Philosophy And Culture Essays In Honor:

Philosophy in Culture J. Tosam, Peter Takov, 2016-09-13 This book explores the symbiotic relationship between philosophy and culture Every philosophy emerges as a reaction to or as justification for a particular culture and it is for this reason that philosophy may differ from one culture to another It argues that philosophy is an essential part of every culture Philosophy is the means by which every culture provides itself with justification for its values beliefs and worldview and also serves as a catalyst for progress Philosophy critically questions and confronts established beliefs customs practices and institutions of a society As reflective critical thinking philosophy is linked to a way of life a form of enquiry intended to guide behaviour a form of thinking that sharpens and broadens our intellectual horizon scrutinizes our assumptions and clarifies the beliefs and values by which we live Philosophy helps to liberate the individual from the imprisonment of ignorance prejudice superstition narrow mindedness and the despotism of custom Culture constitutes the raw data the laboratory from which philosophers do their analytic experimentation Culture is considered as philosophy of the first order activity The book maintains that any genuine global philosophy must include philosophical traditions from all cultures and regions of the world as it is by seeking alternative philosophical answers to some of the thorniest problems facing humanity that we are most likely to find more lasting solutions to some global problems In this commitment to a universal humanity we cannot afford to depend on solutions from a single culture or from the most influential cultures Philosophy and Culture Donald Phillip Verene, 2002

Nietzsche, Epistemology, and Philosophy of Science Babette Babich, Robert S. Cohen, 1999-08-31 Nietzsche Epistemology and Philosophy of Science is the second volume of a collection on Nietzsche and the Sciences featuring essays addressing truth epistemology and the philosophy of science with a substantial representation of analytically schooled Nietzsche scholars This collection offers a dynamic articulation of the differing strengths of Anglo American analytic and contemporary European approaches to philosophy with translations from European specialists notably Carl Friedrich von Weizsäcker Paul Valadier and Walther Ch Zimmerli This broad collection also features a preface by Alasdair MacIntyre Contributions explore Nietzsche's contributions to the philosophy of language and epistemology and include essays on the social history of truth and the historical and cultural analyses of Serres and Baudrillard as well as new contributions to the philosophy of science including theological and hermeneutical approaches history of science the philosophy of medicine cognitive science and technology History of Islamic Philosophy Seyyed Hossein Nasr, Oliver Leaman, 2013-03-07 Islamic philosophy has often been treated as being largely of historical interest belonging to the history of ideas rather than to philosophical study This volume successfully overturns that view Emphasizing the living nature and rich diversity of the subject it examines the main thinkers and schools of thought discusses the key concepts of Islamic philosophy and covers a vast geographical area This indispensable reference tool includes a comprehensive bibliography and an extensive index *Metaphysical Themes in Thomas Aquinas II* John F. Wippel, 2007-03 This volume contains eleven articles and book chapters written by John Wippel

since the publication of his *Metaphysical Themes* in Thomas Aquinas in 1984 **It Could Have Been Otherwise** Hester Goodenough Gelber, 2004-01-01 This description of Dominicans at Oxford from 1300 1350 and the theology of Hugh of Lawton Arnold of Strelley William Crathorn and Robert Holcot reclaims the Dominicans as highly original contributors to theology and philosophy at a time of great innovation Routledge History of World Philosophies Seyyed Hossein Nasr, 1996 Islamic Philosophy has often been treated as mainly of historical interest belonging to the history of ideas rather than to philosophy This is volume challenges this belief The Routledge History of Philosophy is made up entirely of essays by a distinguished list of writers They provide detailed discussions of the most important thinkers and the key concepts in Islamic philosophy from earliest times to the present day The Cambridge Companion to Medieval Jewish Philosophy Daniel H. Frank, Oliver Leaman, 2003-09-11 From the ninth to the fifteenth centuries Jewish thinkers living in Islamic and Christian lands philosophized about Judaism Influenced first by Islamic theological speculation and the great philosophers of classical antiquity and then in the late medieval period by Christian Scholasticism Jewish philosophers and scientists reflected on the nature of language about God the scope and limits of human understanding the eternity or createdness of the world prophecy and divine providence the possibility of human freedom and the relationship between divine and human law Though many viewed philosophy as a dangerous threat others incorporated it into their understanding of what it is to be a Jew This Companion presents all the major Jewish thinkers of the period the philosophical and non philosophical contexts of their thought and the interactions between Jewish and non Jewish philosophers It is a comprehensive introduction to a vital period of Jewish intellectual history *Bulgarian Studies in the Philosophy of Science* D. Ginev, 2013-06-29 This volume attempts to provide a new articulation of issues surrounding scientific realism scientific rationality the epistemology of non classical physics the type of revolutionary changes in the development of science the naturalization of epistemology within frameworks of cognitive science and structural linguistics models of the information technology revolution and reconstructions of early modern logical systems **Personal Identity, the Self, and Ethics** F. Santos, Santiago Sia, 2007-08-16 Going beyond the controversy surrounding personhood in non philosophical contexts this book defends the need for a credible philosophical conception of the person Engaging with John Locke Derek Parfit and P F Strawson the authors develop an original philosophical anthropology based on the work of Charles Hartshorne and A N Whitehead

Mechanics and Natural Philosophy before the Scientific Revolution Walter Roy Laird, Sophie Roux, 2008-01-01 Modern mechanics was forged in the seventeenth century from materials inherited from Antiquity and transformed in the period from the Middle Ages through to the sixteenth century These materials were transmitted through a number of textual traditions and within several disciplines and practices including ancient and medieval natural philosophy statics the theory and design of machines and mathematics This volume deals with a variety of moments in the history of mechanics when conflicts arose within one textual tradition between different traditions or between textual traditions and the wider world of

practice Its purpose is to show how the accommodations sometimes made in the course of these conflicts ultimately contributed to the emergence of modern mechanics The first part of the volume is concerned with ancient mechanics and its transformations in the Middle Ages the second part with the reappropriation of ancient mechanics and especially with the reception of the Pseudo Aristotelian Mechanica in the Renaissance and the third and final part with early modern mechanics in specific social national and institutional contexts **International Philosophical Quarterly** ,2003 **Leibniz's**

Metaphysics of Time and Space Michael Futch,2008-04-05 Leibniz s metaphysics of space and time stands at the centre of his philosophy and is one of the high water marks in the history of the philosophy of science In this work Futch provides the first systematic and comprehensive examination of Leibniz s thought on this subject In addition to elucidating the nature of Leibniz s relationalism the book fills a lacuna in existing scholarship by examining his views on the topological structure of space and time including the unity and unboundedness of space and time It is shown that like many of his more recent counterparts Leibniz adopts a causal theory of time where temporal facts are grounded on causal facts and that his approach to time represents a precursor to non tensed theories of time Futch then goes on to situate Leibniz s philosophy of space and time within the broader context of his idealistic metaphysics and natural theology Emphasizing the historical background of Leibniz s thought the book also places him in dialogue with contemporary philosophy of science underscoring the enduring philosophical interest of Leibniz s metaphysics of time and space **Philosophy Culture and Vision: African**

Perspectives Gyekye, Kwame,2014-05-08 Believing that the intellectual enterprise called philosophy is essentially a part of the cultural as well as historical experience of a people that the concepts and problems that occupy the attention of philosophers placed in different cultural spaces or historical times generally derive directly from those spaces and times and that philosophy in turn has been most relevant to the development of human cultures the Ghanaian philosopher Kwame Gyekye gives reflective attention in this book to some of the concepts and problems that in his view feature most prominently in the contemporary African cultural social political and moral experience Such concepts and problems include the following political legitimacy development culture and the pursuit of science and technology political corruption democracy representation and the politics of inclusion the status of cultural values in national orientation understanding globalization and others It is these topics that are covered in the essays collected in this book The unrelenting pursuit of the speculative activity by the philosopher in most cases eventuates in normative proposals these normative proposals often embody a vision a vision of an ideal human society in terms of its values politics and culture Vision understood here has human not supernatural or divine origination and involvement and requires action by human beings in order for it to come into reality A vision may derive from sustained critical evaluation of a culture or some elements of it Gyekye attempts an articulation of the visions of the essays contained in the book Even though philosophical ideas and concerns are originally inspired by and worked out in a cultural milieu it does not necessarily follow Gyekye strongly believes that the relevance of those ideas and

insights is to be tethered to the cultures that produced them For more often than not the relevance of those ideas or at least some of them transcends the confines of their own times and cultures and can be appreciated by other societies or cultures or generational epochs This trans cultural or trans epochal or meta contextual appeal or attraction of philosophical ideas and insights spawned by a particular culture or cluster of cultures or in specific historical times is to be put down to our common human nature including our basic human desires and aspirations Thus most of the essays published here should be of interest to the global community i e to cultures and societies beyond the African

Process Philosophy and Political Ideology Randall C. Morris, 1991-01-01 This book fills a significant gap in current process scholarship by providing a detailed exposition of Whitehead's and Hartshorne's social and political writings reconstructing their ideological commitments in depth and placing them in their historical context It focuses on four areas of inquiry the individual and society the ideals of freedom equality and democracy the use of coercive force within and between societies and the theory of social progress As each feature of their political thought is examined Morris shows how Whitehead's and Hartshorne's political commitments are reflected in their metaphysical principles

Encyclopedia of Medieval Philosophy Henrik Lagerlund, 2010-12-07 This is the first reference ever devoted to medieval philosophy It covers all areas of the field from 500 1500 including philosophers philosophies key terms and concepts It also provides analyses of particular theories plus cultural and social contexts

Towards a Rational Philosophical Anthropology J. Agassi, 2012-12-06 The thesis of the present volume is critical and dual 1 Present day philosophy of man and sciences of man suffer from the Greek mis taken polarization of everything human into nature and convention which is allegedly good and evil which is allegedly truth and falsity which is allegedly rationality and irrationality to wit the polarization of all fields of inquiry the natural and social sciences as well as ethics and all technology whether natural or social into the totally positive and the totally negative 2 Almost all philosophy and sciences of man share the erroneous work ethic which is the myth of man's evil nature the myth of the beast in man the doctrine of original sin To mediate or to compromise between the first view of human nature as good with the second view of it as evil sociologists have devised a modified utilitarianism with deferred gratification so called and the theory of the evil of artificial competition capitalist and socialist alike and of keeping up with the Joneses Now the mediation is not necessary For the polarization makes for abstract errors which are simplistic views of rationality such as reductionism and positivism of all sorts as well as for concrete errors such as the disposition to condemn repeatedly those human weaknesses which are inevitable namely man's inability to be perfectly rational avoid all error etc thus setting man against himself as all too wicked

Rethinking Sage Philosophy Kai Kresse, Oriare Nyarwath, 2022-11-16 Rethinking Sage Philosophy Interdisciplinary Perspectives on and beyond H Odera Orika discusses a variety of aspects of Henry Odera Orika's sage philosophy project rethinking it with a view to current demands and recent debates in scholarship across several disciplines Edited by Kai Kresse and Oriare Nyarwath the collection engages perspectives and interests from within and beyond African philosophy

and African studies including anthropology literature postcolonial critique and decolonial scholarship The chapters focus on studies of women sages sage philosophy in relation to oral literature an Acholi poem on being human in context takes on aesthetics and gender in Maasai thought a comparative discussion of Oruka's and Gramsci's approaches to the relevance of philosophy in society a critical review of method a comparative discussion dedicated to the project of decolonization with a South African case study and a conceptual reconsideration of Oruka's understanding of sages presenting the pragmatic sage as typical of the late phase of the sage philosophy project

Al-Ghazālī's Unspeakable Doctrine of the Soul Timothy J. Gianotti, 2001-08-16 This text marks a radical rethinking of the soul and the afterlife in the writings of al Ghazālī d 505 1111 particularly within his magnum opus *Reviving Religious Knowledge Ihy ul m al d n* Attending closely to variations of genre and discourse mode within his works it attempts to resolve some of the major ambiguities that have vexed al Ghazālī's readers for nearly nine hundred years Beginning with his theory of multi level multi genre writing and working through his theological philosophical and mystical positions on the soul's true nature the study culminates in an exploration of al Ghazālī's mystical psycho cosmology where some startling conclusions are drawn regarding his most intimate thoughts on the secrets of the soul and the Hereafter Meticulously researched and yet engagingly written this study speaks to both the specialist and the amateur intellectual historian

Philosophy, God and Motion Simon Oliver, 2006-04-07 In the post Newtonian world motion is assumed to be a simple category which relates to the locomotion of bodies in space and is usually associated only with physics This book shows this to be a relatively recent understanding of motion and that prior to the scientific revolution motion was a broader and more mysterious category applying to moral as well as physical movements Simon Oliver presents fresh interpretations of key figures in the history of western thought including Plato Aristotle Aquinas and Newton examining the thinkers handling of the concept of motion Through close readings of seminal texts in ancient and medieval cosmology and early modern natural philosophy the book moves from antique to modern times investigating how motion has been of great significance within theology philosophy and science Particularly important is the relation between motion and God following Aristotle traditional doctrines of God have understood the divine as the unmoved mover while post Holocaust theologians have suggested that in order to be compassionate God must undergo the motion of suffering The text argues that there may be an authentically theological as well as a natural scientific understanding of motion This volume will prove a major contribution to theology the history of Christian thought and to the growing field of science and religion
