Numbers 21-36 Baruch A. Levine, 2000 *Numbers 21-36*, 2021 The Book of Numbers is an account of how the Israelites wandered in the wilderness after receiving the Ten Commandments of Mount Sinai Through this time of testing while facing an uncertain future the people complained repeatedly to Moses and to God Though fraught with tension and power struggles their pilgrimage led to the discovery that God is indeed faithful to His promises regardless of how people behave In Numbers 21 36 world renowned Bible scholar Baruch A Levine unravels the complexity and confusing details in this Old Testament book His lucid translation based on thorough textual and linguistic research including the ancient Deir Alla texts opens the door for modern readers to understand and appreciate the richness of this intriguing book Further Levine examines the route of the wilderness wanderings the ancient Near Eastern context of the laws the social organization of early Israel and the meaning of this biblical book for the contemporary world Destined to become a classic and to share the same glowing reception that greeted Numbers 1 20 and its publication Numbers 21 36 also completes the Anchor Bible series first multivolume commentary on a book of the Torah

Item Interpretation of the Luria-Nebraska Neuropsychological Battery, 1982-01-01 The Luria Nebraska Neuropsychological Battery is a relatively new neurodiagnostic test and there is a growing demand for material on the more advanced aspects of its interpretation This book organized around the theoretical meaning of items the empirical correlations between items and the factor structure of the individual scales is a first response to that demand It will serve to give greater understanding of the psychological skills that underlie each item on the Luria Nebraska battery an understanding prerequisite to the techniques of syndrome analysis described in the writings of A R Luria and it will be particularly useful to those who have limited experience with actual case material The major part of the book is an analysis of each Luria Nebraska scale either item by item or as a unit For each scale the authors examine the theoretical intent of the items and the underlying skills according to Luria's theory They then present the results of item interrelations analysis to determine whether the items tap common skills Finally they describe the factor structure of the various scales exploring the interrelations of items within each scale In addition to analyzing the behavioral scales of the Luria Nebraska battery the book reviews a number of other empirical scales that further aid interpretation particularly the experimental localization scales that tap focal deficits in specific areas of the brain Also included are case histories that illustrate the process of diagnosis in patients who receive a series of Luria Nebraska batteries over the course of their treatment Finally the authors briefly discuss subcortical disorders an issue often ignored in clinical neuropsychological testing
