Kant's Legacy Predrag Cicovacki,2001 The late Lewis White Beck Professor of Philosophy at the University of Rochester for many years was one of the world s leading Kant scholars Beck considered the most significant element of Kant s rich complex and controversial legacy to be the ultimate philosophical question What is Man Kant s answer that humans are creators is ambiguous On the one hand it dignifies humans by elevating them above blind mechanical forces of nature But it also imposes difficult burdens including the task of providing a unitary worldview and an immanently grounded system

of values and norms The contributors to this volume under Beck's influence concur that this theme is of central importance for the proper understanding and evaluation of Kant's legacy The papers address issues concerning creativity in all aspects of human experience from knowledge of the external world to self knowledge from moral to religious dilemmas from judgments of taste to the art of living with a constant awareness of the limitations as well as the possibilities of such creativity Predrag Cicovacki is Associate Professor of Philosophy College of the Holy Cross Formal Approach to the Metaphysics of Perspectives Juan J. Colomina-Almiñana, 2018-01-29 This book offers a metaphysical development of the notion of perspective By explaining the functional nature of point of view and by providing a concrete definition of point of view as a window through which to see the world it offers a scientific realist theory that explains that points of view are real structures that ground properties and objects as well as perspectives The notion of point of view has been of key importance in the history of philosophy and different philosophical schools have used this notion to conduct analyses from the external reality to the inner phenomenal status or even to construct an entire philosophical system However there has been a lack of systematic analysis of what a point of view is and what its structure is this book fills the gap in the literature and makes the transition between semantics and epistemology and the philosophy of science **Oxford Studies in Metaphysics Volume 11** Dean W. Zimmerman, Karen Bennett, 2018-10-18 Oxford Studies in Metaphysics is the forum for the best new work in this flourishing field Much of the most interesting work in philosophy today is metaphysical in character this series is a much needed focus for it **Wilfrid Sellars** James O'Shea, 2015-02-13 The work of the American philosopher Wilfrid Sellars continues to have a significant impact on the contemporary philosophical scene His writings have influenced major thinkers such as Rorty McDowell Brandom and Dennett and many of Sellars basic conceptions such as the logical space of reasons the myth of the given and the manifest and scientific images have become standard philosophical terms Often however recent uses of these terms do not reflect the richness or the true sense of Sellars original ideas This book gets to the heart of Sellars philosophy and provides students with a comprehensive critical introduction to his life's work The book is structured around what Sellars himself regarded as the philosophers overarching task to achieve a coherent vision of reality that will finally overcome the continuing clashes between the world as common sense takes it to be and the world as science reveals it to be It provides a clear analysis of Sellars groundbreaking philosophy of mind his novel theory of consciousness his defense of scientific realism and his thoroughgoing naturalism with a normative turn Providing a lively examination of Sellars work through the central problem of what it means to be a human being in a scientific world this book will be a valuable resource for all students of philosophy *The Cyrenaics* Ugo Zilioli, 2014-10-20 The Cyrenaic school of philosophy named after its founder Aristippus native city of Cyrene in North Africa flourished in the fifth and fourth centuries BCE and whose importance was much recognized in ancient times Ugo Zilioli's book provides the first book length introduction to the school in English This book begins by introducing the main figures of the Cyrenaic school beginning with Aristippus and by setting them into their

historical context Once the reader is familiar with those figures and with the genealogy of the school the book offers an overview of ancient and modern interpretations of the Cyrenaics to provide readers with alternative accounts of the doctrines they endorsed and of the role they played in the context of ancient thought Finally this book offers a reconstruction of Cyrenaic philosophy and shows how the ethical side of their speculation connected with the epistemology and ontology they endorsed and that as a result the Cyrenaics were able to offer a quite sophisticated philosophy Indeed Zilioli demonstrates that they represented in ancient philosophy an important and original metaphysical position and alternative to the kind of realism endorsed by Plato and Aristotle

Sellars and his Legacy James R. O'Shea, 2016-06-09 This collection of new essays on the systematic thought and intellectual legacy of the American philosopher Wilfrid Sellars 1912-1989 comes at a time when Sellars's influence on contemporary debates about mind meaning knowledge and metaphysics has never been greater Sellars was among the most important philosophers of the twentieth century and many of his central ideas have become philosophical stock in trade for example his conceptions of the myth of the given the logical space of reasons and the clash between the manifest and scientific images of man in the world This volume of well known contemporary philosophers who have been strongly influenced by Sellars Robert Brandom Willem deVries Robert Kraut Rebecca Kukla Mark Lance John McDowell Ruth Millikan James O'Shea David Rosenthal Johanna Seibt and Michael Williams critically examines the groundbreaking ideas by means of which Sellars sought to integrate our thought perception and rational agency within a naturalistic outlook on reality Topics include Sellars's inferentialist semantics and normative functionalist view of the mind his attempted reconciliations of internalist and externalist aspects of thought meaning and knowledge his novel nominalist account of abstract entities and a speculative pure process metaphysics of consciousness Of particular interest is how this volume exhibits the ongoing fruitful dialogue between so called left wing Sellarsians who stress Sellars's various Kantian and pragmatist defenses of the irreducibility of normativity and rationality within the space of reasons and right wing Sellarsians who defend the plausibility of Sellars's highly ambitious and systematic scientific naturalism

The Scientific World-Perspective and Other Essays, 1931-1963 J. Giedymin, 2012-12-06 Though with considerable delay most of the writings of Polish logicians of the inter war

period are now available in English This is not yet true of Polish philosophy In the present volume English speaking readers will find for the first time a sizeable collection of the articles of one of the most original and distinguished of Poland's philosophers of the present century Kazimierz Ajdukiewicz 1890-1963 To be sure Ajdukiewicz was a philosopher logician from the beginning of his career His first work of some importance a monograph entitled *From the Methodology of the Deductive Sciences* 1921 post dated two abstracts published in 1919-20 exhibited two features which were to become characteristic of the style of his later philosophy On the one hand the monograph was the result of Ajdukiewicz's deep interest in the systems of modern logic the foundations of mathematics in the properties of deductive systems and their relevance to philosophy on the other hand the monograph was an attempt at developing an understanding methodology in the sense of Gennap Verstandende Methodologie of deductive sciences i.e. a pragmatic study of axiomatic systems which would supplement purely formal investigations of those systems The former made him a close ally of logical empiricists the latter was rooted in the hermeneutic tradition of the second half of the 19th century Dilthey which spilled over into the 20th century Springer and which was not cherished at all by logical empiricists
