**Philosophy, Politics, Autonomy: Essays in Political Philosophy** Cornelius Castoriadis, 1991 *Poststructuralist Agency* Rae Gavin Rae, 2020-02-14 Gavin Rae shows that the problematic status of agency caused by the poststructuralist decentring of the subject is a central concern for poststructuralist thinkers First Rae shows how this plays out in the thinking of Deleuze Derrida and Foucault He then demonstrates that it is with those poststructuralists associated with and influenced by Lacanian psychoanalysis that this issue most clearly comes to the fore He goes on to reveal that the conceptual schema of Cornelius Castoriadis best explains how the founded subject is capable of agency

*Politics and the Concept of the Political* James Wiley, 2016-05-26 A recent trend in contemporary western political theory is to criticize it for implicitly trying to conquer displace or moralize politics James Wiley's book takes the next step from criticizing contemporary political theory to showing what a more politics centered political theory would look like by exploring the meaning and value of politics in the writings of Max Weber Carl Schmitt Paul Ricoeur Hannah Arendt Sheldon Wolin Claude Lefort and Ernesto Laclau and Chantal Mouffe These political theorists all use the concept of the political to explain the value of politics and defend it from its detractors They represent state centered republic centered and society centered conceptions of politics as well as realist authoritarian idealist republican populist and radical democratic traditions of political thought This book compares these theorists and traditions of the political in order to defend politics from its critics and to contribute to the development of a politics centered political theory *Politics and the Concept of the Political* will be a useful resource to general audiences as well as to specialists in political theory

theory and psychoanalysis Divided into four parts the volume explores diverging meanings of the concept of violence as well as transcendent or religious violence a form of violence that takes place between humanity and the divine world Going on to investigate instances of immanent and secular violence which occur at the level of the group community or society the book concludes with an exploration of violence and meaning on the individual level violence at the level of the self or between particular persons With its focus on the manifold of relations between violence and meaning as well as its four part focus on conceptual transcendent immanent and individual violence the book is both multi directional and multi layered

essays by political theorists on Agamben's *Homo Sacer* [America After Tocqueville](#) Harvey Mitchell, 2006-11-02 *America after Tocqueville* complements Harvey Mitchell's previous book *Individual Choice and the Structures of History* Alexis de Tocqueville as Historian Reappraised 1996 This study draws on *Democracy in America* to study the condition of democracy in the United States in our own time Three aspects of Americanism inform Harvey Mitchell's book and cannot be separated

from Tocqueville's consideration of the three races. First he addresses tensions in the United States between ideas of equality and a political system that tries to keep it within bounds. He turns to the relationship between this system and the dynamics of American capitalism and he analyses the criteria for inclusion and exclusion in American life. Overall he asks if Americans have surrendered to what Tocqueville called the materialization of life if that compromise means their abandonment of their original spiritual quest and if they are on the way to a radical alienation from politics.

**Civilization, Modernity, and Critique** Lubomír Dunaj, Jeremy Smith, Kurt Mertel, 2023-05-25 *Civilization, Modernity, and Critique* provides the first comprehensive cutting edge engagement with the work of one of the most foundational figures in civilizational analysis. Johann P. Arnason. In order to do justice to Arnason's seminal and wide ranging contributions to sociology, social theory and history it brings together distinguished scholars from a variety of disciplinary backgrounds and geographical contexts. Through a critical interdisciplinary dialogue it offers an enrichment and expansion of the methodological, theoretical and applicative scope of civilizational analysis by addressing some of the most complex and pressing problems of contemporary global society. A unique and timely contribution to the ongoing task of advancing the project of a critical theory of society, this volume will appeal to scholars of sociology and social theory with interests in historical sociology, critical theory and civilizational analysis.

**The Power to Assume Form** Sean McMorrow, 2023-08-15 *The Power to Assume Form*. Cornelius Castoriadis and Regulative Regimes of Historicity examines the major contribution of Cornelius Castoriadis's work which elucidated the role of the social imaginary within human societies. What is significant, Sean McMorrow argues, is that Castoriadis's work presents a unique perspective on the regimes of historicity, modes of instituting power that establish the legitimacy of institutional order in relation to the extensive social imaginary articulations of the world. The author assesses Castoriadis's theorization of the radically creative capacity of the social imaginary and suggests that there remains a tendency to present an overly dichotomous view of autonomous and heteronomous modes of institution. McMorrow assesses how adherence to this inclination hinders the development of further insights into the creative capacities of social imaginary while also imposing limits on Castoriadis's own assessment of the partially autonomous situation of modern societies. The author suggests that one way forward is to consider the role of an implicit dimension of instituting power involved in the reproduction of dominant social imaginary articulations of the world and which also shape the regulation of historicity more generally. The main purpose of this book is to develop the critical depth of Castoriadis's work showing how it remains an insightful framework to analyze the significance of the deepening depoliticization of contemporary liberal democratic regimes and the partially autonomous dynamics that underlie their shift toward increasingly authoritarian modes of governance.

**Take Back Higher Education** Henry A. Giroux, Susan Searls Giroux, 2004-05-10 Higher education is under siege. No longer viewed as a public good, it is attacked by businesses who want to refashion institutions in the image of the marketplace. Higher education is the target of cultural conservatives who have undermined academic freedom and access by

deriding the academy as a hotbed of left multicultural radicalism and anti Americanism The historic mission to educate students as citizens motivated by democratic values is overshadowed by profit margins Giroux and Giroux argue that the greatest danger faced by higher education comes from corporatization and educational apartheid If higher education is to meet the challenges of a democratic future it must encourage students to be critical thinkers and citizens as it vouchsafes conditions for educators to produce scholarship in the service of an inclusive democracy

**Charles Taylor's Vision of Modernity** Christopher Garbowski, Jan Hudzik, Jan Kłos, 2009-05-27 Charles Taylor is currently one the most renowned and influential contemporary philosophers He is also widely quoted and discussed both in the social sciences and humanities Taylor earns this attention through his remarkable capacity for presenting his conceptions in the broadest possible intellectual and cultural context His philosophical intuition is fundamentally antinaturalistic and tends toward developing broad syntheses without a trace of systematizing thinking or any anarchic postmodernist methodology His thought unites the past with the present while culture is treated as a broad mosaic of discourses Religion art science philosophy politics and ethics are all fields through which the Canadian philosopher deftly moves about in his search for their hidden structures and deepest sense Taylor s philosophical output is prodigious Recently as his monumental study *A Secular Age* 2007 indicates he has been concentrating much of his attention on the problem of secularization The selection of contributions in the current volume proffer a penetrating cross section of Taylor s thought They are derived from a conference held in October 2008 in Lublin Poland Although some of the articles are focused on a reconstruction of the philosopher s concepts most either engage in a polemic with elements of his thought or find inspiration in it for their own reflections The contributions are grouped in four parts 1 philosophy and the modern self 2 the problem of secularization 3 between liberalism and communitarianism and 4 language literature and culture

*Trouble with Democracy* Gerard Rosich, 2016-01-18 Western political thought has long maintained that democracy once achieved is here to stay This view appears to be supported by successive waves of democratisation across the world but in truth the political situation of our time is much more ambiguous On the one hand the commitment to democracy seems to be more widely shared than ever on the other popular will has ever less impact on political decisions because of alleged constraints in an era of globalisation Existing democracies suffer from a combination of technocratic governance and populist reactions Global political communication has foundered with addressing urgent problems such as climate change global social justice and economic financial crises By placing political condition of our time in its long term historical context this book radically reconsiders key issues of political thought and gives you a comparative exploration of the current experiences of democracy in several world regions

**Sigmund Freud as a Critical Social Theorist** , 2024-12-02 Sigmund Freud s work has influenced the modern world in many profound ways The father of psychoanalysis Freud wrote numerous works wherein his psychoanalytic perspectives were applied to history society religion and other cultural phenomenon By expanding his psychoanalytic theories into these realms Freud insured his place within

the disciplines of philosophy sociology history theology and religious studies wherein his works are still studied More specifically his psychoanalytic theories were adopted revised and expanded upon by philosophers and sociologists such as Theodor W Adorno Erich Fromm Herbert Marcuse J rgen Habermas Jacques Derrida Julia Kristeva Gilles Deleuze Judith Butler Slavoj i ek and many others who in some cases radicalized the latent political content within Freud s thought using it to critique modern industrialized capitalism and theorize about the possibility for alternative forms of societies more conducive towards mental health Although Freud is often marginalized or even denigrated we think there are still elements within the corpus of Freud s work that are valuable for both diagnosing social problems and addressing such problems psychoanalytically The book demonstrates the lasting relevancy of Freud s thought to a variety of disciplines as they diagnose a myriad of social issues

Trifonas,2005-11-04 Responding to Jacques Derrida s vision for what a new humanities should strive toward Peter Trifonas and Michael Peters gather together in a single volume original essays by major scholars in the humanities today Using Derrida s seven programmatic theses as a springboard the contributors aim to reimagine as Derrida did the tasks for the new humanities in such areas as history of literature history of democracy history of profession idea of sovereignty and history of man Deconstructing Derrida engages Jacques Derrida s polemic on the future of the humanities to come and expands on the notion of what is proper to the humanities in the current age of globalism and change

Modern Confessional Writing Jo Gill,2006 This collection of essays provides a critique of the popular and powerful genre of confessional writing Contributors discuss a range of poetry prose and drama including the work of John Berryman Anne Sexton Ted Hughes and Helen Fielding

*Visualising the Empire of Capital* Martyn Hudson,2019-08-21 Methods of visualising modernity and capitalism have been central to classical social science Those methods of seeing specifically in the work of Marx were attempts to capture visually the fragmenting edifice of capital in its death throes and were part of a project to hasten its demise yet capitalism persisted and perpetuated itself in new forms such that its demise now looks less likely than it did 150 years ago This book argues for a new way of understanding Marx and a new way of approaching both capitalist modernity and Marx s Capital by rethinking the nature of vision Through studies of visualisation in relation to machines and the monstrous memory mirrors and optics and the invisible Visualising the Empire of Capital offers a new way of thinking about what capital is and its future A new reading of and against Marx this volume argues for new forms of sensual utopia while initiating antagonism to the empire of capital itself As such it will appeal to social theorists social anthropologists and sociologists with interests in critical theory visual culture and aesthetics
