Making Of Contemporary Europe:

The Making of Contemporary Europe R. Ben Jones, 1980-01-01 **Contemporary Europe** Richard Sakwa, Anne Stevens, 2012-03-28 This fully revised third edition provides a wide ranging introduction to political economic and social life across the whole continent Ideal for students new to the subject this popular text stimulates fresh thinking on issues and debates

Contemporary Europe William Outhwaite, 2016-10-04 Europe is one of the most dynamic and interesting areas of the world pioneering in the European Union a new form of governance for half a billion people represented in the world's first directly elected transnational parliament This book situates the European Union in a broader European global historical and geographical context providing a readable presentation of the most important facts and drawing on the theoretical approaches which have transformed the study of contemporary Europe over the past two decades The European Union is still on the road to what has been called an unknown destination and this book presents its economic political legal and social trajectory from the middle of the last century to the present Contemporary Europe covers some of these issues in an interdisciplinary framework aiming to situate the development of the European Union in a broader context of pan European and global processes Europe has been cut down to size but it does not have to become a global backwater and the study of contemporary Europe's institutional reality does not have to be boring The book counters this misperception conveying the essential facts and theories of contemporary European reality in a clear and approachable analysis It will serve as a readable introduction both to the academic field of European studies and to contemporary Europe itself

Dissonant Heritages and Memories in Contemporary Europe Tuuli Lähdesmäki, Luisa Passerini, Sigrid Kaasik-Krogerus, Iris van Huis, 2019-08-13 This open access book discusses political economic social and humanitarian challenges that influence both how people deal with their past and how they build their identities in contemporary Europe Ongoing debates on migration on local national inter and transnational levels prove that it is a divisive issue with regards to understanding European integration and identity At the same time the European Union increasingly invests in projects related to European heritage museums and cultural memory networks while having to take dissonant heritages into account These processes in their combination offer an interesting dynamic and form the complex puzzle that poses challenging questions for anyone involved in academic research heritage practices and policy debates With this puzzle at its core this book explicitly focuses on slippery and transforming notions of Europe and critically discusses ongoing and transforming

power structures of heritage and memory in today's Europe The book combines theoretical and methodological contributions to the debates on European heritage and memory studies and in depth analyses of empirical case studies Its main aim is to bring research fields concerning memory and heritage into a closer dialogue and thus explore the cultural and political dynamics of contemporary Europe

Citizenship in Contemporary Europe Michael Lister, 2008-05-12 This book seeks to analyse the impact of globalisation European integration mass migration changing patterns of political participation and welfare state provision upon citizenship in Europe Uniting theory with empirical examples the central theme of the book is that how we view such changes is dependent upon how we view citizenship theoretically The authors analyse the three main theoretical approaches to citizenship 1 classical positions liberal communitarian and republican primarily concerned with questions of rights and responsibilities 2 multiculturalist and feminist theories concerned with the question of difference and 3 postnational or cosmopolitan theories which emphasise how citizen rights and behaviours are increasingly located beyond the nation state Using these theoretical perspectives the second section of the book assesses four key social economic and political developments which pose challenges for citizenship in Europe migration political participation the w
