Phlamoudhi Vounari A Sanctuary Site In Cyprus:

Phlamoudhi Vounari Selma M. S. Al-Radi,1983 The Archaeology of Cyprus A. Bernard Knapp,2013-03-18 This book examines the archaeology of Cyprus from the first known human presence during the Late Epipalaeolithic through the end of the Bronze Age

Prehistoric and Protohistoric Cyprus A. Bernard Knapp,2008-02-21 A new island archaeology and island history of Bronze Age and early Iron Age Cyprus set in its Mediterranean context In this extensively illustrated study A Bernard Knapp addresses an under studied but dynamic new field of archaeological enquiry the social identity of prehistoric and protohistoric Mediterranean islanders

Faunal Extinction in an Island Society Alan H. Simmons,2006-01-22 The multidisciplinary research program at Akrotiri Aetokremnos is important in my opinion for three reasons two empirical and one conceptual Quite apart from the archaeology work at the site is a major contribution to island biogeography in that the Phanourios sample certainly the best from Cyprus and probably the best anywhere in the world has already provided and will continue to provide important ecological and behavioral data on these intriguing creatures Dwarfed island faunas are important to our understanding of the complex factors that shape natural selection in ecologically closed environments over the evolutionary long term At Aetokremnos we seem to have the end of a long sequence of hippo evolution on the island With comparative studies of other Cypriot hippo faunas we should be able to pin down the interval of initial colonization by what were presumably normal sized hippos and if the other sites can be dated document the dwarfing process in considerable detail Aetokremnos would still be a significant paleontological cality even in the absence of evidence of a human presence there While reading the text of the monograph a number of questions strictly related to the paleontology occurred to me One was how to model the colonization process There seems to be little question that the large mammals colonized the island by swimming to it because I gather Cyprus has not been connected to the mainland for roughly 5 6 million years

Religion and Social Transformations in Cyprus Giorgos Papantoniou,2012-10-16 This monograph focuses on religion to explore how the socio cultural infrastructure of Cyprus was affected by the transition from segmented administration by many Cypriot kings to the island wide government by a foreign Ptolemaic correspondent It approaches politico religious ideological responses and structures of symbolism through the study of sacred landscapes specific iconographic elements and archaeological contexts and architecture as well as through textual and epigraphic evidence A fresh approach to the transition is put forward connecting the island more emphatically with its longue duree Moving beyond the field of Cypriot studies this work also serves as a paradigm for the study of religion in relation to social power in other fields of classics and in particular for the enrolment of other areas of the Mediterranean into the political and cultural Hellenistic oikoumene

New Directions in Cypriot Archaeology Catherine Kearns,Sturt W. Manning,2019-04-15 New Directions in Cypriot Archaeology highlights current scholarship that employs a range of new techniques methods and theoretical approaches to questions related to the archaeology of the prehistoric and protohistoric periods on the island of Cyprus From revolutions in radiocarbon dating to

the compositional analysis of ceramic remains to the digital applications used to study landscape histories at broad scales to rethinking human environment climate interrelationships the last few decades of research on Cyprus invite inquiry into the implications of these novel archaeological methods for the field and its future directions This edited volume gathers together a new generation of scholars who offer a revealing exploration of these insights as well as challenges to big questions in Cypriot archaeology such as the rise of social complexity urban settlement histories and changes in culture and identity These enduring topics provide the foundation for investigating the benefits and challenges of twenty first century methods and conceptual frameworks Divided into three main sections related to critical chronological transitions from earliest prehistory to the development of autonomous kingdoms during the Iron Age each contribution exposes and engages with a different advance in studies of material culture absolute dating paleoenvironmental analysis and spatial studies using geographic information systems From rethinking the chronological transitions of the Early Bronze Age to exploring regional craft production regimes of the Middle and Late Bronze Ages to locating Iron Age cemeteries through archival topographic maps these exciting and pioneering authors provide innovative ways of thinking about Cypriot archaeology and its relationship to the wider discipline

Salamis of Cyprus Sabine Rogge, Christina Ioannou, Theodoros Mavrojannis, 2019 In May 2015 an international conference organised by the University of Cyprus and the Cypriot Department of Antiquities was held in Nicosia a conference which could well be called the largest ever symposium on ancient Salamis During the three day event some 60 scholars from many countries presented their current research on this important and spectacular archaeological site on the east coast of the island of Cyprus Two generations of scholars met in Nicosia during the conference an older one whose relationship with ancient Salamis can be characterized as very direct since many representatives of that generation had actively participated in the extremely productive excavations at that spot until these activities came to an abrupt end in the summer of 1974 due to the Turkish invasion and a younger generation which is of course lacking this very direct contact The conference successfully connected the older with the younger generation and thus contributed to maintaining and renewing the interest in ancient Salamis This richly illustrated book compiles most of the lectures presented during the

conference It might be regarded as a tribute to Salamis an outstanding ancient city which existed for more than one and a half millennia eventually under the name of Constantia *Ancient Building in Cyprus* George R. H. Wright, 1992 The wealth of excavation in Cyprus conducted across a period of nearly a century and a half has revealed much evidence of ancient building of all functional categories This picture extends over a vast range of time ca 10 000 years since Cyprus is probably the place where the earliest substantial building known the Neolithic round house style is better presented than anywhere else in the world It is the aim of this book to set forth and document the building tradition which hitherto has received no detailed exposition The book will fill several gaps in the library shelves at one and the same time architectural history that presents all the archaeological evidence **Sacred Landscapes in Antiquity** Ralph Haussler, Gian Franco

Chiai, 2020-07-31 From generation to generation people experience their landscapes differently Humans depend on their natural environment it shapes their behavior while it is often felt that deities responsible for both natural benefits and natural calamities such as droughts famines floods and landslides need to be appeased We presume that in many societies lakes rivers rocks mountains caves and groves were considered sacred Individual sites and entire landscapes are often associated with divine actions mythical heroes and etiological myths Throughout human history people have also felt the need to monumentalize their sacred landscape But this is where the similarities end as different societies had very different understandings believes and practices The aim of this new thematic appraisal is to scrutinize carefully our evidence and rethink our methodologies in a multi disciplinary approach More than 30 papers investigate diverse sacred landscapes from the Iberian peninsula and Britain in the west to China in the east They discuss how to interpret the intricate web of ciphers and symbols in the landscape and how people might have experienced it We see the role of performance ritual orality textuality and memory in people s sacred landscapes A diachronic view allows us to study how landscapes were rewritten adapted and redefined in the course of time to suit new cultural political and religious understandings not to mention the impact of urbanism on people s understandings A key question is how was the landscape manipulated transformed and monumentalized especially the colossal investments in monumental architecture we see in certain socio historic contexts or the creation of an alternative humanmade seemingly non natural landscape with perfectly astronomically aligned buildings that define a cosmological order *Sacred Landscapes* therefore aims to analyze the complex links between landscape religiosity and society developing a dialectic framework that explores sacred landscapes across the ancient world in a dynamic holistic contextual and historical perspective **Barrington Atlas of the Greek and Roman World** Richard J.A.

Talbert, 2000-10-08 In 102 full color maps spread over 175 pages the Barrington Atlas re creates the entire world of the Greeks and Romans from the British Isles to the Indian subcontinent and deep into North Africa It spans the territory of more than 75 modern countries Its large format 13 1 4 x 18 in or 33 7 x 46 4 cm has been custom designed by the leading cartographic supplier MapQuest com Inc and is unrivaled for range clarity and detail Over 70 experts aided by an equal

number of consultants have worked from satellite generated aeronautical charts to return the modern landscape to its ancient appearance and to mark ancient names and features in accordance with the most up to date historical scholarship and archaeological discoveries Chronologically the Barrington Atlas spans archaic Greece to the Late Roman Empire and no more than two standard scales 1 500 000 and 1 1 000 000 are used to represent most regions Since the 1870s all attempts to map the classical world comprehensively have failed The Barrington Atlas has finally achieved that elusive and challenging goal It began in 1988 at the University of North Carolina Chapel Hill under the direction of the distinguished ancient historian Richard Talbert and has been developed with approximately 4 5 million in funding support The resulting Barrington Atlas is a reference work of permanent value It has an exceptionally broad appeal to everyone worldwide with an interest in the ancient Greeks and Romans the lands they penetrated and the peoples and cultures they encountered in Europe North Africa and Western Asia Scholars and libraries should find it essential It is also for students travelers lovers of fine cartography and anyone eager to retrace Alexander s eastward marches cross the Alps with Hannibal traverse the Eastern Mediterranean with St Paul or ponder the roads aqueducts and defense works of the Roman Empire For the new millennium the Barrington Atlas brings the ancient past back to life in an unforgettably vivid and inspiring way Map by Map Directory A Map by Map Directory to the Barrington Atlas is available online http://assets.press.princeton.edu/B_ATLAS/B_ATLAS.PDF and in a separate two volume print edition of close to 1 500 pages The Directory is designed to provide information about every place or feature in the Barrington Atlas The section for each map comprises a concise text drawing attention to special difficulties in mapping a region such as extensive landscape change since antiquity or uneven modern exploration a listing of every name and feature on the map with basic data about the period of occupation the modern equivalents of ancient placenames the modern country within which they are located and brief references to relevant ancient testimony or modern studies a bibliography of works cited The Map by Map Directory is an essential accompaniment to the Barrington Atlas As a uniquely rich comprehensive up to date distillation of evidence and scholarship it has no match elsewhere and opens the way to an immense variety of further research initiatives *Phlamoudhi Vounari* ,1981

The Oxford Handbook of the Archaeology of the Levant Margreet L. Steiner,Ann E. Killebrew,2014-01-16 This Handbook aims to serve as a research guide to the archaeology of the Levant an area situated at the crossroads of the ancient world that linked the eastern Mediterranean Anatolia Mesopotamia and Egypt The Levant as used here is a historical geographical term referring to a large area which today comprises the modern states of Israel Jordan Lebanon western Syria and Cyprus as well as the West Bank Gaza Strip and the Sinai Peninsula Unique in its treatment of the entire region it offers a comprehensive overview and analysis of the current state of the archaeology of the Levant within its larger cultural historical and socio economic contexts The Handbook also attempts to bridge the modern scholarly and political divide between archaeologists working in this highly contested region Written by leading international scholars in the field it focuses chronologically on the Neolithic

through Persian periods a time span during which the Levant was often in close contact with the imperial powers of Egypt Anatolia Assyria Babylon and Persia This volume will serve as an invaluable reference work for those interested in a contextualised archaeological account of this region beginning with the agricultural revolution until the conquest of Alexander the Great that marked the end of the Persian period **The Development of Pre-State Communities in the Ancient Near East** Diane Bolger, Louise C. Maguire, 2010-04-30 This book explores the dynamics of small scale societies in the ancient Near East by examining the ways in which particular communities functioned and interacted and by moving beyond the broad neo evolutionary models of social change which have characterised many earlier approaches By focusing on issues of diversity scale and context it considers the ways in which economy crafts technology and ritual were organised the roles played by mortuary practices and households in the structure and development of ancient societies and the importance of agency identity ethnicity gender community and cultural interaction for the rise of socio economic complexity The contributors to this volume are well known archaeologists in the field of Near Eastern studies all are currently engaged in fieldwork or research in Cyprus the Levant or Turkey The variety and depth of the research they present here reflect the richness of the archaeological record in the cradle of civilisation and convey the vibrancy of current interpretive approaches within the field of Near Eastern prehistory today **The Wide Lens in Archaeology** Allan Gilbert, Justin Lev-Tov, Paula Wapnish, 2017-06-01 This book honors the memory of Brian Hesse a scholar of Near Eastern archaeology a writer of alliterative and punned publication titles and an accomplished amateur photographer Hesse specialized in zooarchaeology but he influenced a wider range of excavators and ancient historians with his broad interpretive reach He spent much of his career analyzing faunal materials from different countries in the Middle East including Iran Yemen and Israel and his publications covered themes particular to animal bone studies such as domestication ancient market economics as well as broader themes such as determining ethnicity in archaeology The essays in this volume reflect the breadth of his interests Most chapters share an Old World geographic setting focusing either on Europe or the Middle East The topics are diverse with the majority discussing animal bones as was Hesse s specialization but some take a nonfaunal perspective related to the problems with which Hesse grappled The volume is also broad in temporal scope ranging from Neolithic Iran to early Medieval England and it addresses theoretical matters as well as methodological innovations including taphonomy and the history of computers in zooarchaeology Several of the essays are direct revisits to inspirations from or extensions of Hesse s own research All the contributions reflect his intense interest in social questions about antiquity the theme of social archaeology informed much of Brian Hesse s thinking and it is why his work made such an impact on those working outside his own disciplinary research **Panayia Ematousa: A rural site in south-eastern Cyprus** Lone Wriedt Sørensen, Kristina Winther Jacobsen, 2006 **Ritual Failure** Vasiliki G. Koutrafour, Jeff Sanders, 2013-12-31 Ritual Failure is a new concept in archaeology adopted from the discipline of anthropology Resilient religious systems disappearing strict

believers and faithful practitioners not performing their rites entire societies changing their customs how does a religious ritual system transform change or disappear leaving only traces of its past glory Do societies change and then their ritual Or do customs change first in turn provoking wider cultural shifts in society Archaeology possesses the tools and methodologies to explore these questions over the long term from the emergence of a system to its peak and then its decay and disappearance and in relation to wider social and chronological developments The collected papers in this book introduce the concept of ritual failure to archaeology The analysis explores ways in which ritual may have been instrumental in sustaining cultural continuity during demanding social conditions or how its functionality might have failed resulting in discontinuity change or collapse The collected papers draw attention to those turbulent social times of change for which ritual practices are a sensitive indicator within the archaeological record The book reviews archaeological evidence and theoretical approaches and suggests models which could explain socio cultural change through ritual failure The concept of ritual failure is also often used to better understand other themes such as identity and wider social economic and political transformations shedding light on the social conditions that forced or introduced change This book will engage those interested in ritual theory and practices but will also appeal to those interested in exploring new avenues to understanding cultural change From transformations in the use of ritual objects to the risks inherent in practicing ritual from ritual continuity in customs to sudden and profound change from the Neolithic Near East to Roman Europe and Iron Age Africa this book explores what happens when ritual fails *Central Places and Un-Central Landscapes* Giorgos Papantoniou, Athanasios Vionis, 2019-04-01

This volume examines the applicability of central place theory in contemporary archaeological practice and thought in light of ongoing developments in landscape archaeology by bringing together central places and un central landscapes and by grasping diachronically the complex relation between town and country as shaped by political economies and the availability of natural resources Moving away from model bounded approaches central place theory is used more flexibly to include all the places that may have functioned as loci of economic or ideological centrality even in a local context in the past Fourteen chapters examine centrality and un central landscapes from Prehistory to the late Middle Ages in different geographical contexts from Cyprus and the Levant through Greece and the Balkans to Italy France and Germany **Report of the**

Ancient Building in Cyprus G.R.H. Wright, 2022-11-07 The wealth of excavation in Cyprus conducted across a period of nearly a century and a half has revealed much evidence of ancient building of all functional categories Whereas the earlier excavation concerned mainly funerary and religious contexts more recent work has endeavoured to clarify the whole range of building in Cyprus This picture extends over a vast range of time ca 10 000 years since Cyprus is probably the place where the earliest substantial building known the Neolithic round house style is better presented than anywhere else in the world Certainly it was immeasurably longer lived in Cyprus than in any other region of the ancient world This longevity of tradition

became a proverbial aspect of the Cypriote character It is the aim of this book to set forth and document this building tradition which hitherto has received no detailed exposition After preliminary geographical and historical introductions the ancient building of Cyprus has been surveyed and analysed from the following view points its historical development its design its construction and its foreign connections Because of the extensive and detailed coverage every effort has been made to facilitate the use of the book equally as a treatise and as a work of instant reference e g by way of introductory pr cis list of general references running titles to pages and marginal rubrics The book is also virtually a double treatment of the subject since a separate volume contains specially drawn illustrations arranged with captions on the facing pages which themselves constitute an incisive coverage of the subject matter The book will fill several gaps in the library shelves at one and the same time architectural history that presents all the archaeological evidence The print edition is available as a set of two volumes 9789004095472
