that mark humanity s attempts to attain deeper and more lasting wisdom about our complex and evolving relationship to **Chinese Philosophy of Technology** Qian Wang, 2020-02-20 This book gathers essays that introduce the technology ideological advances in the philosophy of engineering and technology in contemporary China It particularly focuses on China s distinctive concepts and methods revealing different views and academic debates to offer readers a comprehensive overview of this important field The contributors present unique perspectives based on practical problems and traditional philosophy examining such issues and concepts as axiology and theories of process the difference between engineering activities and technology activities and the core of the relationship between Dao and Technique Other essays cover the ethics of technology practical wisdom phronesis and practical reasoning as well as creative concepts and methods concerning the philosophical problems in high technology architectural technology and technological innovation. The authors also consider more general issues in the field This book compiles the relevant research achievements of Chinese scholars in various time periods Some authors have revised and translated into English papers published in Chinese while others present their research in English specifically for this study An annotated bibliography of the major publications in the field completes this Europe, America, and Technology: Philosophical Perspectives P.T. Durbin, 2012-12-06 As Europe moves toward collection 1992 and full economic unity and as Eastern Europe tries to find its way in the new economic order the United States hesitates Will the new European economic order be good for the U S or not Such a question is exacerbated by world wide changes in the technological order most evident in Japan's new technological power As might be expected philosophers have been slow to come to grips with such issues and lack of interest is compounded by different philosophical styles in different parts of the world What this volume addresses is more a matter of conflicting styles than a substantive confrontation with the real world issues But there is some attempt to be concrete The symposium on Ivan Illich with contributions from philosophers and social critics at the Penns vania State University where Illich has taught for several years may suggest the old cliche of Old World vs New World Illich's fulminations against technology are often dismissed by Americans as old world style prophecy while Illich seems largely unknown in his native Europe But Albert Borgmann born in Germany though now settled in the U S shows that this old dichotomy is difficult to maintain in our technological world Borgmann's focus is on urgent technological problems that have become almost painfully evident in both Europe and Philosophy of Technology in Spanish Speaking Countries Carl America Current Contents ,1999 Mitcham, 2012-12-06 This volume grew out of the experience of the First Inter American Congress on Philosophy of Technology October 1988 organized by the Center for the Philosophy and History of Science and Technology of the University of Puerto Rico in Mayagiiez The Spanish language proceedings of that conference have been published in Carl Mitcham and Margarita M Peiia Borrero with Elena Lugo and James Ward eds El nuevo mundo de la filosofta y la tecnolog a University Park PA STS Press 1990 This volume contains thirty two papers twenty two summaries an introduction and

biographical notes to provide a full record of that seminal gathering Discussions with Paul T Durbin and others including many who participated in the Second Inter American Congress on Philosophy of Technology University of Puerto Rico in Mayagiiez March 199 raised the prospect of an English language proceedings in the Philosophy and Technology series But after due consideration it was agreed that a more general volume was needed to introduce English speaking readers to a growing body of literature on the philosophy of technology in the Spanish speaking world As such the present volume includes Spanish as well as Latin American authors historical and contemporary figures some who did and many who did not The SAGE Handbook of Digital Technology Research Sara participate in the first and second inter American congresses Price, Carey Jewitt, Barry Brown, 2013-08-06 Research on and with digital technologies is everywhere today This timely authoritative Handbook explores the issues of rapid technological development social change and the ubiquity of computing technologies which have become an integrated part of people's everyday lives. This is a comprehensive up to date resource for the twenty first century It addresses the key aspects of research within the digital technology field and provides a clear framework for readers wanting to navigate the changeable currents of digital innovation Main themes include Introduction to the field of contemporary digital technology research New digital technologies key characteristics and considerations Research perspectives for digital technologies theory and analysis Environments and tools for digital research challenges Aimed at a social science audience it will be of particular value for postgraduate students researchers and academics interested in research on digital technology or using digital technology to undertake research Technology and the Character of Contemporary Life Albert Borgmann, 2024-05-31 Blending social analysis and philosophy Albert Borgmann maintains that technology creates a controlling pattern in our lives This pattern discernible even in such an inconspicuous action as switching on a stereo has global effects it sharply divides life into labor and leisure it sustains the industrial democracies and it fosters the view that the earth itself is a technological device He argues that technology has served us as well in conquering hunger and disease but that when we turn to it for richer experiences it leads instead to a life dominated by effortless and thoughtless consumption Borgmann does not reject technology but calls for public conversation about the nature of the good life He counsels us to make room in a technological age for matters of ultimate concern things and practices that engage us in their own right Environmental Science and Technology Parvinder Singh Sandhu, 2010

21st Century Anthropology: A Reference Handbook H. James Birx,2010-06-10 Highlighting the most important topics issues questions and debates these two volumes offer full coverage of major subthemes and subfields within the discipline of anthropology Philosophers of Technology Stig Børsen Hansen,2020-09-07 Technology is increasingly subject of attention from philosophers Philosophical reflection on technology exhibits a wide and at times bewildering array of approaches and modes of thought This volume brings to light the development of three schools in the philosophy of technology Based on thorough introductions to Karl Marx Martin Heidegger's and John Dewey's thought about technology

the volume offers an in depth account of the way thinkers in the critical the phenomenological and the pragmatic schools have respond to issues and challenges raised by the works of the founders of these schools Technologies in almost any aspect of human life is potentially subject of philosophical treatment To offer a focused demonstration of key arguments and insights the presentation of each school is concluded with a contribution to discussions of educational technologies In addition to philosophers seeking a valuable and clear structuring of a still burgeoning field the volume is of interest to those working with educational philosophy and value sensitive design Stig B rsen Hansen s book is a must for all interested in understanding the development of the philosophy of technology and the relation of thoughts of thinkers that have shaped the area The author presents a new and refreshing take on the ideas from Marx to Marcuse from Dewey to Latour and Heidegger to Borgmann It will engage and hopefully provoke Dr Jan Kyrre Berg Friis University of Copenhagen Environment,

Science, Technology and Society Wenceslao J. González, 2005 The emphasis on the realm of Science Technology and Society or Science and Technology Studies may have the same degree of relevance that the historical turn had in the past It is a social turn which affects philosophy of science as well as philosophy of technology It includes a new vision of the aims processes and results of scientific activities and technological doings because the focus of attention is on several aspects of science and technology which used to be considered as secondary or even irrelevant This turn highlights science and technology as social undertakings rather than intellectual contents According to this new vision there are several important changes as to what should be studied the objects of research how it should be studied the method and what the consequences for those studies are The new focus of attention can be seen in many changes and among them are several of special interest a from what science and technology are in themselves mainly epistemic contents to how science and technology are made largely social constructions b from the language and structure of basic science to the characteristics of applied science and the applications of science c from technology as a feature through which human beings control their natural surroundings a step beyond technics due to the contribution of science to technology as a social practice and an instrument of power and d from the role of internal values necessary for mature science and innovative technology to the role of contextual or external values cultural political economic of science and technology Wenceslao J Gonzalez is professor of logic and philosophy of science at the University of A Coru a Spain He has been vicedean of the School of Humanities and president of the Committee of Doctoral Programs at the University He has been a visting researcher at the Universities of St Andrews M nster and London London School of Economics as well as Visiting fellow at the Center for Philosophy of Science University of Pittsburgh He has given lectures at the Universities of Pittsburgh Stanford Quebec and Helsinki The conferences in which he has participated include those organized by the Universities of Uppsala New South Wales Bologne and Canterbury New Zealand He has edited 20 volumes and published 70 papers He is the editor of the monographic issues
