**William Alphonso Murrill: The Naturalist** Ronald H. Petersen, 2025-08-20 For the casual naturalist William Alphonso Murrill's name is associated with a plethora of new species of fungi his mysterious resignation from the New York Botanical Garden his disappearance from New York and rediscovery as a free spirit in Florida Pivotal were his years in New York City of course but the process through which he arrived there the people who acted to shape him and his activities while there leading to his life changing trauma have not been previously adequately summarized Three academic biologists were especially important to his development George Francis Atkinson at Cornell Lucien Marcus Underwood at Columbia and Nathaniel Lord Britton at The New York Botanical Garden Other individuals appeared omnipresent to the story John Torrey John Newberry and Seth Low the latter President of Columbia University and Mayor of New York City The Torrey Botanical Club played an important role in Murrill's integration in the city and the spread of his name to the wider biology community Edna the love of his life and his wife remains a mysterious personage The articulation of forces individuals and the times combined to produce an interesting man attempting to forge his own path as The Naturalist Unlike most academics Murrill left several autobiographical publications often allegorical which furnish material on his developing years George Weber who spent considerable time with Murrill in advanced life penned a memorial from which valuable information has been gathered and Jim Kimbrough 2003 Murrill's successor as mycologist at the University of Florida wrote a more informal sketch of Murrill's last years This book serves as a comprehensive biography of William Alphonso Murrill's fascinating and mysterious life career      **Roscoe Pound and Karl Llewellyn** N. E. H. Hull, 1997 American legal history is traditionally viewed as a succession of discrete schools of thought or landmark court decisions not as the work of individuals Such an approach however hardly does justice to the lives of two of the foremost teachers and theorists of American jurisprudence In Roscoe Pound and Karl Llewellyn Searching for an American Jurisprudence N E H Hull reconstructs the historical cultural and intellectual context of the work of Pound and Llewellyn bringing to light their private and public relationship as well as the diverse sources from psychology to plant ecology to Icelandic sagas they separately drew upon in making their contributions to the American legal tradition      Uneasy Careers and Intimate Lives Pnina G. Abir-Am, Dorinda Outram, 1987 These pioneering studies of women in science pay special attention to the mutual impact of family life and scientific career The contributors address five key themes historical changes in such concepts as scientific career profession patronage and family differences in gender image associated with various branches of science consequences of national differences and emigration opportunities for scientific work opened or closed by marriage and levels of women's awareness about the role of gender in
