Making Big Money In 1600 The Life And Times Of Ismail Abu Taqiyya Egyptian Merchant:

Making Big Money in 1600 Nelly Hanna, 1998-05-01 Nelly Hanna's work challenges the standard perceptions about Middle East society and economy of the seventeenth century. Both novel in its approach and information, this book's central theme revolves around the rise of an indigenous form of capitalism existing as early as the 1600s. *Making Big Money in 1600* examines the reemergence of the economic sector and its complex influences on social conditions during this time. By examining the life and work of Isma'il Abu Taqiyya, Hanna traces the relationship between economic activities and culture. As we are introduced to Abu Taqiyya, we learn how he negotiates partnership with other merchants, arranges for the handling of goods and negotiates loans for colleagues. Hanna reveals his home life, his wives, children, and concubines, his relations with his family and friends, and how these relations evolved and were affected by the changing social and economic conditions, a perspective rarely discussed in works before the modern period.

The Black Death in Egypt and England Stuart J. Borsch, 2009-09-15 Throughout the fourteenth century AD eighth century H waves of plague swept out of Central Asia and decimated populations from China to Iceland So devastating was the Black Death across the Old World that some historians have compared its effects to those of a nuclear holocaust As countries began to recover from the plague during the following century sharp contrasts arose between the East where societies slumped into long term economic and social decline and the West where technological and social innovation set the stage for Europe s dominance into the twentieth century Why were there such opposite outcomes from the same catastrophic event In contrast to previous studies that have looked to differences between Islam and Christianity for the solution to the puzzle this pioneering work proposes that a country s system of landholding primarily determined how successfully it recovered from the calamity of the Black Death Stuart Borsch compares the specific cases of Egypt and England countries whose economies were based in agriculture and whose pre plague levels of total and agrarian gross domestic product were roughly equivalent Undertaking a thorough analysis of medieval economic data he cogently explains why Egypt s centralized and urban landholding system was unable to adapt to massive depopulation while England s localized and rural landholding system had fully recovered by the year 1500
