William Shatner

Nukes In Space The Rainbow Bombs

C. Edward Wall

Nukes In Space The Rainbow Bombs:

Burning the Sky Mark Wolverton, 2018-11-27 The unbelievable true story of an American Cold War scheme to detonate nuclear bombs in space is revealed in this military history exposé. The summer of 1958 was a nerve racking time. The Soviet Union's launch of Sputnik drew America into a game of nuclear one upmanship. Tensions escalated between the two superpowers over their respective nuclear weapons reserves both sides desperate for a solution to the imminent threat of massive destruction. In America an outlandish yet ingenious idea was raised by the eccentric physicist Nicholas Christofilos launching atomic bombs into outer space to fry incoming Soviet ICBMs with an artificial radiation belt. Known as Project Argus this secret plan was the riskiest scientific experiment in history. In *Burning the Sky* Mark Wolverton draws on recently declassified sources to tell this incredible unknown story. *Burning the Sky* chronicles Christofilos's unconventional idea from its inception to execution when the so called mad scientist persuaded the military to use the entire Earth's atmosphere as a laboratory. A meticulously researched tale that reads like a sci fi thriller *Burning the Sky* will intrigue any lover of scientific or military history.

Nuclear Weapons and Nonproliferation Sarah J. Diehl, James Clay Moltz, 2007-08-09 An updated edition of ABC-CLIO's classic reference book on nuclear arms programs and proliferation in nations around the world. Fully updated and revised since its initial publication *Nuclear Weapons and Nonproliferation Second Edition* explores all key issues related to the proliferation of nuclear weapons and efforts to curb them from the U.S. atomic bomb project during World War II to current debates on nuclear terrorism, North Korea's nuclear test and Iran's enrichment program. *Nuclear Weapons and Nonproliferation Second Edition* clarifies weapons related policy debates from both U.S. and international perspectives offering a detailed look at current technologies, arsenals, weapons tests and nonproliferation efforts. Readers will find expert analysis of such crucial recent events as Libya's disarmament, the failed WMD search in Iraq, A.Q. Khan's nuclear technology, black market dirty bombs, developments in North Korea and Iran and the U.S. plan to aid India's nuclear program plus recent progress or lack thereof on a range of treaties and initiatives.

100 Suns Michael Light, 2013-04-03 Between July 1945 and November 1962 the United States is known to have conducted 216 atmospheric and underwater nuclear tests. After the Limited Test Ban Treaty between the United States and the Soviet Union in 1963 nuclear testing went underground. It became literally invisible but more frequent. The United States conducted a further 723 underground tests the last in 1992. *100 Suns* documents the era of visible nuclear testing, the atmospheric era with one hundred photographs drawn by Michael Light from the archives at Los Alamos National Laboratory and the U.S. National Archives in Maryland. It includes previously classified material from the clandestine Lookout Mountain Air Force Station based in Hollywood whose film directors, cameramen and still photographers were sworn to secrecy. The title *100 Suns* refers to the response by J. Robert Oppenheimer to the world's first nuclear explosion in New Mexico when he quoted a passage from the Bhagavad Gita, the classic Vedic text. If the radiance of a thousand suns were to burst forth at once in the sky that would be like the splendor of

the Mighty One I am become Death the destroyer of worlds This was Oppenheimer s attempt to describe the otherwise indescribable 100 Suns likewise confronts the indescribable by presenting without embellishment the stark evidence of the tests at the moment of detonation Since the tests were conducted either in Nevada or the Pacific the book is simply divided between the desert and the ocean Each photograph is presented with the name of the test its explosive yield in kilotons or megatons the date and the location The enormity of the events recorded is contrasted with the understated neutrality of bare data Interspersed within the sequence of explosions are pictures of the awestruck witnesses The evidence of these photographs is terrifying in its implication while at same time profoundly disconcerting as a spectacle The visual grandeur of such imagery is balanced by the chilling facts provided at the end of the book in the detailed captions a chronology of the development of nuclear weaponry and an extensive bibliography A dramatic sequel to Michael Light s Full Moon 100 Suns forms an unprecedented historical document

Art After the Bomb Darrell D. Davisson,2008 This book is requisite reading material for any person claiming to be an educated and informed member of the global community Our understanding in the West of the Eastern cultures specially the different cultures involving the Muslims is alarmingly low The book strives to offer a view from the ground a keyhole perspective that offers the readers a close and personal peek into some of the ethical underpinnings and the philosophical guiding parameters that inform the Muslim and the Eastern mind There are over 1 3 billion Muslims in the world It would be a serious intellectual fallacy to assume that they are all homogenous or to be more preposterous assume they are all terrorists It is extremely tragic that it took the Iranian hostage crisis to teach us about Shia Islam and 9 11 to teach us about Wahabi Islam Properly acquired knowledge not just what we learn from the media will allow us to be anticipatory and rational rather than being reactive and emotional For the Muslim reader specially the children and the youth the book strives to offer a deeper understanding of Islam beyond the boundaries of ritual Islam into the wide open space of spiritual and intellectual Islam To inspire them to appreciate and live up to the wonderful legacy of Islam and not to be mired down into some deviant interpretations of people with questionable motives The book is designed to encourage the process of tearing down walls and building bridges We share common dreams aspirations and challenges We share a common globe and a common destiny The author believes that there are no clashes of civilizations just clashes of ignorance and misunderstanding
