psychology but refreshingly he includes often with a new slant relevant material usually overlooked by both believers and skeptics. Andrew Neher, Emeritus.

Conceptual Challenges in Evolutionary Psychology

Harmon R. Holcomb III, 2012-12-06 This series will include monographs and collections of studies devoted to the investigation and exploration of knowledge information and data processing systems of all kinds no matter whether human other animal or machine Its scope is intended to span the full range of interests from classical problems in the philosophy of mind and philosophical psychology through issues in cognitive psychology and sociobiology concerning the mental

capabilities of other species to ideas related to artificial intelligence and to computer science While primary emphasis will be placed upon theoretical conceptual and epistemological aspects of these problems and domains empirical experimental and methodological studies will also appear from time to time Few areas of inquiry have generated as much interest and enthusiasm in recent times as has the discipline known as evolutionary psychology but its pretensions and its accomplishments have not always been properly understood This collection brings together important work in psychology anthropology and the philosophy of science that contributes toward that goal especially by emphasizing the role of natural selection and sexual selection as crucial factors in the evolution of cognitive mechanisms for information processing The methodological studies that are presented here are bound to enhance appreciation for the scope and limits of this fascinating domain The editor has produced a fascinating volume that should appeal to a broad and diverse audience **A Mind Of Her Own** Anne

Campbell,2013-05-16 When Darwin proposed that females shape evolution by being choosy in their choice of male suitors his Victorian contemporaries were shocked that he accorded so much importance to women But this early view of the female role was far from revolutionary They were simply allowed to be passive quality controllers of male genes Recent years have shown that the inert coy female is a myth For a male a high sex drive and a taste for variety may improve his fitness But for a female successful reproduction goes far beyond copulation She bears the brunt of parental investment with each child represents years of commitment from pregnancy and breast feeding to provisioning and guarding For her genetic lineage to survive she must do this better than her rivals Each of us comes from a line of winning mothers Women are after all the first and default sex It is women who bear children A child born with a single X chromosome can survive but not one with a single Y In a population crash a female biased population will survive far better than a male heavy one In this book Anne Campbell redresses the balance of evolutionary theory in favour of women She examines how selection pressures have shaped the female mind over thousands of generations Their emotions friendship competition aggression and mate choice She brings together data from neuroscience endocrinology anthropology primatology as well as psychology to address fundamental questions about sex differences Why are women less aggressive than men Were women designed for monogamy or promiscuity What do women compete for Why is conflict between males and females inevitable What makes each woman unique Have contraception and IVF subverted the process of natural selection **Sex and Gender** John Archer,Barbara

Evolution and Popular Narrative , 2019-06-07 The contributors to this volume share the assumption that popular narrative when viewed with an evolutionary lens offers an incisive index into human nature In theory narrative art could take a near infinity of possible forms In actual practice however particular motifs plot patterns stereotypical figures and artistic devices persistently resurface indicating specific predilections frequently at odds with our

actual living conditions Our studies explore various media and genres to gauge the impact of our evolutionary inheritance in interdependence with the respective cultural environments on our aesthetic appreciation As they suggest research into mass culture is not only indispensable for evolutionary criticism but may also contribute to our understanding of prehistoric selection pressures that still influence modern preferences in popular narrative Contributions by David Andrews James Carney Mathias Clasen Brett Cooke Tam s D vid Barrett Tom Dolack Kathryn Duncan Isabel Behncke Izquierdo Joe Keener Alex C Parrish Todd K Platts Anna Rotkirch Judith P Saunders Michelle Scalise Sugiyama Dirk Vanderbeke and Sophia Wege
