Philosophy Of Symbolic Forms The Phenomenology Of Knowledge:

The Philosophy of Symbolic Forms Ernst Cassirer, 1965-09-10 The Symbolic Forms has long been considered the greatest of Cassirer's works. Into it he poured all the resources of his vast learning about language and myth, religion, art and science, the various creative symbolizing activities and constructions through which man has expressed himself and given intelligible objective form to this experience. These three volumes alone, apart from Cassirer's other papers and books, make an outstanding contribution to epistemology and to the human power of abstraction. It is rather as if The Golden Bough had been written in philosophical rather than in historical terms. F. I. G. Rawlins, Nature.

The Philosophy of Symbolic Forms: The phenomenology of knowledge Ernst Cassirer, 1955

The Philosophy of Symbolic Forms, Volume 3 Ernst Cassirer, 2020-09-24 In his Phenomenology of Cognition, Cassirer provides a comprehensive and systematic account of the dynamic process involved in the whole of human culture as it progresses from the world of myth and its feeling of social belonging to the highest abstractions of mathematics, logic and theoretical physics. Cassirer engages with the most sophisticated and cutting edge work in fields ranging from ethnology to classics, Egyptology and Assyriology to ethology, brain science and psychology to logic, mathematics and theoretical physics. His command of philosophy, literature and the arts is superb. Echoing his work on Kant, Cassirer begins The Philosophy of Symbolic Forms with the problem posed by the meaning of being for philosophy since Plato. But Cassirer also shows that this problem gains new significance with Kant and with the development of modern culture. Cassirer weaves his conception of the development of knowledge into a broadly Kantian and German idealist dynamic historical conception of significance and of experience that refuses to accept a fundamental opposition between literary, philosophical and scientific culture. In consequence of his great vision grounded in careful reflection and argument, Cassirer's systematic conception of the Copernican cosmopolitan cosmological revolution is still philosophically and scientifically unmatched in contemporary philosophy on both sides of the Atlantic and of the Pacific. Pierre Keller, Professor of Philosophy, University of California, Riverside, USA. This new translation makes Cassirer's seminal work available to a new generation of scholars. Each volume includes a translator's introduction by Steve G. Lofts, a foreword by Peter E. Gordon, a glossary of key terms and an index.

The Philosophy of Susanne Langer Adrienne Dengerink Chaplin, 2019-10-17 This book is a comprehensive study of one of the most insightful and fertile but also most neglected philosophers of the twentieth century Susanne Langer Failure to recognise Langer's seminal philosophical sources has led to frequent misinterpretations and misunderstandings of her unique philosophical thought Beginning with an overview of Langer's life and education this study provides a much needed explanation of how Langer's thinking was shaped by four seminal sources her mentors Henry Sheffer and Alfred North Whitehead and the European philosophers Ernst Cassirer and Ludwig Wittgenstein Langer's ability to unite seemingly disparate fields such logic art and embodied cognition around the notion of symbolic form places aesthetics not at the margins of philosophy but at its very centre By locating Langer's work in the broader context of major developments in twentieth century European and American philosophy Dengerink Chaplin shows how she was often ahead of her time Shedding new light on Langer as an American philosopher whose innovative thought crosses the customary boundaries between analytic and continental philosophy this book confirms why she continues to have relevance today

German Philosophy and the First World War Nicolas de Warren, 2023-04-20 How did the First World War the so called Great War widely seen on all sides as the war to end all wars impact the development of German philosophy Combining history and biography with astute philosophical and textual analysis Nicolas de Warren addresses here the intellectual trajectories of ten significant wartime philosophers Ernst Bloch Martin Buber Ernst Cassirer Hermann Cohen Gyrgy Lukcs Martin Heidegger Edmund Husserl Franz Rosenzweig Max Scheler and Georg Simmel In exploring their individual works written during and after the War the author reveals how philosophical concepts and new forms of thinking were forged in response to this unprecedented catastrophe In reassessing standardized narratives of German thought the book deepens and enhances our understanding of the intimate and complex relationship between philosophy and violence by demonstrating how the 1914-18 conflict was a crucible for ways of thinking that still define us today

Moynahan, 2013-07-15 Recovering a lost world of the politics of science in Imperial Germany Gregory B Moynahan approaches the life and work of the philosopher and historian Ernst Cassirer 1874-1945 from a revisionist perspective using this framework to redefine the origins of twentieth century critical historicism and critical theory The only text in English to focus on the first half of the polymath Cassirer's career and his role in the Marburg School this volume illuminates one of the most important and in English least studied reform movements in Imperial Germany

Moral Philosophy and Moral Education Thora Ilin Bayer, 2017-06-09 Moral Philosophy and Moral Education considers the interconnections of ethics education and the philosophy of culture as related to the human concern with self knowledge The individual self finds its inner life writ large in the forms of culture such as religion art and history Such forms of cultural life represent and embody normative ideals that can provide the necessary content to shape the character and the conduct of civic life Thora Ilin Bayer draws upon the ancient Greek view of education as *paideia* and the conception of *Bildung* of the German idealist philosophers These two ideas of education aim at the development of the whole person as distinct from training in a particular skill subject matter technique or occupation The education of the whole person aims at the production in the individual of a broad mental outlook harmoniously joined with a knowledge of the great perspectives and principles of human culture as it takes its various shapes within the history of humanity Moral philosophy requires both culture and the individual as its terms of inquiry and moral education requires a vision of how to have these two terms interact to form a whole
