

Because we're human. Because we're curious.
Because we want to know about how the world works and knowing this means asking some philosophical questions.

For Socrates the answer might have been to make life worth living as he once said "the unexamined life is not worth living." Philosophy is the method for engaging in that examination.

Our search for meaning, as documented by Viktor Frankl is one which requires us to philosophize as well. According to Frankl meaning can be found even in the worst of conditions but to find it requires reflection and that reflection will be philosophical.

We also philosophize because it is fun. We should not overlook this important motivator for all our investigations. As Richard Feynman put it we learn for the "pleasure of finding things out."

Philosophical Reflections On Mind:

In Defence of Wonder and Other Philosophical Reflections Raymond Tallis, 2014-09-03 In these lively and provocative essays philosopher polymath and all round intellectual heavyweight Raymond Tallis debunks commonplace truths exposes woolly thinking and pulls the rug from beneath a wide range of commentator whether scientist theologian philosopher or pundit Tallis takes to task much of contemporary science and philosophy arguing that they are guilty of taking us down ever narrowing conduits of problem solving that only invite ever more complex responses and in doing so have lost sight of wonder the metaphysical intoxication that first gave birth to philosophy 2 500 years ago Tallis tackles some meaty topics memory time language truth fiction consciousness but always with his characteristic verve insight and wit These essays showcase Tallis s skill for getting to the heart of the matter and challenging us to see and wonder in different ways Wonder is the proper state of humankind and as these essays show it has no more forceful a champion than Raymond Tallis

Philosophical Reflections on Antiquity Paul Fairfield, 2020-09-02 *Philosophical Reflections on Antiquity* Historical Change addresses the question of whether there is a logic of historical change and whether the collapse of teleology should deter us from inquiring anew whether any recurring patterns and themes show themselves amid the complexity of historical life Paul Fairfield argues that if any conception of universal history remains possible it is one that rejects teleology and causal laws while identifying thematic tendencies that afford some semblance of unity including the enduring phenomena that are interlocation the struggle for predominance and the endless back and forth that play out between them This book examines the transitional periods of archaic Greece and late antiquity the ostensible birth and death of the ancient west Fairfield argues that an interpretation of the social political and intellectual history of these important turning points brings to light some philosophical understanding of the dynamics of change itself observing that the transition from archaic to classical Greece was no miracle while the end of the Roman era can no longer be conceived as a story of decline and fall Rather Fairfield posits these were not complete breaks but relative beginnings and endings in narratives that are ongoing Scholars of philosophy history and anthropology will find this book particularly useful

PHILOSOPHICAL REFLECTIONS ABOUT WINE DAVID SANDUA, 2024-01-06 This book invites the reader on an intellectual and sensory journey through the world of wine It explores how something as common as a glass of wine can open doors to profound philosophical reflections Throughout its pages it discusses how wine beyond being a simple beverage with aesthetic and hedonistic qualities can be a catalyst for questioning our subjective experiences investigating the nature of pleasure and discovering the complexities of perception and aesthetics The book seeks to demonstrate that even the most everyday aspects of life are deeply intertwined with significant philosophical questions thus offering a new perspective on wine and its place in our understanding of the world

Wishful Thinking And Other Philosophical Reflections Nicholas Rescher, 2013-05-02 During 2007 2008 Nicholas Rescher continued his longstanding practice of writing occasional studies on philosophical topics both for formal

presentation and for informal discussion with colleagues While his forays of this kind have usually been issued in journal publications this has not been so in the present case so that the studies offered here encompass substantially new material Notwithstanding their thematic variation these exemplify a problem oriented method in the treatment of philosophical issues that is characteristic of Rescher's philosophical *modus operandi* and inherent in its endeavors to treat classical issues from novel points of view For Rescher usually more concerned with what should be said about a philosophical question than with what X Y and Z have said about it and he inclined to address issues of the latter sort primarily as a means for addressing the former

Aesthetic and Philosophical Reflections on Mood Birgit Breidenbach, 2020-04-19 This study explores the concept of *Stimmung* in literary and philosophical texts of the modern age Signifying both mood and attunement *Stimmung* speaks to the categories of affective experience and aesthetic design alike The study locates itself in the nexus between discourses on modernity existentialism and aesthetics and uncovers the pivotal role of *Stimmung* in 19th and 20th century European narrative fiction and continental philosophy The study first explores the philosophical and aesthetic origins and implications of *Stimmung* to then discuss its role in the narrative fiction of three key authors of modern literature Fyodor Dostoevsky Samuel Beckett and Thomas Bernhard These readings demonstrate a significant shift towards an aesthetic of affective intensity and immediacy in which the experience of the reading process takes centre stage as each author develops an aesthetic philosophy of *Stimmung* in their own right Through its focus on the concept of *Stimmung* the study thus unearths a fundamental link between existentialist concerns and narrative practice in modern literature

Fictional Worlds and Philosophical Reflection Garry Hagberg, 2022-01-31 This edited collection investigates the kinds of philosophical reflection we can undertake in the imaginative worlds of literature Opening with a look into the relations between philosophical thought and literary interpretation the volume proceeds through absorbing discussions of the ways we can see life through the lens of literature the relations between philosophical saying and literary showing and some ways we can see the literary past philosophically and assess its significance for the present Taken as a whole the volume shows how imagined contexts can be a source of knowledge a source of conceptual clarification and a

source of insight and understanding And because philosophical thinking is undertaken after all in words a heightened sensitivity to the precise employments of our words particularly philosophically central words such as truth reality perception knowledge selfhood illusion understanding falsehood can bring a clarity and a refreshed sense of the life that our words take on in fully described contexts of usage And in these imagined contexts we can also see more acutely and deeply into the meaning of words about words metaphor and figurative tropes verbal coherence intelligibility implication sense and indeed the word meaning itself Moving from a philosophical issue into a literary world in which the central concepts of that issue are in play can thus enrich our comprehension of those concepts and in the strongest cases substantively change the way we see them With a combination of conceptual acuity and literary sensitivity this volume maps out some of the territory that philosophical reflection and literary engagement share

Elements of the Philosophy of the Human Mind Dugald Stewart, 1843

The Dark Side: Philosophical Reflections on the "Negative Emotions" Paola Giacomoni, Nicolò Valentini, Sara Dellantonio, 2021-04-02 This book takes the reader on a philosophical quest to understand the dark side of emotions The chapters are devoted to the analysis of negative emotions and are organized in a historical manner spanning the period from ancient Greece to the present time Each chapter addresses analytical questions about specific emotions generally considered to be unfavorable and classified as negative The general aim of the volume is to describe the polymorphous and context sensitive nature of negative emotions as well as changes in the ways people have interpreted these emotions across different epochs The editors speak of the dark side of the emotions because their goal is to capture the ambivalent unstable and shadowy aspects of emotions A number of studies have taken the categorial distinction between positive and negative emotions for granted suggesting that negative emotions are especially significant for our psychological experience because they signal difficult situations For this reason the editors stress the importance of raising analytical questions about the valence of particular emotions and focussing on the features that make these emotions ambivalent how despite their negativity such emotions may turn out to be positive This opens up a perspective in which each emotion can be understood as a complex interlacing of negative and positive properties The collection presents a thoughtful dialogue between philosophy and contemporary scientific research It offers the reader insight by illuminating the dark side of the emotions

Tymieniecka,2012-12-06 **Re-ethnicizing the Minds?** ,2006-01-01 The predominance and global expansion of homogenizing modes of production consumption and information risks alienating non Western and Western people alike from the intellectual and moral resources embedded in their own distinctive cultural traditions In reaction to the erosion of traditional cultures and civilizations we seem to be witnessing the re emergence of a tendency to re ethnicize the mind through renewed and more or less systematic cultural revivals worldwide e g hinduization ivoirization sinofication islamicization indigenization etc How do and should philosophers understand and assess the significance and impact of this phenomenon Authors acquainted with the contemporary situation in Africa Asia the Middle East South America and Europe try to answer this question In the final analysis the authors of this original and groundbreaking collection of essays plead for a full critical engagement with one s own particularity while at the same time rejecting any form of cultural national or regional chauvinism They consider various ways in which local and global conceptions as well as practices can and already do judiciously inform and positively fertilize each other At this juncture of history they argue societies and peoples must articulate their self identity by looking critically at their respective cultural resources and beyond them at the same time

Crooked Thinking or Straight Talk? Ken Binmore,2020-01-14 Why can t we think straight about the big issues that face our society Why are we taken in by the phony arguments of populists and scammers Where are the philosophers hiding when we need them to tell us what makes sense They are hiding because they have nothing to say The airy fairy answers offered by writers of footnotes to Plato were wrong two thousand years ago and they are still wrong now All this time we should have been listening to a different but equally venerable branch of matter of fact philosophy pioneered by the much maligned philosopher Epicurus His ideas were suppressed in ancient times as heretical but the development of the theory of games and decisions makes it timely for those of us who care about science to revive his style of thinking not just about the world around us but about ourselves as well The price of transferring our allegiance to Epicurus and his modern followers is that we can no longer enjoy the luxury of being told what we want to hear It would be nice if we were really equipped with a hotline to a metaphysical world of transcendental ideals but the truth is that we are just the flotsam left behind on the beach when the evolutionary tide went out and we have to get real about what will and will not work for our imperfect species before it is too late This book is an attempt to point the way It has no equations and very little jargon nor does it pull any punches either in explaining how game theory works or in exposing the follies of famous metaphysicians
