Makers And Milestones Of The Middle Ages:

Men and Milestones of the Middle Ages Peter G. Stillman, 1970 **The Making of the Middle Ages** R. W. Southern, 1961-09-10 A study of the chief personalities and forces that brought Western Europe to pre eminence as a centre for political experimentation economic expansion and intellectual discovery *The Making of the Middle Ages* Richard William Southern, 1959 **The Making of Politics** John Watts, 2009-05-07 This major survey of political life in late medieval Europe provides a framework for understanding the developments that shaped this turbulent period Rather than emphasising crisis decline disorder or the birth of the modern state this account centres on the mixed results of political and governmental growth across the continent The age of the Hundred Years War schism and revolt was also a time of rapid growth in jurisdiction taxation and representation of spreading literacy and evolving political technique This mixture of state formation and political convulsion lay at the heart of the making of politics Offering a full introduction to political events and processes from the fourteenth century to the sixteenth this book combines a broad comparative account with discussion of individual regions and states including eastern and northern Europe alongside the more familiar west and south **Making Money in the Early Middle Ages** Rory Naismith, 2023-07-11 An examination of coined money and its significance to rulers aristocrats and peasants in early medieval Europe Between the end of the Roman Empire in the fifth century and the economic transformations of the twelfth coined money in western Europe was scarce and high in value difficult for the majority of the population to make use of And yet as Rory Naismith shows in this illuminating study coined money was made and used throughout early medieval Europe It was he argues a powerful tool for articulating people s place in economic and social structures and an important gauge for levels of economic complexity Working from the premise that using coined money carried special significance when there was less of it around Naismith uses detailed case studies from the Mediterranean and northern Europe to propose a new reading of early medieval money as a point of contact between economic social and institutional history Naismith examines structural issues including the mining and circulation of metal and the use of bullion and other commodities as money and then offers a chronological account of monetary development discussing the post Roman period of gold coinage the rise of the silver penny in the seventh century and the reconfiguration of elite power in relation to coinage in the tenth and eleventh centuries In the process he counters the conventional view of early medieval currency as the domain only of elite gift givers and intrepid long distance traders Even when there were few coins in circulation Naismith argues the ways they were used to give gifts to pay rents to spend at markets have much to tell us *The Making of Medieval History* G. A. Loud, Martial Staub, 2017 Essays on the discipline of medieval history and its practitioners from the late eighteenth century onwards A hugely interesting set of essays reflecting on a variety of ways in which medieval history has developed to the present time Scholarship of the highest standard deeply thought provoking and deeply engaged with the inheritances and future tasks of medieval academic history The collection will be essential reading

for all medievalists John Arnold Professor of Medieval History University of Cambridge Medieval history is present in many forms in our world Monuments from the Middle Ages or inspired by them are a familiar feature of landscapes across Europe and beyond the period between the end of the Roman Empire in Western Europe and the Reformation and European expansion is an essential part of our imagination be it conveyed through literature the arts science fiction or even video games it is also commonly invoked in political debates Specialists in the field have played a major role in shaping modern perceptions of the era But little is known about the factors that have influenced them and their work The essays in this volume provide original insights into the fabric and dissemination of medieval history as a scholarly discipline from the late eighteenth century onwards The case studies range from the creation of specific images of the Middle Ages to the ways in which medievalists have dealt with European identity contributed to making and deconstructing myths and more specifically addressed questions relating to land and frontiers as well as to religion GRAHAM A LOUD is Professor of Medieval History at the University of Leeds MARTIAL STAUB is Professor of Medieval History at the University of Sheffield Contributors Christine Caldwell Ames Peter Biller Michael Borgolte Patrick Geary Richard Hitchcock Bernhard Jussen Joep Leerssen G A Loud Christian L bke Jinty Nelson Bastian Schl ter Martial Staub Ian Wood Boomers 3.0 Lawrence R. Samuel, 2017-07-14 Capitalizing on what is arguably the most important social phenomenon of our time and place the aging of America this book shows organizations how to market specifically to baby boomers in their third act of life The graying of America is undeniable with an estimated 10 000 boomers turning 65 every day But to dismiss the baby boomer generation as a group no longer worth marketing to would be foolish According to the Census Bureau in 2029 the year when the last boomer will have turned 65 there will still be more than 61 million boomers roughly 17 percent of the projected population of the United States Boomers will still be the wealthiest generation in the United States until at least 2030 according to the Deloitte Center for Financial Services with their share of net household wealth to peak at 50.2 percent by 2020 Boomers 3.0 Marketing to Baby Boomers in Their Third Act of Life describes how to market to baby boomers from a cultural perspective specifically addressing the demographic group of baby boomers in their later adulthood a period that will continue for the next two to three decades The author uses the term 3.0 to indicate the baby boomers third phase of life and explains how this third act of life will differ from earlier periods accordingly organizations should take a different approach to marketing to them than in the past This book offers a way to contextualize business objectives within a culturally based forward thinking framework that fully leverages the opportunities presented by what is perhaps the biggest and most affluent customer base in history Readers will be able to use the strategies described to map territories to stake and mine in targeting boomers create meaningful relationships with individuals in this group and communicate effectively with boomers to offer them products and services *Savings and Investment Information for Teens, Fourth Edition* James Chambers, 2022-08-01 Provides consumer finance information for teens about economic principles wealth development bank accounts stocks bonds mutual funds and

other financial tools **The Making of Medieval Antifraternism** G. Geltner, 2012-04-05 A case study in opposition to religious authority in the pre modern period Geltner treats a phenomenon known as antifraternism from a fresh methodological and documentary perspective He challenges many assumptions made about the early history of the mendicant orders and the origins scale and scope of resistance to them **The Making of Medieval Rome** Hendrik Dey, 2021-10-14 Integrating the written sources with Rome s surviving remains and most importantly with the results of the past half century s worth of medieval archaeology in the city The Making of Medieval Rome is the first in depth profile of Rome s transformation over a millennium to appear in any language in over forty years Though the main focus rests on Rome s urban trajectory in topographical architectural and archaeological terms Hendrik folds aspects of ecclesiastical political social military economic and intellectual history into the narrative in order to illustrate how and why the cityscape evolved as it did during the thousand years between the end of the Roman Empire and the start of the Renaissance A wide ranging synthesis of decades worth of specialized research and remarkable archaeological discoveries this book is essential reading for anyone interested in how and why the ancient imperial capital transformed into the spiritual heart of Western Christendom **The Making of the American Conservative Mind** Jeffrey Hart, 2014-05-06 National Review has been the leading conservative national magazine since it was founded in 1955 and in that capacity it has played a decisive role in shaping the conservative movement in the United States In The Making of the American Conservative Mind Jeffrey Hart provides an authoritative and high spirited history of how the magazine has come to define and defend conservatism for the past fifty years He also gives a firsthand account of the thought and sometimes colorful personalities including James Burnham Willmoore Kendall Russell Kirk Frank Meyer William Rusher Priscilla Buckley Gerhart Niemeyer and of course the magazine s founder William F Buckley Jr who contributed to National Review s life and wide influence As Hart sees it National Review has regularly veered toward ideology but it has also regularly corrected its course toward in Buckley s phrase a politics of reality Its catholicity and originality attributable to Buckley s magnanimity and sense of showmanship has made the magazine the most interesting of its kind in the nation concludes Hart His highly readable and occasionally contrarian history the first history of National Review yet published marks another milestone in our understanding of how the conservatism now so influential in American political life draws from and in some ways repudiates the intellectual project that National Review helped launch a half century ago **The Making of Crusading Heroes and Villains** Mike Horswell, Kristin Skottki, 2021-02-27 Engaging the Crusades is a series of volumes which offer windows into a newly emerging field of historical study the memory and legacy of the crusades Together these volumes examine the reasons behind the enduring resonance of the crusades and present the memory of crusading in the modern period as a productive exciting and much needed area of investigation This new volume explores the ways in which significant crusading figures have been employed as heroes and villains and by whom Each chapter analyses a case study relating to a key historical figure
