Nurses, nurse practitioners, nursing students. *Nursing Ethics Through the Life Span* Elsie L. Bandman, Bertram Bandman, 2002 Exploring both traditional and contemporary ethical theories the fourth edition of *Nursing Ethics through the Life Span* outlines and applies philosophical guidelines that will assist any nurse in making ethically sound choices. Appropriate either as a guide for nursing students or as a reference for practicing nurses, Bandman and Bandman give readers a thorough sound basis for understanding why the application of ethical principles is important in health care. Included are Clinical case studies within each chapter to illustrate day to day ethical situations. Extensive coverage of current healthcare topics that have ethical ramifications such as euthanasia, assisted suicide, HIV/AIDS, organ transplantation and experimental medical treatments. What If questions throughout the text to encourage critical thinking. Special ethics chapters that feature Developmental Highlights, Issues and Problems, and Morally Reasoned Nursing Interventions. *Ethics in Health Care* Silvia Angelina Pera, Susara Van Tonder, 2005 Dealing primarily with nursing in South Africa and the particular challenges that the country's nurses encounter, this book looks at the ethical questions confronting nurses as well as the moral philosophy behind those considerations. Ubuntu, the African notion that everyone in a community is responsible for the welfare of its members, plays a large part in the moral deliberations of the book, as do problems particular to South Africa. This second edition is updated with new case studies on the AIDS pandemic as well as new ethical questions stemming from the legalization of abortion in South Africa and the rise in the power of health worker unions.
