Butcher,2004 This book is a history of the marine fisheries of Southeast Asia It takes as its central theme the movement of fisheries into new fishing grounds particularly the diverse ecosystems that make up the seas of Southeast Asia This process accelerated between the 1950s and 1970s in what the author calls the great fish race **Southeast Asia and the Law of the Sea** Yong Leng Lee,1980 **Southeast Asian Seas** Lin Sien Chia,Colin MacAndrews,1981 *Memory and Knowledge of the Sea in Southeast Asia* Danny Tze-Ken Wong,2008 In the Southeast Asian region various communities have been closely associated with the sea Many have over the years acquired special memory and sometimes intimate knowledge of the sea Even as much of this information and knowledge was passed from generation to generation it provided maritime communities with a sense of identity and social cohesiveness as well as a sense of belonging It was in this light that the papers in this volume set out to investigate the human association with the sea in Southeast Asia through the interrogation of memory and knowledge preserved through various genres including oral tradition travellers tales and diaries official accounts as well as rituals **Physical Oceanography of the Southeast Asian Waters** Klaus Wyrтки,1961 **Closing of the Frontier** John G Butcher,2003-08-01 This book is the first on the history of the marine fisheries of Southeast Asia It takes as its central theme the movement of fisheries into new fishing grounds particularly the diverse ecosystems that make up the seas of Southeast Asia This process accelerated between the 1950s and 1970s in what the author calls e the great fish racee Catches soared as the population of the region grew demand from Japan and North America for shrimps and tuna increased and fishers adopted more efficient ways of locating catching and preserving fish But the great fish race soon brought about the severe depletion of one fish population after another while pollution and the destruction of mangroves and coral reefs degraded fish habitats Today the relentless movement into new fishing grounds has come to an end for there are no new fishing grounds to exploit
