Australian Coastal Wars Doctor Tom Lewis, 2025-09-30 For the first time acclaimed military historian Dr Tom Lewis OAM uncovers the full scale of World War II's forgotten battles along our coastline From German surface raiders laying deadly mines to Japanese submarines prowling offshore and enemy aircraft launching hundreds of attacks the war on the coast stretched across thousands of kilometres from Darwin to Hobart from Townsville to Melbourne This landmark book rewrites history revealing a long and brutal struggle between German and Japanese forces and those of Australia Britain and the United States Scores of ships were sunk thousands of lives lost yet much of this story remains unknown Among the tragedies are gripping accounts of heroism and heartbreak the sinking of the cruiser Sydney with 645 lives lost in a duel with the raider Kormoran a deadly mine explosion on a quiet South Australian beach and the haunting fate of a priest abducted and executed by an enemy floatplane crew There are also tales of misjudgement and misadventure like the flawed decisions during the Sydney midget submarine raids partly redeemed by the courage of small ship commanders whose bravery remains unrecognised Other stories are only now coming to light including the daring attack by two RAAF bombers on a Japanese submarine still lost off the coast of New South Wales *Australian Coastal Wars* reveals it all a sweeping and deeply human account of a war far closer to home than most Australians ever realised

Profiles in Folly Alan Axelrod, 2012-04-03 Using the same engrossing anecdotal format that proved so popular in *Profiles in Audacity* bestselling author Alan Axelrod turns to the dark side of audacious decision making and explores history's most tragic errors While Axelrod looks at the hopelessly dumb and the overtly evil the main focus is on smart people who had the best of intentions but whose plans went disastrously wrong The 35 compelling stories include the sailing of the unsinkable Titanic Edward Bernay's 1929 campaign to recruit women smokers Neville Chamberlain's appeasement of the Nazis Ken Lay's deception with Enron and even the choice to create a New Coke and fix what wasn't broke These are cautionary tales albeit with exquisite twists ranging from acerbic to horrific

Indomitable Will Charles Kupfer, 2012-04-05 Some of the worst military disasters in U S history occurred between Pearl Harbor on December 7 1941 and the Battle of Midway in June 1942 During this period the American people faced a barrage of bad news and accounts of defeats and

retreats Yet if they were shocked and dismayed they showed little panic Indomitable Will resurrects the legacy of this first half year of American combat during WWII a legacy of pain but not of woe Historian Charles Kupfer recounts the story of the war's early defeats Bataan Corregidor Wake Island and the Java Sea Some of these battles remain evocative today others are obscure all were catastrophes for American arms Kupfer asserts however that later victories were made inevitable by the steeling effect of those initial disasters Weaving together military journalistic political and cultural histories this engaging book shows that by setting their collective will on victory Americans in and out of uniform gained strength from their setbacks Indomitable Will spells out how the nation turned early defeat into ultimate victory **Understanding Cyber**

acknowledged problems from early in the war but their processes and their tunnel vision prevented them from realizing that the weapon sent to the fleet was grossly defective One of World War II's forgotten heroes Admiral Lockwood drove the process for finding and fixing the three major defects This is first book that deals exclusively with the torpedo problem building its case out of original research from the archives of the Bureau of Ordnance the Chief of Naval Operations Vice Admiral Lockwood's personal correspondence and records from the British Admiralty at the National Archives of the United Kingdom These sources are complemented by correspondence and interviews with men who actually participated in the events

War at the End of the World James P. Duffy, 2023-12-05 A harrowing account of an epic yet nearly forgotten battle of World War II General Douglas MacArthur's four year assault on the Pacific War's most hostile battleground the mountainous jungle cloaked island of New Guinea A meaty engrossing narrative history This will likely stand as the definitive account of the New Guinea campaign The Christian Science Monitor One American soldier called it a green hell on earth Monsoon soaked wilderness debilitating heat impassable mountains torrential rivers and disease infested swamps New Guinea was a battleground far more deadly than the most fanatical of enemy troops Japanese forces numbering some 600 000 men began landing in January 1942 determined to seize the island as a cornerstone of the Empire's strategy to knock Australia out of the war Allied Commander in Chief General Douglas MacArthur committed 340 000 Americans as well as tens of thousands of Australian Dutch and New Guinea troops to retake New Guinea at all costs What followed was a four year campaign that involved some of the most horrific warfare in history At

first emboldened by easy victories throughout the Pacific the Japanese soon encountered in New Guinea a roadblock akin to the Germans disastrous attempt to take Moscow a catastrophic setback to their war machine For the Americans victory in New Guinea was the first essential step in the long march towards the Japanese home islands and the ultimate destruction of Hirohito s empire Winning the war in New Guinea was of critical importance to MacArthur His avowed I shall return to the Philippines could only be accomplished after taking the island In this gripping narrative historian James P Duffy chronicles the most ruthless combat of the Pacific War a fight complicated by rampant tropical disease violent rainstorms and unforgiving terrain that punished both Axis and Allied forces alike Drawing on primary sources War at the End of the World fills in a crucial gap in the history of World War II while offering readers a narrative of the first rank V Is For Victory Craig Nelson,2023-05-23 Historian Craig Nelson reveals how FDR confronted an American public disinterested in going to war in Europe skillfully won their support and pushed government and American industry to build the greatest war machine in history the arsenal of democracy that won World War II As Nazi Germany began to conquer Europe America s military was unprepared too small and poorly supplied The Nazis were supported by robust German factories that created a seemingly endless flow of arms trucks tanks airplanes and submarines The United States emerging from the Great Depression was skeptical of American involvement in Europe and not ready to wage war Hardened isolationists predicted disaster if the country went to war In this fascinating and deeply researched account Craig Nelson traces how Franklin D Roosevelt steadily and sometimes secretly put America on a war footing by convincing America s top industrialists such as Henry Ford Jr to retool their factories by diverting the country s supplies of raw materials to the war effort and above all by convincing the American people to endure shortages to work in wartime factories and to send their sons into harm s way Within a few years the nation s workers were producing thousands of airplanes and tanks hundreds of warships and submarines Under FDR s resolute leadership victory at land and sea and air across the globe began at home in America a powerful and essential narrative largely overlooked in conventional histories of the war but which in Nelson s skilled authoritative hands becomes an illuminating and important work destined to become an American history classic Voices of World War II Priscilla Roberts,2012-08-22 Drawing together a wide variety of primary source documents from across the United States Europe and Asia this book illuminates the events and experiences of World War II the most devastating war in human history World War II was the most destructive and disruptive war ever a global conflict that in one way or another affected the lives of people across the planet Voices of World War II Contemporary Accounts of Daily Life coalesces a wide variety of primary source documents drawn from across the United States Europe and Asia Supplemented by interpretive material that enables readers to analyze them assess their impact and significance and place them in context to comparable situations today the documents provide rare insights into World War II Expert commentaries and additional information on these texts enable a greater understanding of the background to these documents providing valuable training in learning to interpret assess and evaluate

historical sources Intended primarily for upper level high school and undergraduate level history students general readers will also appreciate the variegated array of primary material from World War II which depicts numerous aspects of the conflict often in extremely personal terms *Pacific Skies* Jerome Klinkowitz,2004 World War II Aviation From 1941 to 1945 the skies over the Pacific Ocean afforded the broadest arena for battle and the fiercest action of air combat during World War II It was in the air above the Pacific that America s involvement in the war began It was in these skies that air power launched from carriers became a new form of engagement and where the war ultimately ended with kamikaze attacks and with atomic bombs dropped over Japan Throughout the conflict American flyers felt a compelling call to supplement the official news and military reports In vivid accounts written soon after combat and in reflective memoirs recorded in the years after peace came both pilots and crew members detailed their stories of the action that occurred in the embattled skies Their first person testimonies describe a style of warfare invented at the moment of need and at a time when the outcome was anything but certain Gathering more than a hundred personal narratives from Americans and from Japanese *Pacific Skies* recounts a history of air combat in the Pacific theater Included are the words of such famous aces and bomber pilots as Joe Foss Pappy Boyington Dick Bong and Curtis Lemay as well as the words of many rank and file airmen Together their stories express fierce individualism and resourcefulness and convey the vast panorama of war that included the skies over Pearl Harbor Wake and Guadalcanal and missions from Saipan and Tinian As *Pacific Skies* recounts the perilous lives of pilots in their own words Jerome Klinkowitz weaves the individual stories into a gripping historical narrative that exposes the shades of truth and fiction that can become blurred over time A book about experiencing and remembering *Pacific Skies* also is a story of unique perspectives on the war Jerome Klinkowitz a professor of English at the University of Northern Iowa is the author of forty books including such World War II titles as *Their Finest Hours* *Yanks over Europe* and *With Tigers over China*

Nalty,1999 The collective effort of

ten military historians describes World War II's Pacific campaign describing each step of the conflict with clarity and in exhaustive detail. Color maps. Photos many in color. *The Conduct of Hostilities in International Humanitarian Law, Volume I* Wolff Heintschel von Heinegg, 2023-06-14. This volume is the first of two addressing the legal regime governing the use of force during armed conflicts. Traditionally labeled Hague Law today the norms it examines are commonly referred to as conduct of hostilities rules. At the heart of this body of law is the principle of distinction which requires that civilians and civilian objects be distinguished from combatants and military objectives during military operations. It is the purest expression of the foundational balance between humanitarian considerations and military necessity that has underpinned international humanitarian law since its inception. The essays selected consider the theoretical and practical difficulties of maintaining the balance in the face of evolving means and methods of warfare and competing perspectives as to how it is best achieved. Also addressed is the law governing warfare at sea and in the air. Essays focusing on the former examine early norms and analyze their continuing relevance to today's maritime operations whilst those exploring the latter inject much needed clarity into the subject an essential task in light of the centrality of aerial warfare in modern combat operations.
