post of Lucifer The Source of All Love Russell, Heidi, 2017-03-16 **Finding Truth in Life and Love: One Man's Journey** George Kyriacou, 2022-04-26 Finding Truth in Life and Love One Man's Journey Wow what a title but I hear you say the great thinkers of our time can explain Love Life and the Universe so why have you bothered writing a book Stephen Hawking says the universe can and will create itself from nothing Richard Dawkins explanation of life is We are survival machines robot vehicles blindly programmed to preserve the selfish molecules known as genes And as for love science has proven that love is just a bunch of chemical reactions So what can I offer on the subject at hand All these intelligent people indeed have more to say on the subject with all their knowledge gained through degrees and doctorates What can I add to the subject with my most prized qualification being my 100 yards swimming certificate from primary school Well indeed I do not have a lot of knowledge but I do consider that life has taught me to be wise You may ask what the difference is between knowledge and wisdom Well knowledge is knowing that a tomato is a fruit wisdom is not putting tomatoes in your fruit salad Reading some of the explanations by the world's greatest minds like Stephen Hawking when he says the universe will create itself from nothing I get the uneasy feeling that someone is messing with the fruit salad This uneasiness and my stubborn enquiring nature have set me on a half century discovery for truth The earth is travelling at 67 000 miles per hour through space Is someone driving What about all the religions of the world Are some or all of them true What is the truth in any case Does the truth matter Why don't we abandon the truth and all invent our reality to suit our lives Teilhard de Chardin Osgood, Libby, CND, 2023-03-30 Labor of Love Murray Leinster, 2011-03-14 There's a basic difference in the method of thinking we of today use as against that used a millennium or more ago It's remarkably hard to spot because we assume that of course everybody always thought this way didn't they **Love the World** David Adam, 2018-07-19 Writing from lived experience as much as knowledge David Adam conveys a delight in the mystery of being that is deeply attractive Love the World opens by looking at the beginning of the universe then moves on to the earth's atmosphere the miracle of water and things that we often take for granted but are essential for our health and happiness It focuses on our relationship with the world and encourages us to reflect on what really matters In our most fragile moments we know that we are of dust and to dust we shall return but in our depths we know there is more We are not created out of nothing but out of love The very source of your being is love This beautifully written book aims to increase our love for the world through reflecting on what we have discovered about it and using this as a basis for further meditation and spiritual enrichment It opens by looking at the beginning of the universe and the mystery of being then moves on to our world its atmosphere the miracle of water and things we often take for granted but are essential to our health and happiness Finally it focuses on our relationship to the earth Each section offers a short introduction based on scientific discovery a meditation and an exercise in awareness and sensitivity **Triumph of Love** PRAVIR MALIK, 2020-04-04 Broadly speaking transhumanism refers to a philosophy whose focus is to move beyond current human limits This book suggests an approach to transhumanism based on a perception of

Light elaborated in the previous nine books in the Cosmology of Light book series In this perception light is envisioned as existing at different constant speeds We know that in our physical universe light travels at a constant speed referred to as c of 186 000 miles per second This has a concrete bearing on how we experience time and space and on how matter arises and in a Cosmology of Light it can be said that light at c is an intentionality to filter infinite potentiality from Light's native state of traveling infinitely fast so life can arise in a particular way So imagine light traveling infinitely fast This would suggest another reality packed with infinite possibility due to Light's omnipresence omnipotence omniscience and omninurturing fourfoldness Omnipresence because Light would be instantaneously present in whatever volume considered Omnipotence because anything not of the nature of light will be overcome by it Omniscience because light being everywhere will know what arises or disappears in it Omninurturing because all would exist in one nature and be bound by it As the previous books have elaborated and as this book will adequately summarize a cosmology arises when we consider the simultaneous and interpenetrating realities created when Light exists at multiple constant speeds simultaneously The dynamics and information resident in each of these simultaneous realities is arbitrated into material reality through a constant and persistent quantum level computation that generates genetic type information that effectively becomes law Quanta in such a cosmology is perceived as being the mechanism by which information in faster moving layers of light is materialized in a slower moving layer of light Law manifests as quadrumvirate mechanisms such as space time energy gravity the electro magnetic wave archetype mass potential spectrum quark lepton boson Higgs boson particles s shell p shell d shell f shell atoms nucleic acid lipid protein polysaccharide cells amongst other mechanisms that derive their ability to become based on the native being of Light's omnipresent omnipotent omniscient omninurturing fourfoldness It may even be said that such becomings resulting in quadrumvirate based law reveal essential beings Hence a being or a particular kind of taxonomic classification akin to the species genus family order class phylum kingdom domain as in the hierarchy of life is revealed with successful becoming Plate 1 that follows shortly summarizes such a classification by way of a contemplative map of being Hence Light in its native state traveling with infinite speed may be thought of as sitting at the top of such a taxonomic hierarchy generating light based domains kingdoms phyla classes and so on But such fourfoldness that manifests as effective law or through the becoming involving persistent quantum level computation that reveals a being is none other than a triumph of love For it is only the power of love of that innate need to maintain the integrality of light's fourfoldness even as it continues to materialize that can be the foundation of a sustainable becoming The more powerful such love so that in any materialization there is integration not only of the fourfoldness of Light's implicit properties but also of an integration of the many layers of light existing at different speeds the more fully will a becoming be founded on completeness of potentiality in light to itself become a being capable of engendering light based life Hence as will be suggested in this book not only does a particular type of being engender vast variation within that type but further beings can combine with beings which is

essentially an act of love to create more comprehensive beings resulting in all the complexity of life Life itself will be seen to originate in the native state of Light adding function and variation as light precipitates into more and more material reality emerging as a fullness of life At the base of all possible variation and advancement in being becoming and life is the ability to influence the process of the persistent quantum level computation so that there is a more complete horizontal and vertical integration of Light a more complete light based singularity as it were and therefore of the output of genetic type information and consequently of laws that are active in a being s becoming This is what is considered to be the basis of a system or framework of transhumanism in a cosmology of light

God of Love and God of Reason David R. Mason, 2016-02-18 These homilies lectures and essays vigorously champion the author s conviction that it is reasonable to believe in a God of pure unbounded love and also that the best religion is a reasonable religion That is the God of Love is the God of Reason and as a seventeenth century Cambridge preacher put it If you would be religious be rational in your religion Thus these essays challenge both the New Atheists and Fundamentalists who are twins like Tweedledum and Tweedledee And they aim positively to unpack the meaning and implications of Jesus dictum You shall love the Lord your God with all your heart and with all your soul and with all your mind This is the greatest and first commandment And the second is like it You shall love your neighbor as yourself On these two commandments hang all the law and the prophets

St. Patrick and the Helicopter William Loader, 2023-06-29 This book comes from the playground of imagination It is the work of a leading international specialist in New Testament studies with a passion for making the findings of New Testament research accessible for a wide readership From children s stories to liturgies poems to subversively provocative fantasies it invites the reader to play to reflect and to be confronted This is a book to keep coming back to rather than one to be read from cover to cover It invites the reader to engage issues at the heart of faith and disbelief It is a rich and challenging resource for personal and for group reflection Some pieces will serve well as discussion starters Some are for storytelling and celebration including children s stories with subtle hints for adult minds Others belong in the context of worship They are grouped broadly according to the church liturgical year Around Christmas Around Easter Around Pentecost and Any Time Come and read Come and play

Ask the Beasts: Darwin and the God of Love Elizabeth A. Johnson, 2014-01-16 For millennia plant and animal species have received little sustained attention as subjects of Christian theology and ethics in their own right Focused on the human dilemma of sin and redemptive grace theology has considered the doctrine of creation to be mainly an overture to the main drama of human being s relationship to God What value does the natural world have within the framework of religious belief The crisis of biodiversity in our day when species are going extinct at more than 1 000 times the natural rate renders this question acutely important Standard perspectives need to be realigned theology needs to look out of the window so to speak as well as in the mirror Ask the Beasts Darwin and the God of Love leads to the conclusion that love of the natural world is an intrinsic element of faith in God and that far from being an add on ecological care is at the centre of

Taylor, M.D.,2021-05-28 Love Deficiency Diseases Abortions Addictions Abuse and Divorce By Lawrence H Taylor M D More than half of marriages end in divorce Nearly a million abortions yearly deprive our country and families of the new love that all babies bring And addictions are a major factor filling our jails and destroying the body brains and the mind spirits of this nation s most precious commodity our youth Love Deficiency Diseases teaches us that love is a panacea a cure all for addictions abortions abuse and divorce No pill or prescription has the healing power of love The more the patient learns of love its earthly and divine powers the healthier happier and wealthier he will become Artificial Love Paul Shephard,2003-05-09 A vision of architecture that includes sculpture machines and technology and encapsulates the history of the human species According to Paul Shephard architecture is the rearranging of the world for human purposes Sculpture machines and landscapes are all architecture every bit as much as buildings are In his writings Shephard examines old assumptions about architecture and replaces the critical theory of the academic with the active theory of the architect citizen enamored of the world around him Artificial Love weaves together three stories about architecture into one The first about machines as architecture leads to speculations about technology and the human condition and to the assertion that machines are the sculptures of today The second story is about the ways that architecture reflects the tribal and personal desires of those who make it In the West ideas of community multiculturalism and globalization compete furiously leaving architecture to exist as it always has as the past in the present The third story features individual people experiencing their lives in the context of architecture Here Shephard borrows the rhetorical device of Shakespeare s seven ages of man to propose that each person s life imitates the accumulating history of the human species Shephard s version of the history of humans is a technological one in which machines become sculpture and sculpture becomes architecture For Shephard our machines do not separate us from nature Rather our technology is our nature and we cannot but be in harmony with nature The change that we have wrought in the world he says is a wonderful and powerful thing Love

Affair Don Tait, 2017-01-09 Several years ago at a gathering of married priests and their wives it was asked How is it you got married I began to reply with a long description of the journey leading up to my decision After a few minutes my wife impatient with the slowness of it all blurted out We fell madly in love and got married End of story So begins the story of Don Tait and his spiritual journey from his roots in a devout Catholic upbringing to becoming a celibate parish priest and missionary in Latin America to the life changing decision to marry ever faithful to the Spirit who leads to life While the context of his life is unique the choice to be faithful is universal
