Innovation in Language Learning and Teaching Richard Smith,Tim Giesler,2023-06-15 By adopting a historical perspective this edited collection of papers takes a fresh look at a key concept in applied linguistics that of innovation A substantial introduction advocates historical re evaluation of this notion via exploration of its rise to prominence while the ten subsequent chapters present in depth case studies of apparently successful as well as ineffective innovation s from the early eighteenth to the late twentieth century Language learning teaching developments in Brazil China England France Germany and Italy are considered along with global innovations in language learner lexicography while the languages considered include Chinese English French Italian Latin Portuguese and Spanish Various types of primary source material are utilized illustrating the possibilities of applied linguistic historiography for both students and academics new to the field The book questions ideas of perpetual innovation and progress supporting the adoption of more critical perspectives on change and innovation in applied linguistics and language teaching **Lexicography: Lexicography, metalexicography and reference science** R. R. K. Hartmann,2003 **Cognitive Lexicography** Carolin Ostermann,2015-07-31 English lexicography and linguistics have always shared close ties yet the potential of cognitive linguistics for lexicography has only been hesitantly acknowledged in the literature This is what cognitive lexicography attempts to change by using insights gained in cognitive semantic research for the development of new dictionary features After a short survey of the history and practice of English monolingual learner lexicography as well as an outline of the relationship between linguistics and lexicography three new dictionary features are developed They cover three different cognitive semantic theories as well as three different parts of the monolingual dictionary entry each time for a new set of lexemes Frame semantics conceptual metaphor theory as well as cognitive conceptions of polysemy are used to create a new example section for agentive nouns a new defining structure for emotion terms and a new microstructural arrangement for particle entries Dictionary analyses on all as well as user studies on two of the features complement these suggestions The monograph thus presents a new approach to lexicography that incorporates into its description of lexical items how humans perceive and conceptualise language
