Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1977 Philosophically Speaking, Man Must Earn His Living Charles Prynne Martyn, 1975-06 Henry David Thoreau Michael Berger, 2025-08-01 Thoreau is well known as a lyrical nature writer environmental prophet rebel against stifling convention and theorist of strategic intervention to protest injustice He was also a part time surveyor and pencil maker student of Native America abolitionist philosopher and shrewd Transcendentalist Whether living at Walden Pond or comfortably on Main Street in central Concord Thoreau made deep inquiries into life and gave all to his craft Drawing on the work of outstanding scholars and critics this companion provides information on the full body of Thoreau s work his life and his world connecting the factors that affected Thoreau s thought and writing and highlighting his impact in his own time and since This study brings these various aspects of Thoreau s life and writings into focus in over one hundred interconnected essays *The Illuminate of Görlitz, Or, Jakob Böhme's (1575-1624) Life and Philosophy* Herman Vetterling, 1923 Philosophy Bertrand Russell, 1926-01-01 Perhaps it might be expected that I should begin with a definition of philosophy but rightly or wrongly I do not propose to do so The definition of philosophy will vary according to the philosophy we adopt all that we can say to begin with is that there are certain problems which certain people find interesting and which do not at least at present belong to any of the special sciences These problems are all such as to raise doubts concerning what commonly passes for knowledge and if the doubts are to be answered it can only be by means of a special study to which we give the name philosophy Therefore the first step in defining philosophy is the indication of these problems and doubts which is also the first step in the actual study of philosophy There are some among the traditional problems of philosophy that do not seem to me to lend themselves to intellectual treatment because they transcend our cognitive powers such problems I shall not deal with There are others however as to which even if a final solution is not possible at present yet much can be done to show the direction in which a solution is to be sought and the kind of solution that may in time prove possible Philosophy arises from an unusually obstinate attempt to arrive at real knowledge What passes for knowledge in ordinary life suffers from three defects it is cocksure vague and self contradictory The first step towards philosophy consists in becoming aware of these defects not in order to rest content with a lazy scepticism but in order to substitute an amended kind of knowledge which shall be tentative precise and self consistent There is of course another quality which we wish our knowledge to possess namely comprehensiveness we wish the area of our knowledge to be as wide as possible But this is the business of science rather than of philosophy A man does not necessarily become a better philosopher through knowing more scientific facts it is principles and methods and general conceptions that he should learn from science if philosophy is what interests him The philosopher s work is so to speak at the second remove from crude fact Science tries to collect facts into bundles by means of scientific laws these laws rather than the original facts are the raw material of philosophy Philosophy involves a criticism of scientific knowledge not from a point

of view ultimately different from that of science but from a point of view less concerned with details and more concerned with the harmony of the whole body of special sciences The special sciences have all grown up by the use of notions derived from common sense such as things and their qualities space time and causation Science itself has shown that none of these common sense notions will quite serve for the explanation of the world but it is hardly the province of any special science to undertake the necessary reconstruction of fundamentals This must be the business of philosophy I want to say to begin with that I believe it to be a business of very great importance I believe that the philosophical errors in common sense beliefs not only produce confusion in science but also do harm in ethics and politics in social institutions and in the conduct of everyday life It will be no part of my business in this volume to point out these practical effects of a bad philosophy my business will be purely intellectual But if I am right the intellectual adventures which lie before us have effects in many directions which seem at first sight quite remote from our theme
