**The Documentary Imagination in Twentieth-Century French Literature** Alison James, 2020-09-03 The Documentary Imagination in Twentieth Century French Literature identifies a documentary impulse in French literature that emerges at the end of the nineteenth century and culminates in a proliferation of factual writings in the twenty first Focusing on the period bookended by these two moments it highlights the enduring concern with factual reference in texts that engage either with current events or the historical archive Specifically it considers a set of ideas and practices centered on the conceptualization and use of documents In doing so it contests the widespread narrative that twentieth century French literature abandons the realist enterprise and argues that writers instead renegotiate the realist legacy outside or at the margins of the fictional space of the novel Analyzing works by authors including Gide Breton Aragon Yourcenar Duras and Modiano the book defines a specific documentary mode of literary representation that records assembles and investigates material traces of reality The document is a textual visual or material piece of evidence repurposed through its visual insertion textual transcription or description within a literary work It is a fact but it also becomes a figure standing for literature's confrontation with the real The documentary imagination involves a fantasy of direct access to a reality that speaks for itself At the same time it gives rise to concrete textual practices that open up new directions for literature by interrogating the construction and interpretation of facts [The SAGE Handbook of Qualitative Research](#) Norman K. Denzin, Yvonna S. Lincoln, 2012-10-24 This book is the second of three paperback volumes taken from The SAGE Handbook of Qualitative Research Fourth Edition This volume isolates the major strategies historically the research methods that researchers can use in conducting concrete

qualitative studies The question of methods begins with questions of design and the matters of money and funding These questions always begin with the researcher who moves from a research question to a paradigm or perspective and then to the empirical world The history and uses of these strategies are explored extensively in this volume The chapters move from forms and problems with mixed methods inquiry to case study performance and narrative ethnography to constructionist analytics to grounded theory strategies testimonies participatory action research and clinical research

C'est une éthique interrogative de la science, une éthique relative parce que procédurale mais non relativiste car elle repose sur des raisons et des alternatives sans cesse valables et discutées, une éthique qui prend le chemin des aventures conceptuelles de la science non pour se faire science elle-même mais pour être suffisamment informée en vue de décrire les dilemmes que les choix humains affrontent tous les jours.
