The Value of Knowledge

First published Tue Aug 21, 2007; substantive revision Mon Jun 27, 2022

The value of knowledge has always been a central topic within epistemology. Going all the way back to Plato's *Meno*, philosophers have asked, why is knowledge more valuable than mere true belief? Interest in this question has grown in recent years, with theorists proposing a range of answers. But some reject the premise of the question and claim that the value of knowledge is 'swamped' by the value of true belief. And others argue that statuses other than knowledge, such as justification or understanding, are distinctively valuable. We will call the general question of why knowledge is valuable the *value problem*.

Philosophy Being Knowledge And Value For University Of Alabamapb2003:

The Continuum Companion to Epistemology Andrew Cullison, 2012-08-09 The Continuum Companion to Epistemology offers the definitive guide to a key area of contemporary philosophy The book covers all the fundamental questions asked by epistemology areas that have continued to attract interest historically as well as topics that have emerged more recently as active areas of research Sixteen specially commissioned essays from an international team of experts reveal where important work continues to be done in the area and most valuably the exciting new directions the field is taking The Companion explores issues pertaining to foundationalism coherentism infinitism reliabilism proper functionalism evidentialism skepticism contextualism epistemic relativism intuition and experience Featuring a series of indispensable research tools including an A to Z of key terms and concepts a chronology a detailed list of resources and a fully annotated bibliography this is the essential reference tool for anyone working in contemporary epistemology **Value-Free Science**

Harold Kincaid, John Dupre, Alison Wylie, 2007-03-15 It has long been thought that science is our best hope for realizing objective knowledge but that to deliver on this promise it must be value free Things are not so simple however as recent work in science studies makes clear The contributors to this volume investigate where and how values are involved in science and examine the implications of this involvement for ideals of objectivity **John McDowell on Worldly Subjectivity** Tony Cheng, 2021-04-08 John McDowell's philosophical ideas are both influential and comprehensive encompassing philosophy of mind philosophy of language epistemology ethics metaphysics and the history of philosophy This book is a much needed systematic overview of McDowell's thought that offers a clear and accessible route through the main elements of his philosophy Arguing that the world and minded human subject are constitutively interdependent the book examines and critically engages with McDowell's views on naturalism of second nature the inner space model intentionality personhood and practical wisdom The book presents novel discussions on the debates between McDowell and other key philosophers including Hubert Dreyfus Robert Brandom Hans Georg Gadamer Donald Davidson Maurice Merleau Ponty and Immanuel Kant amongst others Demonstrating a thorough understanding of McDowell's work Tony Cheng makes connections to both the phenomenological tradition and cognitive sciences to show the wider relevance of McDowell's philosophy In doing so he sheds light on how influential McDowell's thought is to the analytic tradition **Human Enhancement and Well-Being**

Emma C. Gordon, 2022-12-30 New technologies and medicines make it increasingly possible to enhance human functioning in new ways to become smarter more emotionally attuned and perhaps even morally better But just because we can use the latest science to improve ourselves should we This book has two main aims First it outlines and criticises the six main contemporary arguments for scepticism about the role of human enhancements in promoting well being These arguments concern respectively i the value of achievements ii freedom iii hyperagency iv human nature v authenticity and vi inequality It will be shown for the first time in a book length treatment why the overarching bioconservative case against enhancement

doesn't hold water. The second central aim of the book is positive as we'll see: each of the bioconservative critiques considered and rejected will be shown to nonetheless motivate a distinctive kind of theoretical desideratum that a viable positive enhancement proposal should satisfy. The remainder of the book then defends a two-part enhancement proposal that will be shown to clearly satisfy the theoretical desiderata that emerged from reflecting on the earlier critique of bioconservatism. The first part of the positive proposal motivates and outlines the general role of an enhancement counsellor in facilitating voluntary enhancement. I then offer an applied case study of this role in the special case of enhancement for the purpose of facilitating romantic and parental relationships. *Human Enhancement and Well-Being: A Case for Optimism* will be of interest to scholars and advanced students working in applied ethics, bioethics, philosophy of technology, philosophy of well-being and social epistemology.

Approaches to Legal Ontologies Giovanni Sartor, Pompeu Casanovas, Mariangela Biasiotti, Meritxell Fernández-Barrera, 2010-12-25. The book provides the reader with a unique source regarding the current theoretical landscape in legal ontology engineering as well as on foreseeable future trends for the definition of conceptual structures to enhance the automatic processing and retrieval of legal information in the Semantic Web framework. It will thus interest researchers in the domains of the SW legal informatics, Artificial Intelligence and law, legal theory and legal philosophy as well as developers of e-government applications based on the intelligent management of legal or public information to provide both back office and front office support.

Social and Ethical Considerations of AI in East Asia and Beyond Levi Checketts, Benedict S. B. Chan, 2025-02-17. This book is a global reflection on disparate religious and philosophical approaches to questions of AI and the particular ways these questions affect East Asian societies. These chapters originate from a conference held at Hong Kong Baptist University in April 2023 on Ethical and Social Issues in AI East Asia and Beyond. Sections cover Confucianist, Daoist and Christian reflections on AI ethics. Chapters on broad theoretical questions that AI poses are included as well as those addressing issues in applied AI ethics. This volume appeals to students and researchers working across cultures and traditions on the philosophy of AI technology.

Methods in the Philosophy of Science Sophie J. Veigl, Adrian Currie, 2025-07-15. A guidebook to methods and methodology encouraging deeper engagement across the philosophy of science and beyond. The last twenty years have seen multiple methodological revolutions in the philosophy of science. There has been increased diversity concerning the questions asked, who asks those questions, who the relevant audiences are and what the techniques and tools involved are. In *Methods in the Philosophy of Science: A User's Guide*, Sophie Veigl and Adrian Currie introduce this range of methods through both practical advice and philosophical reflection. Each chapter introduces the reader to a method or set of methods in the philosophy of science, discusses its advantages and limitations and provides practical guidance on how to learn skills relevant to applying the method. The volume fulfills several critical roles. First, by introducing and discussing methods in the philosophy of science, the collection increases philosophers' awareness of methodological options of particular importance for younger scholars who are

often not exposed to the diversity of practice Second the collection s practical focus will aid established philosophers in diversifying their own methodological toolkits Third collecting this diversity serves as a ground for philosophical reflection on what we as philosophers take ourselves to be capable of Fourth the collection hopes to increase interdisciplinary links between philosophy and other fields by laying clear the methodological continuity and complement between them

Educating for

Civic-mindedness Carolin Kreber,2016-06-17 Imagined at their best how might professions contribute most effectively to their local and global communities and how could higher education support graduates future professionals in making this contribution The answer proposed in this book is to educate students for civic mindedness an overarching professional capability grounded in certain dispositions and qualities ideals types of knowledge and political emotions Civic mindedness and its internal counterpart the practitioner s self cultivation give rise to an engagement with professional practice that is authentic civic and democratic The tension between responsiveness or regard for others and regard for self is overcome by recognising that authentic professional identities are constructed through practices around shared purposes and ideals Drawing on a wide range of theorists including Dewey Arendt and Nussbaum professions are envisaged to play a vital role Primarily professions support society s well being by ensuring access to public goods such as local and global justice access

to information health education safety housing the beauty and sustaining power of the ecological environment among others Yet professions also protect the fundamental good of citizen participation in free deliberation and decision making on issues affecting their lives The book concludes with a vision of higher education that is transformative of graduates professionals pedagogies professional practices and communities Issues of increasing social awareness are a key concern for anyone involved in teaching professionals and this book which builds best practice around a sound theoretical and philosophical framework will prove both thought provoking and practical in application **Freedom After the Critique of Foundations**

A. Kioupkiolis,2012-07-25 An exploration of the contemporary re conception of freedom after the critique of objective truths and ideas of an unchanging human nature in which modern self determination was grounded This book focuses on the radical theorist Cornelius Castoriadis and the new paradigm of agonistic autonomy is contrasted with Marxian and liberal approaches **Self-Evaluation** Anita Konzelmann Ziv,Keith Lehrer,Hans Bernhard Schmid,2011-06-25 The book contains

contributions by leading figures in philosophy of mind and action emotion theory and phenomenology As the focus of the volume is truly innovative we expect the book to sell well to both philosophers and scholars from neighboring fields such as social and cognitive science The predominant view in analytic philosophy is that an ability for self evaluation is constitutive for agency and intentionality Until now the debate is limited in two possibly mutually related ways Firstly self evaluation is usually discussed in individual terms and as such not sufficiently related to its social dimensions secondly self evaluation is viewed as a matter of belief and desire neglecting its affective and emotional aspects The aim of the book is to fill these research lacunas and to investigate the question of how these two shortcomings of the received views are related *Child*

and Adolescent Mental Health Services Richard Williams,Michael Kerfoot,2005-01-20 This volume synthesizes material and evidence on how best to plan and deliver child and adolescent mental health care services providing a one stop reference guide for all those with responsibility for these services It includes a concise update on the most common child psychiatric conditions *The Metaphysics of Epistemology* Ernest Sosa,Enrique Villanueva,2007-10-22 Papers by leading figures on
