

# Human Body: Nervous System

The nervous system is made up of the central nervous system and peripheral nervous system. These systems work together to collect and interpret data from the body's internal and external environment and control responses.

## Central Nervous System

The central nervous system (CNS) manages the body's essential functions. Made up of the brain and spinal cord, the CNS receives sensory information and coordinates an appropriate response.

## Peripheral Nervous System

The peripheral nervous system (PNS) connects the CNS to the rest of the body. Nerves branch out from the brain and spinal cord, extending to the organs, muscles, and other parts of the body.

**Neurons** are highly specialized cells that transmit chemical and electrical information in the body. Neurons use short, branched extensions called dendrites to receive nerve impulses from surrounding cells. These messages then travel through the cell body to the axon, a threadlike structure. The impulse moves through the axon and is transmitted via chemical or electrical signals that pass through a synapse.

## Neuron

**Neurotransmitters** are chemicals that relay signals between neurons and bodily tissues. Neurotransmitters include adrenaline, dopamine, and endorphins.

**Becoming a Disciple-Making Church** Neil T. Anderson, 2016-01-26 Proven Methods for Turning Believers into Disciples What does it mean to grow a convert into a disciple And how do we help our people get there Neil Anderson s Freedom in Christ ministry has been walking individuals through these steps for over a quarter century Now he turns his attention to pastors and church leaders teaching them how to help their people resolve personal and spiritual conflicts including everything from difficult marriages to unrepentant sin to church disputes Before someone can mature spiritually they must be established alive and free in Christ through genuine repentance and faith in God This means churches must resolve their people s conflicts as the first step to discipleship rather than referring them to professional counselors We as believers have the answers for mental and emotional problems and through this ministry of reconciliation true discipleship happens Criminals in the Making John Paul Wright, Stephen G. Tibbetts, Leah E. Daigle, 2014-02-10 Why do individuals exposed to the same environment turn out so differently with some engaging in crime and others abiding by societal rules and norms Why are males involved in violent crime more often than females And why do the precursors of serious pathological behavior typically emerge in childhood This fascinating text addresses key questions surrounding criminal propensity by discussing studies of the life course perspective criminological research that links biological factors associated with criminality with the social and environmental agents thought to cause facilitate or otherwise influence a tendency towards criminal activity The book provides comprehensive interdisciplinary coverage of the current thinking in the field about criminal behavior over the course of a lifetime Additionally it highlights interventions proven effective and illustrates how the life course perspective has contributed to a greater understanding of the causes of crime 12 Hidden Rewards of Making Amends Allen Berger, 2013-06-01 Popular recovery author Allen Berger PhD guides us in working three of the most challenging of the Twelve Steps to reap the abundant rewards of making amends Letting go of resentment and forgiving ourselves for our past wrongs are critical to recovery from alcohol and other drugs Yet Steps Eight Nine and Ten which focus on making amends can be some of the most challenging to work because we must face ourselves and those who we have hurt or damaged In 12 Hidden Rewards of Making Amends Allen Berger PhD uses the same supportive down to earth style as in his popular book 12 Stupid Things That Mess Up Recovery His creative tools and tips will help us let go of anger heal strained relationships and make financial and emotional restitution Through this transformative process we can recover and maintain integrity resolve or complete unfinished business restore trust self esteem and self confidence deepen our spirituality and peace of mind and reinforce a strong commitment to recovery By being accountable for our words and actions and moving forward with a compassionate and constructive approach to the world we decrease our chance of relapse and learn to maintain a healthy balanced life *The Whispers of the Nervous System* Pasquale De Marco, 2025-07-23 The nervous system is a complex and fascinating network that plays a vital role in every aspect of our lives From our physical

health to our mental well being the nervous system is responsible for regulating a wide range of functions including movement breathing digestion and even our thoughts and emotions In recent years there has been growing interest in the role of the nervous system in our overall health and well being This has led to the development of a new field of study called neurospeak which explores the ways in which we can use language to communicate with our nervous system and promote healing and transformation Neurospeak is based on the idea that the words we use have a powerful impact on our nervous system By choosing our words carefully we can create positive neural pathways that support our health and well being Conversely using negative or self limiting language can create negative neural pathways that can lead to a variety of health problems The good news is that we can learn to use neurospeak to rewire our nervous system and create positive change in our lives By understanding the principles of neurospeak we can learn to speak to our nervous system in a way that promotes healing and well being This book is a comprehensive guide to neurospeak It will teach you the basics of neurospeak including how to identify and break negative neural patterns create new neural pathways for positive change and use neurospeak to improve your physical mental and emotional health Whether you are new to neurospeak or you are already familiar with its principles this book will provide you with valuable insights and practical tools that you can use to improve your health and well being So what are you waiting for Start reading today and discover the power of neurospeak This book is perfect for anyone who is interested in improving their health and well being It is also a valuable resource for healthcare professionals educators and anyone who works with people who are struggling with physical mental or emotional health challenges If you like this book write a review

**Making a Stand for Animals** Oscar Horta, 2022-06-23 Engaging and thought provoking this book examines how humans see and treat other animals and argues that we should extend equal consideration and respect to all beings human and nonhuman alike Our world is plighted by isms such as racism and sexism but we may have overlooked a very important one speciesism Speciesism is a form of discrimination against those who don't belong to a certain species It drives us to see nonhuman animals as objects rather than individuals with their own interests and with the ability to feel and suffer This book questions all of the assumptions speciesism is based upon It raises many challenging questions over humans very complicated attitudes toward other animals Thinking about how animals are used as well as the suffering of wild animals and what the future may be for all beings this book calls for society to seriously take into account the interests of all animals For all who care about animals or simply how to make the world a better place this book is essential reading
