Wholeness is a process that encompasses all that we are as humans in interaction The contemporary human is in a great deal of psychological distress As a result people do all sorts of extreme things to ease the tension For instance some become hedonistic with inordinate desires for drugs alcohol tranquilizers etc food and sex whereas some become fanatical in their belief system including religious beliefs with tendency toward externality The extent that the human person succeeds in integrating the physical psychosocial and spiritual domain is the extent that humanity evolves to a higher level of consciousness whereby the individual being at peace with oneself reaches out creatively and assertively to neighbours and to the larger world that encompasses humans and the natural order in harmony English Couplets M.R.
