Making Of Nafta:

The Making of NAFTA Maxwell A. Cameron, 2002 How exactly do countries negotiate major international agreements Until now reliably impartial accounts of how deals are made have been rare and usually describe only one side of a multiparty process Here Maxwell Cameron and Brian Tomlin provide the first full three country account of the negotiations surrounding the controversial North American Free Trade Agreement which went into effect on January 1 1994 Through extensive interviews with participants from all sides Cameron and Tomlin develop a detailed picture of the process by which the United States Mexico and Canada pursued closer economic relations and of the political realities that influenced the politicians and policymakers in each country Written in an engaging and accessible style *The Making of NAFTA* is a faithful account built on insider views of how the representatives of the three countries prepared for negotiated and implemented the agreement Cameron and Tomlin show how NAFTA was influenced by the personalities and the multiple sometimes conflicting objectives of the individuals involved They also explore what the negotiations can reveal more generally about the making of public policy and the importance of international negotiations Publisher's description [Making the Americas](#) Thomas F. O'Brien, 2007-07-01 Americans belief in their economic political and cultural superiority launched them on a mission to transform Latin America that has evolved into a global process of Americanization From corporate and philanthropic initiatives to military interventions Americans motivated by self interest and idealism sought to reshape Latin America and gave birth to the American driven process of globalization Synthesizing a broad range of international relations scholarship including perspectives from gender race and cultural studies O'Brien offers a sweeping history of the Americas that ranges from the adventures of eighteenth century whaling men to the contemporary struggle over globalization As a part of this study the author explains how the responses of Latin Americans to Americanization have varied from the vehement rejection of U.S. economic dominance to embracing as well as reconfiguring the icons of American consumer culture O'Brien's goal is to provide readers with a nuanced understanding of how the people of the Americas have shaped their own history and influenced the development of U.S. economic strategic and cultural power in the world today **Innovation Systems in a Global Context** Robert Anderson, 1998 Leading scholars in the area of evolutionary economics clarify the structure of innovation systems and discuss the role played by technological innovation in fostering economic growth and international integration Focusing on North America they examine ecological economic and social problems confronting large scale systems and look at trends towards creation of supra national systems in Asia Europe and North America Material was first presented at a 1994 meeting held in Whistler British Columbia Canada No index Annotation copyrighted by Book News Inc Portland OR **Environmental Aspects of the North American Free Trade Agreement** United States. The Global Class War Jeff Faux, 2010-12-29 Acclaim for The Global Class War You will never think about free trade the same way after reading Jeff Faux s superb book As Faux makes clear the globalization debate is really about whose interests are served by global elites and how we need to go about reclaiming a democracy that serves ordinary people This book should transform public discourse in America Robert Kuttner founding coeditor of the American Prospect and a contributing columnist to BusinessWeek Jeff Faux s astonishing story of how class works will scandalize the best names in Wall Street and Washington especially the much admired Robert Rubin who along with other elites colluded behind the backs of ordinary citizens in Mexico Canada and the United States The most cynical Americans will be shocked by the sordid details This really is an important book William Greider author of The Soul of Capitalism and Secrets of the Temple Globalization is a cover for American imperialism but the beneficiaries are not the American people at the expense of foreigners but corporate executives at the expense of working class and poor people wherever they may be Jeff Faux offers a comprehensive and devastating analysis Chalmers Johnson author of The Sorrows of Empire

International Economics: Global Markets And Competition (2nd Edition) Henry Thompson, 2006-04-06 This text integrates the microeconomics of trade with concepts from open economy macroeconomics The emphasis is on the powerful forces of international competition and the limitations of government policy Economics began with a political debate over tariffs and the politics continue Domestic industries lobby for protection against foreign competitors and for export subsidies Government policy makers favor their pet industries in return for lobby money and votes Meanwhile other industries lobby

for free trade Governments worldwide tentatively negotiate free trade agreements while international financial markets determine the effectiveness of their fiscal and monetary policies Wages capital returns and national income rise and fall with international commerce The text covers these issues of international trade and finance The trade theory is based on partial equilibrium market analysis constant cost and neoclassical general equilibrium the factor proportions model and various theories of industrial organization The text fully integrates concepts from international finance and a new chapter for the 2nd edition develops the basic models of open economy macroeconomics The presentation is centered on graphs that use realistic numerical examples making the theory easier for students to grasp especially when combined with general algebraic and graphic presentations in the classroom The text does not assume previous courses in intermediate theory or calculus but the theory is completely developed Numerous exercises that can be presented by students give them confidence in using the theoretical models and concepts Over 250 boxed examples illustrate the theory many with visually descriptive charts and plots making the text excellent for MBA courses The text is concise in its presentation style Students enjoy its clear straightforward style and instructors notice the difference on exams
