Becoming Art Howard Morphy, 2020-08-28 Thirty years ago Australian Aboriginal art was little more than a footnote to world art Today it is considered to be an important contemporary art movement often promoted as being connected to a deep cultural past Becoming Art provides a new analysis of the shifting cultural and social contexts that surround the production of Aboriginal art Transcending the boundaries between anthropology and art history the book draws on arguments from both disciplines to provide a unique interdisciplinary perspective that places the artists themselves at the centre of the argument Western art history has traditionally regarded Aboriginal art as distanced from time and place Becoming Art uses the recent history of Aboriginal art to challenge some of the presuppositions of western art discourse and western art worlds It argues for a more cross cultural perspective on world art history

Irregular Connections Andrew P. Lyons, Harriet Lyons, 2004-12-01 Irregular Connections traces the anthropological study of sex from the eighteenth century to the present focusing primarily on social and cultural anthropology and the work done by researchers in North America and Great Britain Andrew P and Harriet D Lyons argue

that the sexuality of those whom anthropologists studied has been conscripted into Western discourses about sex including debates about prostitution homosexuality divorce premarital relations and hierarchies of gender class and race Because sex is the most private of activities and often carries a high emotional charge it is peculiarly difficult to investigate At times such as the late 1920s and the last decade of the twentieth century sexuality has been a central concern of anthropologists and focal in their theoretical formulations At other times the study of sexuality has been marginalized The anthropology of sex has sometimes been one of the main faces that anthropology presented to the public often causing resentment within the discipline Andrew P Lyons is an associate professor of anthropology at Wilfrid Laurier University Harriet D Lyons is an associate professor of anthropology at the University of Waterloo

Romantic Love in Cultural Contexts Victor Karandashev, 2016-12-24 This volume presents a conceptual historical anthropological and sociological review of how culture affects our experience and expression of romantic love What is romantic love and how is it different from and similar to other kinds of love How is romantic love related to sex and marriage in human history and across contemporary cultures What cultural factors mediate attraction in love These are some of the questions the volume explores through its interdisciplinary yet focused lens Much of the current research evidence suggests that love is a universal emotion experienced by a majority of people in various historical eras and in all the world's cultures Yet love displays in different ways because culture has an impact on people's conceptions of love and the ways they feel think and behave in romantic relationships This volume summarizes classical knowledge on love and culture while at the same time focusing sharply on recent studies and cutting edge research that has advanced the field Divided into three parts the volume begins by defining and analyzing the concept of romantic love and interdisciplinary approach to its study in cultural context Part II traces the origin and evolution of romantic love both in various places throughout the world and various time periods throughout history Part III presents the revolutionary expansion of romantic

love ideas and practices in the late 20th and early 21st centuries in various parts of the world focusing particularly on the development of romantic love as a cultural ideal of the modern cultures Finally the book concludes by summarizing the major achievements in this field of study and predicts future development A timely and thoughtful addition to the literature Romantic Love in Cultural Contexts delivers thought provoking insights to researchers in relationship scholarship sociology anthropology and cultural studies and all those interested in the universal human concept of love Overall I find Dr Victor Karandashev is an excellent and fine scholar who has a firm grasp of both the fundamental principles of cross cultural research and of anthropology In our increasingly connected world Romantic Love in Cultural Contexts updates and adds to the descriptions and explanations of similarities and differences in romantic love across generations and cultures Romantic love encompasses the life span rather than being a phenomenon largely confined to youthful years The topic of this project concerns the deepest of our sentiments and pervades life from birth to death This book contributes to better knowledge of this phenomenon across generations

The Spirit in the Gene Reg Morrison, 1999 From famines and deforestation to water pollution global warming and the rapid rate of extinction of plants and animals the extent of the global damage wrought by humankind is staggering Why have we allowed our environment to reach such a crisis What produced the catastrophic population explosion that so taxes the earth's resources Reg Morrison's search for answers led him to ponder our species astonishing evolutionary success His extraordinary book describes how a spiritual outlook combined with a capacity for rational thought have enabled Homo sapiens to prosper through the millennia It convincingly depicts these traits as part of our genetic makeup and as the likely cause of our ultimate downfall against the inexorable laws of nature The book will change the way readers think about human evolution and the fate of our species Small bands of apes walked erect on the dangerous plains of East Africa several million years ago Morrison marvels that they not only survived but migrated to all corners of the earth and established civilizations To understand this feat he takes us back to a critical moment when these hominids developed language and with it the unique ability to think abstractly He shows how at this same time they began to derive increasing advantage from their growing sense of spirituality He convincingly depicts spirituality as an evolutionary strategy that helped rescue our ancestors from extinction and drive the species toward global dominance Morrison concludes that this genetically productive spirituality which has influenced every aspect of our lives has led us to overpopulate the world and to devastate our own habitats Sobering sometimes chilling consistently fascinating his book offers a startling new view of human adaptation running its natural course
