Margins Of Reality The Role Of Consciousness In The Physical World:

Margins of Reality Robert G. Jahn, Brenda J. Dunne, 2009-04 WHAT HAS MODERN SCIENCE SWEEPED UNDER THE RUG This pioneering work which sparked intense controversy when it was first published two decades ago suggests that modern science in the name of rigor and objectivity has arbitrarily excluded the role of consciousness in the establishment of physical reality Drawing on the results of their first decade of empirical experimentation and theoretical modeling in their Princeton Engineering Anomalies Research PEAR program the authors reach provocative conclusions about the interaction of human consciousness with physical devices information gathering processes and technological systems The scientific personal and social implications of this revolutionary work are staggering MARGINS OF REALITY is nothing less than a fundamental reevaluation of how the world really works

Consciousness and the Source of Reality Robert G. Jahn, Brenda J. Dunne, 2011 When Robert G Jahn and Brenda J Dunne first embarked on their exotic scholarly journey more than three decades ago their aspirations were little higher than to attempt replication of some previously asserted anomalous results that might conceivably impact future engineering practice either negatively or positively and to pursue those ramifications to some appropriate extent But as they followed that tortuous research path deeper into its metaphysical forest it became clear that far more fundamental epistemological issues were at stake and far stranger phenomenological creatures were on the prowl than they had originally envisaged and that a substantially broader range of intellectual and cultural perspectives would be required to pursue that trek productively This text is their attempt to record some of the tactics developed experiences encountered and understanding acquired on this mist shrouded exploration in the hope that their preservation in this format will encourage and enable deeper future scholarly penetrations into the ultimate Source of Reality

The Nature of Consciousness, the Structure of Reality Jerry Davidson Wheatley, 2001 This book describes how understanding the structure of reality leads to the Theory of Everything Equation The equation unifies the forces of nature and enables the merging of relativity with quantum theory The book explains the big bang theory and everything else

What is the New Age? William P. Frost, 1992 This study offers information about the claims and beliefs of the New Age as well as background to the physical biological neurophysiological cultural anthropological psychological and quantum theoretical facts that are part of discussions of this form of holistic spirituality

The Parapsychology Revolution Robert M. Schoch, Logan Yonavjak, 2008-01-31 Grounded in both scientific acumen and constructive inquiry this anthology shines a rare clarifying light on the controversial realms of psychical and paranormal research surveying reports essays and arguments from more than a century of investigation into matters such as clairvoyance telepathy and past life regression In the past one hundred and twenty five years despite a relative paucity of funding and the troubling persistence of fraud serious inquiry into the paranormal particularly as it relates to clairvoyance and psychical perception has successfully entered the scientific age Studies in the modern laboratory employing rigorous methodology and peer reviewed oversight have conclusively detected

statistical anomalies that suggest the presence of some not yet understood faculty of the human mind In *The Parapsychology Revolution* Robert M Schoch Ph D a scholar widely known for his geological theories that question the conventional dating of the Great Sphinx and researcher Logan Yonavjak introduce and anthologize core writings that underscore the range and continuing challenges of psychical research The book s extensive introduction and the editors commentary on individual essays and sections highlight milestones feuds and key players that mark the nascent history of this fascinating and important field of research Finally *The Parapsychology Revolution* addresses and clarifies the all important question Is there legitimate evidence for a world beyond the ordinary *Gothic Metaphysics* Jodey Castricano, 2021-11-15 We live in the time of the Anthropocene which calls for a paradigm shift in our relation to this planet One of the themes of this book is to call attention to the shift This book is a challenge to Literary Gothic and Cultural Studies The case for rethinking approaches to gothic fiction is built on an extended critique of Freudian assumptions and antinomies of the occult associated with mechanism materialism and classical physics a critique informed by Jung and an engaging re evaluation of mystical animist and alchemical modes of thought linked to quantum physics new materialism along with curiously but effectively Derridean deconstruction and cryptonymy Readers will benefit from the depth and breadth of the research in this book that draws upon philosophical anthropological psychoanalytic and scientific thought to engage with a literary genre in a way that changes how we think about Gothic Studies *The Nature of Order, Book Four: The Luminous Ground* Christopher Alexander, 2020-03-30 Christopher Alexander s series of ground breaking books including *A Pattern Language* and *The Timeless Way of Building* have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns Now in *The Nature of Order* Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities The foundations of modern scientific thought are firmly rooted in a conception that the universe is a machinelike entity a play of baubles machines trinkets To this day our real daily experience of ourselves has no clear place in science It is little wonder that a machine like worldview has supported the deadly architecture of the last century This mechanistic thinking and the consequent investment oriented tracts of houses condominiums and offices have dehumanized our cities and our lives How are spirit soul emotion feeling to be introduced into a building or a street or a development project in modern times *The Luminous Ground* the fourth book of *The Nature of Order* contains what is perhaps the deepest revelation in the four volume work Here is a geometrical view of space and matter seamlessly connected to our own private personal experience as sentient and knowing creatures This is not merely an emotional appendix to the scientific theory of the other books It is at the core of the entire work and is rooted in the fact that our two sides our analytical thinking selves and our vulnerable emotional personalities as human beings are coterminous They must be harnessed at one and the same time if we are ever to really make sense of what is around us and be able to create a living world Alexander breaks

away completely from the one sided mechanical model of buildings or neighbourhoods as mere assemblages of technically generated interchangeable parts He shows us conclusively that a spiritual emotional and personal basis must underlie every act of building His buildings and works of art demonstrate in detail what he means And then in the middle of the book comes the linchpin of the work a one hundred page chapter on colour which lavishly illustrates and dramatically conveys the way that consciousness and spirit can make their appearance in the world Altogether present throughout this fourth and final book is a new cosmology uniting matter and consciousness consciousness inextricably joined to the substrate of matter present in all matter and providing all wholeness with its material cognitive and spiritual underpinnings This view though radical conforms to our most ordinary daily intuitions It may provide a path for those contemporary scientists who are beginning to see consciousness as the underpinning of all matter and thus as a proper object of scientific study Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united The Nature of Order constitutes the backbone of Building Beauty Ecologic Design Construction Process an initiative aimed at radically reforming architecture education with the emphasis of making as a way to access a transformative vision of the world The 15 fundamental properties of life guide our work and have given us much more than a set of solutions The Nature of Order has given us the framework in which we can search and build up our own solutions In order to be authentically sustainable buildings and places have to be cared for and loved over generations Beautiful buildings and places are more likely to be loved and they become more beautiful and loved through the attention given to them over time Beauty is therefore not a luxury or an option it includes and transcends technological innovation and is a necessary requirement for a truly sustainable culture

Molecular Memories Robert G. Jahn and Brenda J. Dunne, 2016-03-11 In 1979 Bob Jahn and Brenda Dunne two individuals with vastly different backgrounds experiences and styles and who had little in common beyond a shared vision joined forces to create the unique scholarly enterprise that became the PEAR laboratory at Princeton University's Engineering School Over the next 28 years their molecular bond with its associated complementarity provided the foundation for a remarkable personal friendship and creative professional partnership Just as it is only in the interaction of the constituent atoms in a physical molecule that the characteristics of the unified system become apparent this book attempts to capture the magic and the humor of that dynamic bond through an assortment of vignettes that illustrate their shared voyage of discovery

The Handbook of Humanistic Psychology Kirk J. Schneider, James F. T. Bugental, J. Fraser Pierson, 2001 A cornucopia of valuable historical theoretical and practical information for the humanistic psychologist Irvin Yalom Emeritus Professor of Psychiatry Stanford University The editors represent both the founding generation and contemporary leadership

and the contributors they have enlisted include most of the active voices in the humanistic movement I know of no better source for either insiders or outsiders to grasp what humanistic psychology is about and what either insiders or outsiders should do about it M Brewster Smith University of California at Santa Cruz As a humanist it offered me a breadth I had not known existed as a researcher it offered me an excellent statement of in depth research procedures to get closer to human experience as a practitioner it offered me inspiration For all those who work with and explore human experience you can not afford to miss the voice of the third force so excellently conveyed in this comprehensive coverage of its unique view of human possibility and how to harness it Leslie S Greenberg York University Inspired by James F T Bugental s classic Challenges of Humanistic Psychology 1967 The Handbook of Humanistic Psychology represents the latest scholarship in the resurgent field of humanistic psychology and psychotherapy Set against trends toward psychological standardization and medicalization the Handbook provides a rich tapestry of reflection by the leading person centered scholars of our time Their range of topics is far reaching from the historical theoretical and methodological to the spiritual psychotherapeutic and multicultural Psychology is poised for a renaissance and this Handbook will play a critical role in that transformation As increasing numbers of students and professionals rebel against mechanizing trends they are looking for the fuller deeper and more personal psychological orientation that this Handbook promotes

Future Memory P.M.H. Atwater,2025-09-12 There are many different paths to the future According to P M H Atwater one of the foremost investigators into near death experiences future memory allows people to live life in advance and remember the experience in detail when something triggers that memory Atwater explains the unifying and permanent effect of that experience is a brain a brain shift which she believes may be at the very core of existence itself In *Future Memory* Atwater shows that structural and chemical changes are occurring in our brains changes indicative of higher evolutionary development This mind blowing exploration of a mind blowing topic traces her findings about this phenomenon and explores its implications for the individual and for society *Future Memory* Provides a series of steps to assist in developing future memory Explores new models of time existence and consciousness Presents an in depth study of the brain shift and how it can be experienced Offers an extensive appendix and resource manual *Future Memory* is an important step in understanding the relationship between human perception and reality

Healing Beyond the Body Larry Dossey,2003-02-11 Does the mind produce consciousness or transmit it Can machines detect love Why has job stress become a worldwide epidemic Why do objects sometimes seem to have minds of their own Could war be a biological condition Dr Larry Dossey one of the most influential spokespersons for the role of consciousness and spirituality in medicine tackles all these questions and more with clarity and wit In this book he explores the relationship often documented in extensive research between science and unscientific topics such as prayer love laughter war creativity dreams and immortality

Advances in Parapsychological Research 10 Stanley Krippner, Adam J. Rock, Harris L. Friedman, 2021-02-23 This book consists of a collection of essays informing readers as to the contemporary status of selected cutting edge issues in parapsychology or psi research Each chapter comprehensively reviews a controversial topic from a critical stance and updates its status based on the latest theoretical and empirical considerations Chapter authors are authoritative experts in their fields who have captured the complexity and importance of their topics This is a resource for both the serious scholar and interested follower of psi research containing in depth analyses and discussions of topics that cannot be found elsewhere Topics include cross examinations of psychical investigations a meta analysis of anomalous information collected by mediums an examination of the relationships between parapsychology quantum theory and neuroscience and a study of psychics involvement in police investigations

Partners in Pleasure Paul Pearsall, Ph.D., 2001-03-27 Paul Pearsall s research shows that individual success and the solitary pursuit of happiness may be hazardous to one s health Although many self help books champion the singular approach to success and personal power as the path to well being Partners in Pleasure challenges this singularity by presenting new research and ancient cultural lessons regarding collective and connective ways to fulfillment and wellness Drawing in part on 2 000 year old Polynesian wisdom this book shows how to go beyond self fulfillment to shared pleasure

Remapping Reality John Aloysius McCarthy, 2006 This book is about intersections among science philosophy and literature It bridges the gap between the traditional cultures of science and the humanities by constituting an area of interaction that some have called a third culture By asking questions about three disciplines rather than about just two as is customary in research this inquiry breaks new ground and resists easy categorization It seeks to answer the following questions What impact has the remapping of reality in scientific terms since the Copernican Revolution through thermodynamics relativity theory and quantum mechanics had on the way writers and thinkers conceptualized the place of human culture within the total economy of existence What

influence on the other hand have writers and philosophers had on the doing of science and on scientific paradigms of the world Thirdly where does humankind fit into the total picture with its uniquely moral nature In other words rather than privileging one discipline over another this study seeks to uncover a common ground for science ethics and literary creativity Throughout this inquiry certain nodal points emerge to bond the argument cogently together and create new meaning These anchor points are the notion of movement inherent in all forms of existence the changing concepts of evil in the altered spaces of reality and the creative impulse critical to the literary work of art as well as to the expanding universe This ambitious undertaking is unified through its use of phenomena typical of chaos and complexity theory as so many leitmotifs While they first emerged to explain natural phenomena at the quantum and cosmic levels chaos and complexity are equally apt for explaining moral and aesthetic events Hence the title Remapping Reality extends to the reconfigurations of the three main spheres of human interaction the physical the ethical and the aesthetic or creative

The Hidden Power of Emotions Melanie Dean, Ph.D.,2020-11-17 Most of us focus on thinking positively to create what we really want in life But science shows it s actually our feelings that matter most In her relatable and engaging way psychologist and researcher Melanie Dean Ph D explains not just what to do to shift your emotions and focus your energy to attract the people things and opportunities you want most in life but how and why it works Once you understand that your feelings and emotions are real energy waves that go out into the world and connect with or repel others you can start to notice and shift your emotions and intentionally direct your energy so you are sending out the waves that will connect with what you really want By reading The Hidden Power of Emotions you will discover There is a whole world of energy at work in around and through you Your emotions which are more powerful than your thoughts create energy waves that leave your body connecting with similar energy Your emotions are the way in which you receive communication back from the shared energy field How to purposefully direct your emotions to connect you with what you want to receive Throughout the book Dean highlights the science behind your power as well as specific tips and strategies to help you apply it in your everyday life including a Power Zapper section of common struggles that weaken your power and a Power Booster section of recommendations for increasing your personal power

Parallelism, Learning, Evolution J.D. Becker,I. Eisele,F.W. Mündemann,1991-12-04 This volume presents the proceedings of a workshop on evolutionary models and strategies and another workshop on parallel processing logic organization and technology both held in Germany in 1989 In the search for new concepts relevant for parallel and distributed processing the workshop on parallel processing included papers on aspects of space and time representations of systems non Boolean logics metrics dynamics and structure and superposition and uncertainties The point was stressed that distributed representations of information may share features with quantum physics such as the superposition principle and the uncertainty relations Much of the volume contains material on general parallel processing machines neural networks and system theoretic aspects The material on evolutionary strategies is included because these strategies will yield important and

powerful applications for parallel processing machines and open the way to new problem classes to be treated by computers

The Reality of ESP Russell Targ, 2012-12-19 On February 4 1974 members of the Symbionese Liberation Army kidnapped nineteen year old newspaper heiress Patricia Hearst from her Berkeley California apartment Desperate to find her the police called physicist Russell Targ and Pat Price a psychic retired police commissioner As Price turned the pages of the police mug book filled with hundreds of photos suddenly he pointed to one of them and announced That s the ringleader The man was Donald DeFreeze who was indeed subsequently so identified Price also described the type and location of the kidnap car enabling the police to find it within minutes That remarkable event is one reason Targ believes in ESP Another occurred when his group made 120 000 by forecasting for nine weeks in a row the changes in the silver commodity futures market As a scientist Targ demands proof His experience is based on two decades of investigations at the Stanford Research Institute SRI which he cofounded with physicist Harold Puthoff in 1972 This twenty million dollar program launched during the Cold War was supported by the CIA NASA the Defense Intelligence Agency and Army and Air Force Intelligence The experiments they conducted routinely presented results could have happened by chance less than once in a million Targ describes four types of experiments Remote Viewing in which a person describes places and events independent of space and time For example while in California Price drew to scale a Soviet weapons factory at Semipalatinsk with great accuracy later confirmed by Satellite photography In another remote viewing Targ accurately sketched an airport in San Andreas Columbia himself Distant Mental Influence where the thoughts of the experimenter can positively or negatively affect the physiology heart rate skin resistance etc of a distant person Whole field isolation where someone in a state of sensory isolation accurately describes the visual experiences of someone else in another place Precognition and retrocausality showing that the future can affect the past That is the elephant you see on television in the morning can be the cause of your having dreamed about elephants the previous night Final chapters present evidence for survival after death explain how ESP works based on the Buddhist Hindu view of our selves as nonlocal eternal awareness discuss the ethics of exercising psychic abilities and show us how to explore ESP ourselves I am convinced Targ says that most people can learn to move from their ordinary mind to one not obstructed by conventional barriers of space and time Who would not want to try that

The Science of Near-Death Experiences John C. Hagan, 2017-01-30 What happens to consciousness during the act of dying The most compelling answers come from people who almost die and later recall events that occurred while lifesaving resuscitation emergency care or surgery was performed These events are now called near death experiences NDEs As medical and surgical skills improve innovative procedures can bring back patients who have traveled farther on the path to death than at any other time in history Physicians and healthcare professionals must learn how to appropriately treat patients who report an NDE It is estimated that more than 10 million people in the United States have experienced an NDE Hagan and the contributors to this volume engage in evidence based research on near death experiences and include physicians who themselves have

undergone a near death experience This book establishes a new paradigm for NDEs *Basic Research in Parapsychology*,
2d ed. K. Ramakrishna Rao, 2016-03-15 This expanded and revised text includes thirteen experimental reports five new to this
edition and seven review articles involving meta analysis and the assessment of evidence in specific areas of psi research The
author provides a representative sample of the extensive literature in the controversial field of parapsychology and presents
a few basic experiments illustrating various procedures and broadly reflecting the major trends of psi research Possible
experimental procedures cumulative evidence showing the replicability of individual experiments and promising areas of psi
research are also discussed Instructors considering this book for use in a course may request an examination copy here
