Louis I Kahn Houses:

The Houses of Louis Kahn George H. Marcus, William Whitaker, 2013 A stunning celebration of the architect's residential masterpieces Louis Kahn 1901-1974 one of the most important architects of the postwar period is widely admired for his great monumental works including the Kimbell Art Museum the Salk Institute and the National Assembly Complex in Bangladesh However the importance of his houses has been largely overlooked This beautiful book is the first to look at Kahn's nine major private houses Beginning with his earliest encounters with Modernism in the late 1920s and continuing through his iconic work of the 1960s and 1970s the authors trace the evolution of the architect's thinking which began and matured through his design of houses and their interiors a process inspired by his interactions with clients and his admiration for vernacular building traditions Richly illustrated with new and period photographs and original drawings as well as previously unpublished materials from personal interviews archives and Kahn's own writings *The Houses of Louis Kahn* shows how his ideas about domestic spaces challenged conventions much like his major public commissions and were developed into one of the most remarkable expressions of the American house

Feature: Houses by Louis I. Kahn Louis I. Kahn, Nobuyuki Yoshida, 2009 建築の神々 Yutaka Saito, 2003-10 建築の神々 Louis I. Kahn, Peter S. Reed, 1996 **The Louis I. Kahn Archive: Buildings and projects, 1962-1965** Louis I. Kahn, 1987 **A+u 09:02, 461** A+U Publishing, 2019-10-31 Louis I. Kahn's 12 most recognized houses are included in this issue from his first the Oser House in 1940 to the last built work in his lifetime the Korman House in 1973 Each project has been newly photographed and illustrates the current state of the homes This edition is notable for the number of rare interior views that show furnishings and layout inside the residences Also included are a series of drawings recently found in the basement of the Fisher House that document the design process through 5 different schemes to the final design Designing houses was a constant in the career of Louis I. Kahn Even now his houses are still loved and lived in We had the opportunity to photograph 12 residences by Kahn and this issue illustrates the current state of these homes From his first house designed before World War II to the house completed as the last work during his lifetime these projects are presented through images published for the first time and original drawings Also included are a series of drawings that were recently found in the basement of the Fisher House that document the design process over 5 different schemes to the final design A transcription of a conversation with Mrs Fisher describes his views on housing and architecture This edition is notable for the number of rare interior views that show furnishings and inside of the homes Text in English and Japanese Houses by Louis I.  1999 is the twenty fifth anniversary of Louis Kahn's death In the second half of the twentieth century Louis Kahn's designs
 took on enormous significance for international architecture Kahn belonged to that generation of architects which perfected
 and simultaneously surpassed Modernism Most of Kahn's projects were realised in the USA and several large projects were
 built in Asia From Kahn's early work to larger projects such as the National Capital of Bangladesh in Dhaka and the Kimbell
 Art Museum in Fort Worth the documented works all illustrate the human aspect in Kahn's work **Louis I. Kahn** Vincent
 Scully (Jr.), 1962 Over 100 illustrations plans drawings and photographs together with a selection from the writings of the
 architect complete bibliography and chronology **Key Houses of the Twentieth Century** Colin Davies, 2006 Featuring
 over 100 of the most significant and influential houses of the twentieth century For each of the houses included there are
 numerous accurate scale plans showing each floor together with elevations sections and site plans where appropriate All of
 these have been specially drawn for this book and are based on the most up to date information and sources **Notes on**

by Louis I. Kahn, 2009 **Twenty-Five Buildings Every Architect Should Understand** Simon Unwin, 2014-11-17 Twenty
 Five Buildings Every Architect Should Understand is an essential companion to Simon Unwin's *Analysing Architecture* and
 part of the trilogy which also includes his *Exercises in Architecture* Learning to Think as an Architect Together the three
 books offer an introduction to the workings of architecture providing for the three aspects of learning theory examples and
 practice Twenty Five Buildings focusses on analysing examples using the methodology offered by *Analysing Architecture*
 which operates primarily through the medium of drawing In this second edition five further buildings have been added to the
 original twenty from an even wider geographical area which now includes the USA France Italy Mexico Switzerland Spain
 Finland Germany Australia Norway Sweden India and Japan The underlying theme of *Twenty Five Buildings Every Architect*
Should Understand is the relationship of architecture to the human being how it frames our lives and orchestrates our

experiences how it can help us make sense of the world and contribute to our senses of identity and place Exploring these dimensions through a wide range of case studies that illustrate the rich diversity of twentieth and twenty first century architecture this book is essential reading for every architect **Trajectories in Architecture** Michael Jasper, 2023-04-21

Trajectories in Architecture Plan Sensation Temporality presents a compelling examination of underlying issues in late twentieth century architecture Three formal preoccupations and conceptual orientations are used as guiding threads or trajectories These three trajectories the plan as conceptual device a logic of sensation and temporalities serve to organise individual chapters in the central sections of the book and provide a new lens to the study of period work revealing architectural conditions and consequent spatial effects little explored to date *Trajectories in Architecture* adds to scholarship and expands our understanding of the role of conceptual and formal criteria in the analysis and creation of works of architecture The book provides potentially transformative new interpretations of influential architects and key projects from the last half of the twentieth century to reveal new alignments and potentialities in architecture s recent past as a contribution to identifying future possibilities In so doing the book argues for the still latent potential in modern architecture s traditions and design principles and their future expression *Trajectories in Architecture* includes analysis of significant projects of Le Corbusier Peter Eisenman Zaha Hadid John Hejduk Louis I Kahn and I M Pei *The Architecture of Ruins* Jonathan Hill, 2019-03-25

The Architecture of Ruins Designs on the Past Present and Future identifies an alternative and significant history of architecture from the sixteenth century to the twenty first century in which a building is designed occupied and imagined as a ruin This design practice conceives a monument and a ruin as creative interdependent and simultaneous themes within a single building dialectic addressing temporal and environmental questions in poetic psychological and practical terms and stimulating questions of personal and national identity nature and culture weather and climate permanence and impermanence and life and death Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past the present and the future in a single architecture Structured around a collection of biographies this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier ones the chapters investigate an evolving interdisciplinary design practice to show the relevance of historical understanding to design Like a history a design is a reinterpretation of the past that is meaningful to the present Equally a design is equivalent to a fiction convincing users to suspend disbelief We expect a history or a novel to be written in words but they can also be delineated in drawing cast in concrete or seeded in soil The architect is a physical novelist as well as a physical historian Like building sites ruins are full of potential In revealing not only what is lost but also what is incomplete a ruin suggests the future as well as the past As a stimulus to the imagination a ruin s incomplete and broken forms expand architecture s allegorical and metaphorical

capacity indicating that a building can remain unfinished literally and in the imagination focusing attention on the creativity of users as well as architects Emphasising the symbiotic relations between nature and culture a building designed occupied and imagined as a ruin acknowledges the coproduction of multiple authors whether human non human or atmospheric and is an appropriate model for architecture in an era of increasing climate change
