Long March To Power:

From People's War to People's Rule Timothy J. Lomperis, 2000-11-09 Timothy Lomperis persuasively argues the ironic point that the lessons of American involvement in Vietnam are not to be found in any analysis of the war by itself. Rather, he proposes a comparison of the Vietnam experience with seven other cases of Western intervention in communist insurgencies during the Cold War era: China, Indochina, Greece, the Philippines, Malaya, Cambodia, and Laos. Lomperis maintains that popular insurgencies are manifestations of crises in political legitimacy which occur as a result of the societal stresses caused by modernization. Therefore, he argues, any intervention in a people's war will succeed or fail depending on how it affects this crisis. The unifying theme in the cases Lomperis discusses is the power of land reform and electoral democracy to cement political legitimacy and therefore deflect revolutionary movements. Applying this theory to the ongoing Sendero Luminoso insurgency in Peru, Lomperis makes a qualified prediction of that conflict's outcome. He concludes that a global trend toward democratization has produced a new era of people's rule.

China in Transformation Colin Mackerras, 2014-06-11 In the first half of the twentieth century, China moved from a millennium of imperial rule to the Communist Party-led People's Republic of China, which remains today. *China in Transformation* argues that this enormously significant period in Chinese history saw wrenching change throughout Chinese society, amounting to a social, cultural, and political transformation. This new, fully revised and updated edition takes full advantage of new research and formerly unavailable material to analyse the fascinating processes of revolution, reform, reaction, and change in China during the period. Mackerras discusses the wars, occupations, and uprisings that marked the period, including the Boxer Rebellion and the Japanese occupation, and includes a new chapter on postwar China and the Civil War. Examines nation building and revolutions, including the successful communist movement that has led to the rise of today's state. Acknowledges the prevalence of poverty and famine in the period but also gives space to the areas in which there was progress: the introduction of mass secular education, improvements in the status of women, and in a new chapter, details significant developments in culture, literature, and theatre. Written in an accessible style with a rich collection of documents, chronology, glossary, a guide to further reading, and a Who's Who summarising the careers and contributions of the main figures, this new edition is essential for all those interested in understanding China's modern history.

Politics and Purges in China Frederick C. Teiwes, 1993 Drawing upon released documents, memoirs, and party history works, the process and impact of the political campaigns in China between 1950 and 1965 is documented. Complete with extensive interviews with Chinese scholars and former officials, the book reviews the findings of the first edition.

Revolution and Dictatorship Steven Levitsky, Lucan Way, 2024-10-29 Why the world's most resilient dictatorships are products of violent revolution Revolution and Dictatorship explores why dictatorships born of social revolution such as those in China Cuba Iran the Soviet Union and Vietnam are extraordinarily durable even in the face of economic crisis large scale policy failure mass discontent and intense external pressure Few other modern autocracies have survived in the face of such extreme challenges Drawing on comparative historical analysis Steven Levitsky and Lucan Way argue that radical efforts to transform the social and geopolitical order trigger intense counterrevolutionary conflict which initially threatens regime survival but ultimately fosters the unity and state building that supports authoritarianism Although most revolutionary governments begin weak they challenge powerful domestic and foreign actors often bringing about civil or external wars These counterrevolutionary wars pose a threat that can destroy new regimes as in the cases of Afghanistan and Cambodia Among regimes that survive however prolonged conflicts give rise to a cohesive ruling elite and a

powerful and loyal coercive apparatus This leads to the downfall of rival organizations and alternative centers of power such as armies churches monarchies and landowners and helps to inoculate revolutionary regimes against elite defection military coups and mass protest three principal sources of authoritarian breakdown Looking at a range of revolutionary and nonrevolutionary regimes from across the globe Revolution and Dictatorship shows why governments that emerge from violent conflict endure
