Philosophical Inquiry Towards A Global Account:

The Philosophical Inquiry Claudio Ferreira Costa, 2002 Develops a global theory on the nature of philosophy

Philosophical Semantics Claudio Ferreira Costa, 2019-01-29 This book offers an innovative systematic approach to the problems of meaning reference and related issues unifying in promising ways some of the best insights not only of exponential philosophers like Wittgenstein and Frege but also of some influential later theorists like Michael Dummett Ernst Tugendhat John Searle and Donald Williams Moreover it exposes some main errors popularized by clever formalist oriented philosophers from Willard Van Orman Quine to Saul Kripke and Hilary Putnam In this way it shows how some older major approaches could regain their central importance and how the cartography of philosophy of language could be once more redrawn The book is clearly written and will be of interest to anyone with basic training in analytic philosophy

Lines of Thought Claudio Ferreira Costa, 2014-06-30 *Lines of Thought* Rethinking Philosophical Assumptions is a highly innovative and powerfully argued book According to the author noted Brazilian philosopher Claudio Costa many philosophical ideas that today are widely seen as old fashioned and outdated should not be dismissed but instead should be extensively reworked and reformulated This also means that contemporary analytical philosophy should begin to question many of its most cherished views and reconsider some of the current ways of looking at philosophy Following this path in the philosophy of language the author suggests replacing the causal historical view of proper names with a much more sophisticated form of descriptive internalist theory able to meet Kripke's challenges In epistemology he argues convincingly that we should return to the old traditional tripartite definition of knowledge reformulated in a much more complex form in which Gettier's problem would disappear The correct response to skepticism about the external world should not be to adopt new and more fanciful views but rather to carefully analyze the different kinds of reality attributions implied by the argument and responsible for its equivocal character In metaphysics he argues for a more complex reformulation of the traditional compatibilist approach of free will relating it intrinsically with the causal theory of action and making it powerful enough to assimilate the best elements of hierarchical views Finally according to the author contemporary analytic philosophy suffers from a lack of comprehensiveness In response to this the papers in this collection aim to restore something of a broader perspective salvaging isolated insights by integrating them into more comprehensive views

How Do Proper Names Really Work?

Claudio Ferreira-Costa, 2023-09-18 For fifty years the philosophy of language has been experiencing a stalemating conflict between the old descriptive and internalist orthodoxy advocated by philosophers such as Frege Russell Wittgenstein Strawson and Searle and the new causal referential and externalist orthodoxy mainly endorsed by Kripke Putnam and Kaplan Although the latter is dominant among specialists the former retains a discomfiting intuitive plausibility The ultimate goal of this book is to overcome the stalemate by means of a non naive return to the old descriptivist internalist orthodoxy Concerning proper names this means introducing second order description rules capable of systemizing descriptions of the

proper names cluster to provide us with the right changeable conditions of satisfaction for its application. Such rules can explain how a proper name can become a rigid designator while remaining descriptive. Disarming Kripke's and Donnellan's main objections. In the last chapter this new perspective is extended to indexicals in a discussion of David Kaplan's and John Perry's views and of general terms in a discussion of Hilary Putnam's externalism.

Global Justice and International Economic Law Chi Carmody, Frank J. Garcia, John Linarelli, 2012-01-09 Since the beginnings of the GATT and the Bretton Woods institutions and on to the creation of the WTO states have continued to develop institutions and legal infrastructure to promote global interdependence. International lawyers are experts in understanding how these institutions operate in practice but they tend to uncritically accept comparative advantage as the principal normative criterion to justify these institutions. In contrast moral and political philosophers have developed accounts of global justice but these accounts have had relatively little influence on international legal scholarship and on institutional design. This volume reflects the results of a symposium held at Tillar House the American Society of International Law headquarters in Washington DC in November 2008 which brought together philosophers legal scholars and economists to discuss the problems of understanding international economic law from the standpoints of rights and justice in particular from the standpoint of distributive justice.
