The Making of Europe Robert Bartlett,1993 This provocative book shows that Europe in the Middle Ages was as much a product of a process of conquest and colonization as it was later a colonizer Will be of great interest to those interested in cultural transformation colonialism racism the Crusades or holy wars in general William C Jordan Princeton University 12 halftones 12 maps 6 diagrams **The Shaping of Western Civilization** Michael Burger,2008-01-01 This book is a short interpretive and coherent overview of the history of Western civilization from antiquity to late eighteenth century Europe and America Back cover **Islam, Christianity and the Making of Czech Identity, 1453-1683** Laura Lisy-Wagner,2016-05-06 Unlike many narratives about the Czech lands which place them on the periphery of their own history this study considers Czechs as central characters looking both east and west to find their place in the early modern world Islam Christianity and the Making of Czech Identity 1453 1683 works through the descriptive and ethnographic texts produced by Czech speakers about Islam and the Ottoman Empire to show how they used this discourse to create Czech identities Rather than simply constructing identity in opposition to the Islamic Other Laura Lisy Wagner shows how these authors played the Holy Roman and Ottoman Empires off each other creating an autonomous space for themselves in between Lisy Wagner introduces sources that are new to English language historiography and uses them in a way that is new to Czech historiography as well The chapters are organized based on different categories of agents travelers ethnographers religious leaders artists and political revolutionaries whose voices cast ideas of Europe and Czech identity in the early modern period in a new and different light The Atlantic World Toyin Falola,Kevin D. Roberts,2008-04-16 This ambitious work provides an overview of the Atlantic world since the 15th century by exploring the major themes that define the study of this region Contact with Europeans in Africa and the Americas the slave trade gender and race in the early Atlantic world independence movements in Africa Caribbean nationalism and gender and identity in the 20th century are just a few subjects discussed Moving beyond the micro histories of the scholarly monograph to connect the fruits of those researches with broader events and processes this book in the editors words makes a concerted effort to re connect elites and non elites Old World and New early modern and modern and economics and culture It will be a point of embarkation for a new generation of students of the Atlantic world **Forging Alberta's Constitutional Framework** Richard Connors,John M. Law,University of Alberta. Centre for Constitutional Studies,2005-11 Forging Alberta s Constitutional Framework analyzes the principal events and processes that precipitated the emergence and formation of the law and legal culture of Alberta from the foundation of the Hudson s Bay in 1670 until the eve of the centenary of the Province in 2005 The formation of Alberta s constitution and legal institutions was by no means a simple process by which English and Canadian law was imposed upon a receptive and passive population Challenges to authority latent lawlessness interaction between indigenous and settler societies periods pre and post 1905 of jurisdictional confusion and demands for individual group and provincial

rights and recognitions are as much part of Alberta's legal history as the heroic and mythic images of an emergent and orderly Canadian west patrolled from the outset by red coated mounted police and peopled by peaceful and law abiding subjects of the Crown Papers focus on the development of criminal law in the Canadian west in the nineteenth century the Natural Resources Transfer Agreement of 1930 the National Energy Program of the 1980s Federal Provincial relations and the role and responsibilities of the offices of Justices of the Peace and of the Lieutenant Governor and the legacies of the Lougheed and Klein governments

The Growth of Royal Government Under Henry III David Crook, Louise J. Wilkinson, 2015 A survey of the complexity and sophistication of English royal government in the thirteenth century a period of radical change The years between 1258 and 1276 comprise one of the most influential periods in the Middle Ages in Britain This turbulent decade witnessed a bitter power struggle between Henry III and his barons over who should control the government of the realm Before England eventually descended into civil war a significant proportion of the baronage had attempted to transform its governance by

imposing on the crown a programme of legislative and administrative reform far more radical and wide ranging than Magna Carta in 1215 Constituting a critical stage in the development of parliament the reformist movement would remain unsurpassed in its radicalism until the upheavals of the seventeenth century Simon de Montfort the baronial champion became the first leader of a political movement to seize power and govern in the king's name The essays here draw on material available for the first time via the completion of the project to calendar all the Fine Rolls of Henry III these rolls comprise the last series of records of the English Chancery from that period to become readily available in a convenient form thereby transforming access to several important fields of research including financial legal political and social issues The volume covers topics including the evidential value of the fine rolls themselves and their wider significance for the English polity developments in legal and financial administration the roles of women and the church and the fascinating details of the development of the office of escheator Related or parallel developments in Scotland Wales and Ireland are also dealt with giving a broader British dimension LOUISE J WILKINSON is Professor of Medieval Studies University of Lincoln DAVID CROOK is Honorary Research Fellow at the University of Nottingham Contributors Nick Barratt Paul Brand David Carpenter David Crook Paul Dryburgh Beth Hartland Philippa Hoskin Charles Insley Adrian Jobson Tony Moore Alice Taylor Nicholas Vincent Scott Waugh Louise Wilkinson

Multilingualism in the Middle Ages and Early Modern Age Albrecht Classen, 2016-09-12 Bi and multilingualism are of great interest for contemporary linguists since this phenomenon deeply reflects on language acquisition language use and sociolinguistic conditions in many different circumstances all over the world Multilingualism was however certainly rather common already if not especially in the premodern world For some time now research has started to explore this issue through a number of specialized studies The present volume continues with the investigation of multilingualism through a collection of case studies focusing on important examples in medieval and early modern societies that is in linguistic and cultural contact zones such as England Spain the Holy Land but also the New World As all contributors confirm the numerous cases of multilingualism discussed here indicate strongly that the premodern period knew considerably less barriers between people of different social classes cultural background and religious orientation But we also have to acknowledge that already then human communication could fail because of linguistic hurdles which prevented mutual understanding in religious and cultural terms

Essays on Lay and Ecclesiastical Communities in and Around the Medieval Urban Parish Maria Amélia Campos, This book gives a definite contribution to a wide ranging reflection on the medieval parish and the secular clergy considered within a long term

chronological framework and a wide geographical scope that allows the analysis and confrontation of case studies from the Iberian kingdoms Northern France Italian Piedmont Lombardy Flanders Transylvania and North of the Holy Roman Empire The chapters published in this book tells of dynamics of social religious and cultural exclusion and inclusion within lay communities of the constitution of family elites and parish confraternities it shows the composition and the recruitment rationales of the parish clergy and of some ecclesiastical chapters with a duty of Cura animarum it examines the relations of the churches and parochial clergy with more prominent secular and regular ecclesiastical institutions in the context of the establishment and exercise of the right of patronage finally it explores the role of the secular clergy in the application of justice based on the characterization of their cultural and juridical formation *Medieval Frontiers: Concepts and Practices* David Abulafia, Nora Berend, 2017-03-02 In recent years the medieval frontier has been the subject of extensive research But the term has been understood in many different ways political boundaries fuzzy lines across which trade religions and ideas cross attitudes to other peoples and their customs This book draws attention to the differences between the medieval and modern understanding of frontiers questioning the traditional use of the concepts of frontier and frontier society It contributes to the understanding of physical boundaries as well as metaphorical and ideological frontiers thus providing a background to present day issues of political and cultural delimitation In a major introduction David Abulafia analyses these various ambiguous meanings of the term frontier in political cultural and religious settings The articles that follow span Europe from the Baltic to Iberia from the Canary Islands to central Europe Byzantium and the Crusader states The authors ask what was perceived as a frontier during the Middle Ages What was not seen as a frontier despite the usage in modern scholarship The articles focus on a number of themes to elucidate these two main questions One is medieval ideology This includes the analysis of medieval formulations of what frontiers should be and how rulers had a duty to defend and or extend the frontiers how frontiers were defined often in a different way in rhetorical ideological formulations than in practice and how in certain areas frontier ideologies were created The other main topic is the emergence of frontiers how medieval people created frontiers to delimit areas how they understood and described frontiers The third theme is that of encounters and a questioning of medieval attitudes to such encounters To what extent did medieval observers see a frontier between themselves and other groups and how does real interaction compare with ideological or narrative formulations of such interaction **Postcolonial Moves** P. Ingham, M. Warren, 2015-12-17 Much theoretical and historical work engaged with the question of the postcolonial is built upon an imagined unified premodern Middle Ages in Europe One of the results of this has been that in recent years scholars in medieval and early modern studies have been critically assessing the uses of postcolonial and subaltern theoretical perspectives in their fields and considering what their periods have to say to postcolonial theorists This book offers a series of original essays that explore with specificity the methodological textual cultural and historiographic moves required for postcolonial engagements with premodern times The Normans and the

'Norman Edge' Keith Stringer, Andrew Jotischky, 2019-11-26 Modern historians of the Normans have tended to treat their enterprises and achievements as a series of separate and discrete histories. Such treatments are valid and valuable but historical understanding of the Normans also depends as much on broader approaches akin to those adopted in this book. As the successor volume to *Norman Expansion: Connections, Continuities and Contrasts*, it complements and significantly extends its findings to provide a fuller appreciation of the roles played by the Normans as one of the most dynamic and transformative forces in the history of medieval Outer Europe. It includes panoramic essays that dissect the conceptual and methodological issues concerned, suggest strategies for avoiding associated pitfalls and indicate how far and in what ways the Normans and their legacies served to reshape sociopolitical landscapes across a vast geography extending from the remoter corners of the British Isles to the Mediterranean basin. Leading experts in their fields also provide case by case analyses set within and between different areas of themes such as lordship and domination, identities and identification, naming patterns, marriage policies, saints, cults, intercultural exchanges and diaspora, homeland connections. *The Normans and the Norman Edge* therefore presents a potent combination of thought provoking overviews and fresh insights derived from new research and its wide ranging comparative focus has the advantage of illuminating aspects of the Norman past that traditional regional or national histories often do not reveal so clearly. It likewise makes a major contribution to current Norman scholarship by reconsidering the links between Norman expansion and state formation, the extent to which Norman practices and priorities were distinctive, the balance between continuity and innovation, relations between the Normans and the indigenous peoples and cultures they encountered and not least forms of Norman identity and their resilience over time. An extensive bibliography is also one of this book's strengths.

Ringleaders of Redemption Kathryn Dickason, 2021 In popular thought Christianity is often figured as being opposed to dance. Throughout the medieval era the Latin Church denounced and prohibited dancing, often aligning it with demonic intervention, lust, pride and sacrilege. However *Ringleaders of Redemption* reveals how the historical sources including biblical commentaries, sermons, saints' lives, ecclesiastical statutes, mystical treatises, vernacular literature and iconography from France, Italy, Germany, England, Spain and beyond tell a different story. During the High and Late Middle Ages Western theologians, liturgists and mystics not only tolerated dance, they transformed it into a dynamic component of religious thought and practice.
