Other Tradition Of Modern Architecture The Uncompleted Project:

The Other Tradition of Modern Architecture Colin St. John Wilson, 2007 Sets out to examine the underlying themes of Modern European architecture assessing their impact influence and continuing development This book argues for a continuing tradition an uncompleted project sustained against the rigidifying orthodoxy the white walls functionalism and blank boxes of CIAM by a resistance movement

Architectural Reflections Colin St. John Wilson, 2000 Louise Erdrich is one of the most critically and commercially successful Native American writers This book is the first fully comprehensive treatment of Erdrich's writing analysing the textual complexities and diverse contexts of her work to date Drawing on the critical archive relating to Erdrich's work and Native American literature Stirrup explores the full depth and range of her authorship Breaking Erdrich's oeuvre into several groupings poetry early and late fiction memoir and children's writing Stirrup develops individual readings of both the critical arguments and the texts themselves He argues that Erdrich's work has developed an increasing political acuity to the relationship between ethics and aesthetics in Native American literatures Erdrich's insistence on being read as an American writer is shown to be in constant and mutually inflecting dialogue with her Ojibwe heritage This sophisticated analysis is of use to students and readers at all levels of engagement with Erdrich's writing

Boom Cities Otto Saumarez Smith, 2019-03-21 Boom Cities is the first published history of the profound transformations of British city centres in the 1960s It has often been said that urban planners did more damage to Britain's cities than even the Luftwaffe had managed and this study details the rise and fall of modernist urban planning revealing its origins and the dissolution of the cross party consensus before the ideological smearing that has ever since characterized the high rise towers dizzying ring roads and concrete precincts that were left behind The rebuilding of British city centres during the 1960s drastically affected the built form of urban Britain including places ranging from traditional cathedral cities

through to the decaying towns of the industrial revolution Boom Cities uncovers both the planning philosophy and the political cultural and legislative background that created the conditions for these processes to occur across the country Boom Cities reveals the role of architect planners in these transformations The volume also provides an unconventional account of the end of modernist approaches to the built environment showing it from the perspective of planning and policy elites rather than through the emergence of public opposition to planning

Dreams of disconnection Fanny Lopez, 2021-06-24 Why do we live in homes and communities built around the century old industrial model of large service networks that use polluting resources For more than a century creative architects and planners have dreamed of decentralisation and self sufficient living not to cut themselves off from society but to invent new modes of consumption and to rethink collective public services around common environmental values In a time of climate crisis changing society means changing energy infrastructures Dreams of disconnection tells the story of this strand of design and planning from its pioneers in the late nineteenth century to those applying similar ideas to tomorrow's technology two hundred years later Lopez takes in many a utopian visionary in her tour of dreamers of disconnection from theorists and architects to industrialists and engineers Technology and design are the centrepieces for these projects and their complexity particularly around sustainable supplies of energy food and water so often find solutions in aesthetics Whether these models were based around single homes or whole cities Dreams of disconnection reveals that there is much to be learnt and marvelled at in the history of self sufficient design
