of writing as a social practice This approach allows supervisors to think of doctoral writers as novices who need to learn new ways with words as they enter the discursive practices of scholarly communities This involves learning sophisticated writing practices with specific sets of conventions and textual characteristics The authors offer supervisors practical advice on helping with commonly encountered writing tasks such as the proposal the journal abstract the literature review and constructing the dissertation argument The first edition of this book has helped many academics and thousands of research students produce better written material Now fully updated the second edition includes Examples from a broader range of academic disciplines A new chapter on writing from the thesis for peer reviewed journals More advice on reading and note taking performance and conferences Further information on developing a personal academic writing style and Advice on the use of social media blogs tweets and wikis to create trans disciplinary and trans national networks and conversations Their discussion of the complexities of forming a scholarly identity is illustrated throughout by stories and writings of actual doctoral students In conclusion they present a persuasive and proven argument that universities must move away from simply auditing supervision to supporting the development of scholarly research communities Any supervisor keen to help their students develop as academics will find the ideas and practical solutions presented in this book fascinating and insightful reading

Chinese Students' Writing in English Maria Leedham, 2014-08-27 Chinese students are the largest international student group in UK universities today yet little is known about their undergraduate writing and the challenges they face Drawing on the British Academic Written English corpus a large corpus of proficient undergraduate student writing collected in the UK in the early 2000s this study explores Chinese students written assignments in English in a range of university disciplines contrasting these with assignments from British students The study is supplemented by questionnaire and interview datasets with discipline lecturers writing tutors and students and provides a comprehensive picture of the Chinese student writer today Theoretically framed through work within academic literacies and lexical priming the author seeks to explore what we know about Chinese students writing and to extend these findings to undergraduate writing more generally In a globalized educational environment it is important for educators to understand differences in writing styles across the student body and to move from the widespread deficit model of student writing towards a descriptive model which embraces different ways of achieving success Chinese Students Writing in English will be of value to researchers EAP tutors and university lecturers teaching Chinese students in the UK China and other English or Chinese speaking countries
