Science and Homosexualities Vernon A. Rosario, M.D.,2013-01-11 Science and Homosexualities is the first anthology by historians of science to examine European and American scientific research on sexual orientation since the coining of the word homosexual almost 150 years ago This collection is particularly timely given the enormous scientific and popular interest in biological studies of homosexuality and the importance given such studies in current legal legislative and cultural debates concerning gay civil rights However scientific and popular literature discussing the biology of sexual orientation have been short sighted in representing it as objective new scientific work This volume demonstrates that the quest for the biological cause of homosexuality and other sexualities is as old as the term itself These essays explore the active role experimental subjects played in shaping scientific theories of homosexuality and cultural perceptions of sexuality and sexual identity Finally this anthology studies the way in which this doctor patient interaction shaped not only scientific theories of homosexuality but also cultural perceptions and self identities as well Contributors include Garland E Allen Erin G Carlston Julian Carter Alice D Dreger Anne Fausto Sterling Margaret Gibson Stephanie Kenen Hubert Kennedy Harry Oosterhuis James Steakley Richard Pillard Jennifer Terry

She foregrounds their sociopolitical engagements, critical interventions, and popular artistic experiments offering a new conception of socialist and postsocialist feminisms, mainstream culture, and women's cinema. Wang highlights the films of Wang Ping and Dong Kena in the 1950s and 1960s and Zhang Nuanxin and Huang Shuqin in the 1980s and 1990s to unveil how they have been profoundly misread through extant research paradigms entrenched in Western Cold War ideology, post-second wave cultural feminism, and post-Mao intellectual discourses. Challenging received interpretations, she elucidates how socialist feminism and culture were conceptualized and practiced in relation to China's search not only for national independence and economic development but also for social emancipation, proletarian culture, and socialist internationalism. Wang calls for a critical reevaluation of historical materialism, socialist feminism, and popular culture to forge an integrated emancipatory vision for future transnational feminist and cultural practices. *Secret of Regeneration* Hilton Hotema, 1998 **Nature, Ethics and Gender in German Romanticism and Idealism** Alison Stone, 2018-10-25 This book provides an account of the development of ideas about nature from the Early German Romantics into the philosophies of nature of Schelling and Hegel. In clear and accessible language, Alison Stone explains how the project of philosophy of nature took shape and made sense in the post-Kantian context. She also shows how ideas of nature were central to the philosophical and literary projects of the Early German Romantics, with attention to Friedrich Schlegel, Novalis, and Hölderlin. Stone advances a distinctive original perspective on Romantic and Idealist accounts of nature and their ethical implications regarding human-nature relations and intra-human political relations, especially but not only around gender and race. The book demonstrates how these approaches to nature have contemporary relevance to a range of current debates such as those over naturalism, the environmental crisis, and the politics of gender, race, and colonialism.
