Making Partnering Work In The Construction Industry Chandos Series On Construction Facilities:

People and Culture in Construction Andrew Dainty, Stuart Green, Barbara Bagilhole, 2007-05-07 Construction is one of the largest and most people intensive industrial sectors In many countries however construction is also one of the most highly criticized in terms of its employment practices and industrial relations People and culture are too often seen as variables that must be manipulated in the cause of improved productivity This important new work provides an essential corrective to the current literature by focusing on people and culture rather than sector efficiency It presents the latest thinking from a diversity of perspectives derived from a major ESRC seminar series and invited contributions from leading researchers Its interdisciplinary approach draws together industry and research and is international in its relevance Through several multidisciplinary themes People and Culture in Construction explores the industry s labour market and the major influences on employment patterns examines how to improve the image and reality of the construction sector as an employer looks at the forces shaping the industry and implications for its stability considers the current composition of the workforce and the potential impacts of workforce diversification analyzes the impact of government targets and policies on construction working practices and culture investigates how to address the skills shortfall currently affecting the industry s performance

Making Partnering Work in the Construction Industry Julian Critchlow, 1998 There is a view within the construction industry that the adversarial culture in contracting fails all in the construction process Partnering has been put forward as an alternative approach

Supply Chain Risk Clare Brindley, 2017-07-05 The impact of technological change globalization information and communication technologies and international governmental intervention has radically altered supply chain strategies operations and risk profiles for most organizations The challenge facing business and researchers alike is how best to address risk management in this new context This collection written by international scholars from the UK US and Scandinavia addresses this need by providing the first topical review of these developments and the latest research findings The findings represent a robust cross disciplinary view of supply chains articulating policies and strategies for organizations The research studies are based on empirical case studies within services and manufacturing in both large and SME organizations This work is intended to provide the foundation for future research in this expanding area and the impact it has on managing risk within the supply chain
