accounts and 3 by introducing the readers to the special features of John's Gospel. This flexible textbook's approach allows beginning students to encounter the Jesus of the Gospels on their own terms to make their new knowledge personal and practical.

Chinese Philosophy of History Dawid Rogacz, 2020-10-15. Challenging the Eurocentric misconception that the philosophy of history is a Western invention, this book reconstructs Chinese thought and offers the first systematic treatment of classical Chinese philosophy of history. Dawid Rogacz charts the development from pre-imperial Confucian philosophy of history, the Warring States period, and the Han dynasty through to the neo-Confucian philosophy of the Tang and Song era, and finally to the Ming and Qing dynasties. Revealing underexplored areas of Chinese thought, he provides Western readers with new insight into original texts and the ideas of over 40 Chinese philosophers, including Mencius, Shang Yang, Dong Zhongshu, Wang Chong, Liu Zongyuan, Shao Yong, Li Zhi, Wang Fuzhi, and Zhang Xuecheng. This vast interpretive body is compared with the main premises of Western philosophy of history in order to open new lines of inquiry and directions for comparative study. Clarifying key ideas in the Chinese tradition that have been misrepresented or shoehorned to fit Western definitions, Rogacz offers an important reconsideration of how Chinese philosophers have understood history.

Handbook of the History and Philosophy of Mathematical Practice Bharath Sriraman, 2024-04-26. The purpose of this unique handbook is to examine the transformation of the philosophy of mathematics from its origins in the history of mathematical practice to the present. It aims to synthesize what is known and what has unfolded so far, as well as to explore directions in which the study of the philosophy of mathematics, as evident in increasingly diverse mathematical practices, is headed. Each section offers insights into the origins, debates, methodologies, and newer perspectives that characterize the discipline today. Contributions are written by scholars from mathematics, history, and philosophy, as well as other disciplines that have contributed to the richness of perspectives abundant in the study of philosophy today, who describe various mathematical practices throughout different time periods and contrast them with the development of philosophy.
