Developmental Miracle Alvin Y. So, 2016-07-08 In contrast to the failure to economic reforms in Eastern Europe China's economic reforms have been quite successful Decollectivization marketization state enterprise reforms and reintegration into the world economy have led to very rapid economic development in China over the past two decades These economic reforms in turn triggered profound social and political changes This collection examines the origins nature and impact as well as the future prospects of these reforms and changes The contributors are all active researchers from a variety of disciplines

including economics sociology political science and geography **Smokeless Sugar** Emily M. Hill, 2010-10-20 Part history part biography and part mystery story Smokeless Sugar reveals how the concept of a national economy took shape in China by investigating the 1936 execution of Feng Rui a provincial official who introduced modern sugar milling in Guangdong Examining the circumstances of Feng Rui's arrest on charges of corruption Emily Hill traces the construction of a Chinese national economy through cross border interactions between industry and agriculture and between China and Japan She makes the case that Feng was in fact a scapegoat in a multi sided power struggle in which political leaders vied with commercial players for access to China's markets and tax revenues This illuminating study challenges conventional wisdom about the effectiveness of the Republican state in promoting national unity during the Nanjing decade and highlights continuities in official economic policies from the 1930s to the Communist era **Beyond Beijing** Dali L. This book offers a balanced assessment of the dynamics and consequences of the decentralization of power and resources in post Mao China The author argues that decentralization has increased tensions amongst ethnic groups and unleashed much competition and emulation among local governments This book is an authoritative study of an issue that will remain highly visible on China's political agenda for the foreseeable future Traditional and Modern Approaches to the Environment on the Pacific Rim

Harold Coward, 1998-07-23 An interdisciplinary exploration of the tension between traditional and modern approaches to the environment in Pacific Rim countries *The Hong Kong-Guangdong Link* Reginald Yin-Wang Kwok, Alvin Y. So, 2020-11-25 This text focuses on the relationship of Hong Kong with the adjacent Chinese province Guangdong the territories most directly involved in the 1997 transfer of Hong Kong to Chinese rule The socio economic political and cultural impact of this crucial link and the implications for the future of both Hong Kong and China are studied A multi disciplinary approach is taken to examine the complexity of economic political and cultural transformation of the Hong Kong Guangdong link and this book presents a historical perspective to trace the long term structural transformation The dynamics of the

integration process between the two territories is also explored Rural China Takes Off Jean C. Oi, 1999-05-17 A distinctive and important contribution Thomas P Bernstein author of *Up to the Mountains and Down to the Villages* **The Myth of Neighbourhood Mutual Help** Cecilia L. W. Chan, 1993-01-01 This book describes the traditional Chinese neighbourhood structures at different historical periods and discovered that the neighbourhood structures were tightly knitted more for the purpose of control than for welfare protection of the people The transformation into the socialist system has revitalized the neighbourhood network since 1949 **Chinese Transnational Networks** Chee-Beng Tan, 2006-10-19 The Chinese overseas have long been relevant to China especially to qiaoxiang and vice versa Qiaoxiang refers to regions from where emigrants migrated overseas where there are therefore ties with Chinese communities overseas Unlike most other works which cover either China or the Chinese overseas this book examines both China and the Chinese overseas in relation to qiaoxiang With clearly presented chapters that examine the ancestral homeland Chinese overseas China and transnational networks and the diversity of settlements and homelands the expert team of international contributors of Chinese Transnational Networks have created a volume which will be essential reading for students and scholars of migrations studies Chinese diaspora and Chinese culture and society *Chinese Society on the Eve of Tiananmen* Deborah Davis, Ezra Vogel, 2020-10-26 By the late 1970s state communism was everywhere in retreat First in Eastern Europe then in China and the Soviet Union party leaders were compelled to devise fundamental departures from the economic procedures and structures they had confidently installed at the outset of their revolutionary victories Perhaps no country departed more rapidly from communist economic structures than China Within five years of Mao Zedong's death reformers led by Deng Xiaoping had dismantled the people's communes and created a range of markets that established the institutional foundations for a new form of socialism But unlike the Soviets and Eastern Europeans the Chinese reformers refused to consider parallel changes in political institutions The demonstrations in Beijing in 1989 made it clear that post Mao economic policies had created unavoidable political consequences for the society and its leaders In individual case studies the twelve contributors to this volume document the uneven decollectivization and decentralization of China's economy in the post Mao years and the great diversity of the social and political consequences They deal with the effects of the more materialistic and individualistic reward system on both public and private life in the countryside and in urban settings and the new expectations that economic changes engendered *China Review 1993* Joseph Cheng Yu-shek, Maurice Brosseau, 1993

China's Regional Development Ming Lu, Zhao Chen, Zhu Xiwei, Xu Xianxiang, 2013-07-18 China is a large developing economy and it has been deeply involved in globalization since its economic reform and opening up Simultaneously China has seen a significant change in the spatial distribution of economic resources especially capital and labor In the recent 10 years economists have made significant progress in both theoretical and empirical studies on related topics The book provides an overview on the existing literature and current policy debates on what we have known and what we have misunderstood This book includes an analytical framework of the New Economic Geography NEG with political economy to help us understand China's regional development issues The book of 10 chapters is organized into four thematic sections The first section is a theoretical discussion on the relationship between economic agglomeration and interregional balanced development The second section is a political economy analysis on regional and urban rural development The third section provides a summary on empirical literatures concerning from market segmentation and institutional barriers to production factor mobility The final section consists of four empirical chapters on the relationship between agglomeration and balance which is the core of relevant policy debates The book argues that for China to achieve both efficiency and balance for regional development China may need to reform its systems which constrain production factors mobility This book is a valuable reference for readers who are interested in spatial economics and the Chinese economy especially its regional and urban development

The Role of Law in China's Economic Development, 1978-2011 Jia Hu, 2024-03-29 This book concerns how China's legal institutions promoted its economic growth and demonstrates that the law has played different roles at various stages of China's economic transformation a signal of legal paradigm shifts in reaction to the changing political and economic pursuits By decomposing the role of law in the process the author argues that while the Chinese economy was transforming from a planned economy to a market oriented one the law also made its adjustment as a response the Chinese legal system was evolving from the one consisting of primarily substantive laws to the one filled with high level formal laws by the end of the last century The above observation of legal formalization is further consolidated by introducing the particularities of China's legal education in those years a topic rarely dealt with yet of significance to comprehensively understand the Chinese legal system in practice Overall the present book argues against the modernization

theory and determinism that would anticipate a similar developmental path globally and shows that the relationship between law and economic development is contingent. Therefrom this study weighs in the law and development debate and breaks a perception of static law in the economy by rejecting the conventional perception of established legal institutions as a precondition of modernity. Hence this book could appeal to legal scholars and sociologists interested in reevaluating western theories of free economy and its relationships to the law. In addition, scholars interested in research methodology would find the perspective of paradigm shifts in interpreting China's transformations a helpful analytical framework in research. Moreover, policymakers and legislators concerned about the characteristics of law for economic results would also find the book useful.

Politics, Economy, and Society in Contemporary China Bill Brugger, Stephen Reglar, 1994. This analytic overview of contemporary Chinese politics focuses on six major themes: agriculture, urban life and industry, law and policing, intellectuals, women and the family, and minority nationalities.

Markets with Bureaucratic Characteristics Yingyao Wang, 2024-05-21. Winner 2025 Sociology of Development Book Award, Sociology of Development Section, American Sociological Association. China's breathtaking economic development has been driven by bureaucrats. Even as the country transitioned away from socialist planning toward a market economy, the economic bureaucracy retained a striking degree of influence and control over crafting and implementing policy. Yet bureaucrats are often dismissed as faceless and inconsequential, their role neglected in favor of party leaders' top-down rule or bottom-up initiatives. *Markets with Bureaucratic Characteristics* offers a new account of economic policy making in China over the past four decades that reveals how bureaucrats have spurred large-scale transformations from within. Yingyao Wang demonstrates how competition among bureaucrats motivated by careerism has led to the emergence of new policy approaches. Second-tier economic bureaucrats instituted distinctive and often conflicting policy paradigms aimed at securing their standing and rewriting China's long-term development plans for their own benefit. Emerging from the middle levels of the bureaucracy, these policy paradigms ultimately reorganized the Chinese economy and reshaped state-market relations. Drawing on fine-grained biographical and interview data, Wang traces how officials coalesced around shared career trajectories, generational experiences, and social networks to create new alliances and rivalries. Shedding new light on the making and trajectory of China's ambitious economic reforms, this book also provides keen sociological insight into the relations among bureaucracy, states, and markets.

Rent Seeking in China Tak-Wing Ngo, Yongping Wu, 2008-12-04. This is the first book which undertakes a systematic analysis of rent-seeking activities in China. Using case studies from across economic sectors, the contributors discuss the occurrence of the phenomenon, what range of activities are related to rent-seeking practices, and more importantly, how rent-seeking shapes political and economic development.
