Philosophy In The New Century:

Philosophy in the New Century (Continuum Compact) Anthony O'Hear, 2004-01-30 In this powerful re-examination of the purpose and direction of philosophy for the next century Anthony O'Hear engages with our most pressing questions: Is there knowledge outside of science? Does religion still have meaning and coherence today? What is beauty and why do so few contemporary artists believe in it? Contemporary philosophy mostly divides into the technical approach of the Anglo-Americans which is inaccessible to most and the oracular obscurantism of the Continental approach which does violence to sense and reason. O'Hear argues that philosophy should work with the grain of tradition and commonsense to understand politics, religion, aesthetics, and the vast number of ethical questions that will continue to arise as the scientific and technical revolution accelerates. Giving up philosophy's special position means giving up our best chances of thinking and acting wisely. In making a strong case for the relevance of philosophy, Anthony O'Hear presents a coherent and compelling vision for recovering wisdom in our time.

A History of Philosophy in America Bruce Kuklick, 2002-01-10 Here at last is an American counterpart to Bertrand Russell's *History of Western Philosophy*. The eminent historian Bruce Kuklick tells the fascinating story of the growth of philosophical thinking in the USA in the context of the intellectual and social changes of the times. Kuklick sketches the genesis of these intellectual practices in New England Calvinism and the writing of Jonathan Edwards. He discusses theology in the eighteenth and nineteenth centuries and the origins of collegiate philosophy in the early part of the nineteenth century. We see the development of secular preconceptions and the emergence after Darwin's writings of the mid-late nineteenth century of forms of thought hostile to religion. Philosophy is situated in a variety of cultural contexts: the ministry, the growing system of higher learning, the conflict between philosophers and theologians, and between amateur and professional thinkers, the suspicion of European ideas, and worries about the relevance of philosophy to public and political life. Kuklick's narrative portrays such great thinkers as Charles Peirce, William James, John Dewey, C. I. Lewis, Wilfrid Sellars, W. V. Quine, and Richard Rorty, and assesses their contributions to philosophy. He brings us right up to date with the first historical treatment of the period after pragmatism and the fragmentation of philosophy in the second half of the twentieth century. Kuklick steers a controversial course between the divergent views that historians and philosophers take of the significance of philosophy in recent years. Anyone interested in American intellectual history or in how philosophy got where it is today will enjoy this book.

Hermeneutic Philosophy of Science, Van Gogh's Eyes, and God B.E. Babich,2013-06-29 perceptual essences that can be rendered directly manifest in perception with the help of theoretically structured instruments serving as readable technologies Scientific knowledge should thus be understood as an extension of unassisted perception A perceptual fact has an outer horizon which separates it from the ground on which it appears and an inner horizon composed of a multiplicity of possible perceptual profiles organized by an invariant essence The perceiving subject can bring forth a representative sample of the profiles in question occasionally by making use of certain technological processes which are themselves subject to interpretation in terms of theoretical representations The theoretical entities described in these representations are not simply detected thanks to an inferential operation but rather they are directly perceived It follows from this that the correspondence between the manifest image and the scientific image is not done one to one but by a many to one or one to many application between contextually defined perceptual objects within contexts that are mutually incompatible but complementary This should not however be understood as a form of conventionalism nor as a form of cultural relativism Pre comprehension which guides interpretation imposes strict limits to the descriptive categories which can be used and to the manner in which they can be linked to appropriate empirical objects The author applies his hermeneutic principles to the study of visual perception In fact this question is treated in the first part of the book
