The Philosophy of Human Nature Howard P. Kainz, 2015-11-05 What exactly is human nature What makes humans different from animals if there is any difference In this book Howard Kainz presents a philosophical analysis of the various concepts of human nature and the many controversies that have surrounded them for centuries He explores issues such as whether human beings are truly free whether human instincts differ from animal instincts and the realities of human maturity

The Ascent of Man James F. Harris, 2011-12-31 The Ascent of Man develops a comprehensive theory of human nature James F Harris sees human nature as an emergent property that supervenes a cluster of properties Despite significant overlap between individuals that have human nature and those that are biologically human the concept of human nature developed in this book is different Whether biologically human or not an individual may be said to possess human nature This theory of human nature is called the cluster theory Harris takes as his point of departure Plato's comment that in learning what a thing is we should look to the ways in which it acts upon or is acted upon by other things He commits to a methodological naturalism and draws upon current views from the social and biological sciences The cluster theory he develops represents one of the very few completely novel theories of human nature developed in the post Darwin era It will prove most useful in dealing with philosophical questions involving such contemporary issues as cloning cybernetics and the possibility of extraterrestrial life The fundamental conceptual issue is how plastic and elastic is the nature of human nature Just how different might we imagine human beings to be and still be human in the sense that they still possess whatever it is that accounts for a unique nature The theory of human nature developed in this book is a descriptive dynamic bottom up non essentialist naturalist theory Harris is well versed in classical philosophy and contemporary behavioral science He writes in a graceful open ended way that both educates and illuminates renewed interest in what it means to be human

Philosophy of Human Nature Jeffrey Tiel, 2012-11-30 Why bother being good if you could get away with being bad What do you do when you believe no one is looking Can you be happy without being good These questions go to the heart of one of the most important and troubling problems in our lives the value of morality But these problems do not belong solely to our own time for every thoughtful person from any historical period at any age from child to grandparent feels their force They are perennial philosophical

questions about the very meaning of life So it comes as no surprise to discover that the greatest philosophical work ever written Plato s Republic engages just these issues Joining Plato s character Socrates at the beginning of this quest for value in human life Philosophy of Human Nature follows the trek of the ancients the Christians the moderns and contemporary thinkers as they pursue this quarry **Philosophy of Human Nature** Douglas Kries,2018 **The Philosophy of Human Nature** George Klubertanz,2022-10-18 No realistic philosophy can be considered complete unless it includes a philosophy of nature The philosophy of human nature is an area where most of the problems of the philosophy of nature occur some of them in a crucial form Moreover the philosophy of human nature is an absolute prerequisite for a philosophically grounded ethics Clearly then a knowledge of the philosophy of St Thomas Aquinas requires a study of the philosophy of human nature

The Philosophy of Human Nature, in Its Physical, Intellectual, and Moral Relations Henry M'cormac,2015-09-27 Excerpt from The Philosophy of Human Nature in Its Physical Intellectual and Moral Relations With an Attempt to Demonstrate the Order of Providence in the Three Fold Constitution of Our Being The following Work is an attempt to lay down the more important conditions of our being to trace their various relations the laws which regulate them and their first origin Consciousness has been considered with reference to its three grand elements and every thing has been enumerated that was calculated to throw any light on its complicated and most interesting phenomena It appeared self evident that certain physical moral and intellectual states were more conducive to virtue and happiness than others that there was a close connexion between them and that the whole might be successively elucidated beginning with the most elementary and ending with the most complex It likewise seemed that to execute this to shew the mutual dependance of these states and the necessity of improving each to secure the joint perfection of all might be of some service to the cause of humanity that religion and morality might be promoted by demonstrating independent of other sanctions and considerations that there was a natural bond of obligation tending to the maintenance of our well being which could not be infringed without the certain contingency of misery evil and disease Our position on earth our expectations here and hereafter and the detail of our various duties are fully adequate to occupy the attention of the most zealous inquirer It has not been thought requisite to attempt any formal demonstration of the being of a God but it was conceived imperatively so to enlarge on his boundless wisdom and power and to dwell upon every practicable illustration of his Divine Providence About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

Theories of Human Nature - Third Edition Peter Loftson,2006-01-06 This book explores the idea of human nature

and the many understandings of it put forward by such diverse figures as Aristotle Rousseau Marx Freud Darwin and E O Wilson Each chapter looks at a different theory and offers a concise explanation assessing the theory's plausibility without forcing it into a mould Some chapters deal with the ideas of only one thinker while others such as the chapters on liberalism and feminism present a variety of different positions A clear distinction is made between theories of human nature and the political theories which so often follow from them For the new edition Loftson has addressed the new developments in the rapidly expanding genetic and paleontological record as well as expanded the discussion of the Christian theory of human nature by incorporating the ideas of the Marx scholar and social theorist G A Cohen The new edition has also been substantively revised and updated throughout

Exploring Personhood Joseph Torchia, OP, 2007-10-23 Exploring Personhood examines the metaphysical underpinnings of theories of human nature personhood and the self The history of western philosophy provides the framework for broaching critical questions pertinent to these three topics The book explores philosophical anthropology on its most foundational level with a focus on the basic constituents of the unified self The coverage of the work is broad in scope moving from the Pre Socratics to Postmodernism critically assessing what transpired during the intervening 2500 year period but with special attentiveness to the contributions of the Aristotelian Thomistic tradition of inquiry While each chapter can stand on its own they collectively reveal a developing story that finds expression in diverse attempts to come to terms with what it means to be human and how we understand ourselves as persons This book is designed to meet the needs of a wide range of readers from beginners to more advanced students

Modern Philosophies of Human Nature P. Langford, 2012-12-06 General Argument My aim is to survey some of the most influential philosophical writers on human nature from the time that Augustine codified Christian belief to the present During this period philosophical opinions about human nature underwent a transformation from the God centered views of Augustine and the scholastics to the human centered ideas of Nietzsche Freud and Sartre While one aim has simply been to provide a handy survey I do have three polemical purposes One is to oppose the notion that the modernism of more recent writers was produced by methodological innovations According to both Freud and Sartre as well as other key figures like Lacan and Heidegger their views were the product of new methods of investigating human nature namely those of psychoanalysis and the phenomenological reduction Psychoanalysis claimed to use the interpretation of both dreams and the relationship between analyst and patient to penetrate the unconscious Phenomenology has claimed that trained philosophers are able to obtain a privileged view of consciousness by a special act of thought called the phenomenological reduction which enables them to view consciousness without preconceptions On many issues my sympathies are with Nietzsche rather than with Freud or phenomenology This is also the case regarding methodology Nietzsche saw quite clearly that the possibility of popularising the views he himself held came from the decline of Christianity My rejection of exclusive reliance upon the methodologies of psychoanalysis and phenomenology is based on two lines of argument
