variety of different fields Overcoming Fragmentation in Southeast Europe Panayiotis Getimis, 2017-11-28 With the expansion of the European Union the countries of Southeast Europe have finally been brought together within one socio political entity The restructuring of these economies following globalization and neoliberalization has meant that this region has become much more open to geopolitical shifts and trends While the various countries have all entered into the slow process of European integration the historic fragmentation of this region has led to various conflicts and contradictions in the restructuring and transition of national economies This volume provides a theoretical and comparative overview which examines the prospects for spatial cohesion in this region With the need to handle persisting problems and conflicts from the past while coping with new economic and political structures Southeast Europe proves to be a challenging yet fruitful testing ground for how best to overcome fragmentation and establish a long term process of social and economic integration

Beyond Territoriality Gunther Handl, Joachim Zekoll, Peer Zumbansen, 2012-10-23 Taking extraterritoriality the traditional touchstone for the state centered allocation of transnational legal authority as its conceptual starting point the book traces the evolution of transnational legal authority in the course of globalization It examines various representative transnational legal scenarios covering issues of inter alia the environment foreign trade and investment corporate governance criminal justice cyberspace and arms control The end result is a complex yet nuanced picture of today's global governance architecture in which transnational legal authority may be exercised unilaterally or multilaterally be minimally coordinated internationally or formally institutionalized reflect a traditional state centered a supra national or privatized approach and be rooted in a single or a multiple layered normative system **Planning Cultures in Europe** Frank Othengrafen, 2016-12-05 Bringing together an interdisciplinary team from across the EU this book connects elements of cultural and planning theories to explain differences and peculiarities among EU member states A culturized planning model is introduced to consider the rules of the game how culture affects planning practices not only on an explicit surface but also on a hidden implicit level The model consists of three analytical dimensions planning artifacts planning environment and societal environment This book adopts these dimensions to compare planning cultures of different European countries This sheds light not only on the organizational or institutional structure of planning but also the influence of deeper cultural values and layers on planning and implementation processes Routledge International Handbook of Contemporary Social and Political Theory Gerard Delanty, Stephen P. Turner, 2021-09-20 The triangular relationship between the social the political and the cultural has opened up social and political theory to new challenges The social can no longer be reduced to the category of society and the political extends beyond the traditional concerns of the nature of the state and political authority This Handbook will address a range of issues that have recently emerged from the disciplines of social and political theory focusing on key themes as opposed to schools of thought or major theorists It is divided into three sections which address the most influential theoretical traditions that have emerged from the legacy of the twentieth century the most

Europe's Changing Geography Nicola Bellini, Ulrich Hilpert, 2013-08-21 European macro regions Euroregions and other forms of inter regional cross border cooperation have helped to shape new scenarios and new relational spaces which may generate opportunities for economic development while redefining the political and economic meaning of national borders This book is based on a number of key case studies which are crucial to understanding the complex web of political economic and cultural factors that shape the heterogeneous picture of Europe's new geography This book provides a fresh view on this phenomenon with a realistic approach shedding light on its complexity as well as on its ambiguities The new macro regions are interpreted with an approach recognizing the importance of institutionalization but also their flexible configuration and blurred borders The book also raises the issue of credibility and legitimacy arguing that inter regional cooperation has to be removed from the foggy realm of the exchanges between local political and bureaucratic elites in order to be clearly and concretely motivated and functional to key strategic objectives of the regions Finally the authors suggest a complementarity between relations based on proximity and wider possibly global networks where some territories and especially metropolises find opportunities based on virtual proximity Europe's Changing Geography provides a substantial re appraisal of a key phenomenon in the process of European integration today It will be of interest both to scholars of the political economy of European regionalism and to practitioners

'Whither regional studies?' Andy Pike, 2013-09-13 Regional studies are at a vibrant conjuncture Regions continue to provide a conceptual and analytical focus for often overlapping concerns with economic social political cultural and ecological change In the context of increased interest in inter and multi disciplinary approaches regions remain

an arena in which synthesis across disciplines economics geography planning politics and sociology can take place Yet recent work has raised fundamental questions about how we think about and research regions and regional change development governance and regulation First emergent conceptual ideas have introduced new thinking about space place and scale that interprets regions as unbounded relational spaces This work has disturbed notions of regions as bounded territories and questioned hierarchical systems of scale through more complex multi scalar approaches Second research methodology has grown in sophistication and sensitivity but remains somewhat polarised between the binaries of positivist often quantitative and more theoretically diverse typically qualitative approaches Last regional governance policy and politics are wrestling with the conceptual methodological and political complexities of new modes and geographies of governance and emergent multi agent and multi level institutional architectures This book brings together important voices in regional studies to contribute to and reflect upon these current issues and debates While we are at an early stage in beginning to think through what such conceptual theoretical methodological governance policy and political innovations and developments mean for regional studies the magnitude and resonance of such issues underpin the vitality of research on the region This book was published as a special issue of Regional Studies

A Planner's Encounter with Complexity Elisabete A. Silva, 2016-03-16 Spatial planning is about dealing with our everyday environment In *A Planner's Encounter with Complexity* we present various understandings of complexity and how the environment is considered accordingly One of these considerations is the environment as subject to processes of continuous change being either progressive or destructive evolving non linearly and alternating between stable and dynamic

periods If the environment that is subject to change is adaptive self organizing robust and flexible in relation to this change a process of evolution and co evolution can be expected This understanding of an evolving environment is not mainstream to every planner However in *A Planner's Encounter with Complexity* we argue that environments confronted with discontinuous non linear evolving processes might be more real than the idea that an environment is simply a planner's creation Above all we argue that recognizing the complexity of our environment offers an entirely new perspective on our world and our environment on planning theory and practice and on the raison d'être of the planners that we are *A Planner's Encounter with Complexity* is organized into 17 chapters It begins with the interplay of planning and complexity from the perspective of contemporary planning theory It continues by critically assessing planning theory and practice in the light of the interdisciplinary debate regarding complexity thinking As the book progresses it positions itself ever closer to the perspective of complexity thinking looking at the planning discipline from the outside in clarifying the facets of complexity and its importance in planning Finally conceptual and theoretical developments towards more applied examples are identified in order to see the interplay of planning and complexity in practice This book emphasizes the importance of complexity in planning clarifies many of the concepts and theories presents examples on planning and complexity and proposes new ideas and methods for planning

Borderland Phil

Hubbard, 2022-06-28 Over recent years the issues of Brexit COVID and the migrant crisis put Kent in the headlines like never before Images of asylum seekers on Kent beaches lorries queued on motorways and the crumbling white cliffs of Dover all spoke to national anxieties and were used to support ideas that severing ties with the EU was the best or worst thing the UK has ever done In this coastal driftwork Phil Hubbard an exiled man of Kent considers the past present and future of this corner of England alighting on a number of key sites which symbolise the changing relationship between the UK and its continental neighbours Moving from the geopolitics of the Channel Tunnel to the cultivation of oysters at Whitstable from Derek Jarman's feted cottage at Dungeness to the art fuelled gentrification of Margate Borderland bridges geography history and archaeology to pose important questions about the way that national identities emerge from contested local landscapes
