Nursing Ethics Therapeutic Caring Presence:

Nursing Ethics Bishop, Anne H. Bishop, John R. Scudder, Anne H. Bishop John R. Scudder, 1996 The author argues that because the profession of nursing consists of practical ways of fostering the well being of persons ethical considerations must arise out of the unique nature of this work This book focuses on the moral sense of nursing by developing nursing ethics as it is rooted in everyday practice rather than the application of philosophical ethics This implies a therapeutic ethic that is founded in caring two of the four primary themes of the book deal with the concept of caring In addition this book argues that such a nursing ethic has an evocative or inspirational side the decision to become a nurse implies a call to caring The interpretative nature of this brief text advances our understanding of both nursing and ethics *Nursing Ethics* Anne H. Bishop, John R. Scudder, 2001 *Nursing Ethics Holistic Caring Practice* explores the moral practice of nursing asserting that there is an inherent moral sense in nursing practice itself This new edition of the book requires one to reconsider what it means to be a nurse Rather than someone who merely applies ethical thinking and ethical models of decision making in nursing practice the nurse is a moral being who is engaged in a moral practice **Essentials of Teaching and Learning in Nursing Ethics** Anne Davis, Verena Tschudin, Louise Tew, 2006-02-24 This title is directed primarily towards health care professionals outside of the United States This book aims to fill a gap with an in depth exploration of nursing ethics content from the western philosophical tradition and some of the methods used in teaching this content It addresses cross cultural issues in using specific ethics content It also reveals the poverty of the present dualism model in nursing ethics and replace this with a more complex and more useful model that invites debate Its scope is both wide and deep but that is needed to enrich the basis for teaching nursing ethics Outlines and critiques all current ethical theories and considers their application to nursing practice Explores ethical issues in numerous cultures Includes case studies drawn from a range of countries Written by leading nurse educators and philosophers in the field *Compassion Fatigue and Burnout in Nursing, Second Edition* Vidette Todaro-Franceschi, 2019-03-18 Dr Todaro Franceschi calls us to look with open eyes open hearts and open minds at the good the bad the ugly and the ugliest in health care so that together we can cultivate a healthcare world in which compassion prevails and our shared humanity is embraced It is up to all of us to hold and safeguard each other in this sacred work Dr Todaro Franceschi helps us in this mission through this extraordinary book Mary Koloroutis RN MSN CEO Creative Health Care Management Minneapolis Minnesota Co Creator of the Relationship Based Care Model In this second edition of her seminal text Dr Todaro Franceschi offers new insights on professional quality of life incorporating current practice research literature and examples to show how contentment and happiness of the nursing workforce is related to quality of care The book provides practical strategies for dealing with a myriad of issues including compassion fatigue burnout moral distress caring for the dying PTSD and workplace violence This resource will help empower nurses so they can create a more compassionate work environment Written by an acknowledged expert in end of life education professional
