Phonological Rules And Dialect Variation A Study Of The Phonology Of Lumasaaba:

Phonological Rules and Dialect Variation Gillian Brown, 1976-04-08 Dr Brown examines the functions of different types of rules in the phonological component of a generative grammar with examples especially from Lumasaaba a Bantu language of eastern Uganda

Dialect and Language Variation, 2014-06-28 This anthology emphasizes dialects of American English and language variation in America The editors present original essays by today's leading investigators including articles by some of Europe's best dialectologists obtained expressly for this work Important topics featured in *Dialect and Language Variation* include Dialect theories linguistic geography structural and generative dialectology and language variation The nature of social dialects and language variation with attention to women's speech Overview of regional dialects and area studies The nature and study of the relationship between ethnicity and dialects including Black Italian Irish Chicano and Jewish ethnic groups The application of dialect studies to education Of special interest to dialectologists sociolinguists and English language educators and specialists this work provides original insight into a general background and history of dialect theory an overview of regional geography and area studies the principles of social dialects and language variation from several perspectives an exploration of the relationship between ethnicity and dialects o explanations of the relationship between historical and language change a section on how dialects and language variation can contribute to effective language instruction

Phonetic Causes of Sound Change Daniel Recasens i Vives, 2020 This book provides an integrated account of the phonetic causes of the diachronic processes of palatalization assibilation and affrication It draws on a variety of historical dialectological and phonetic data from a wide range of language families including Romance Bantu Slavic and Germanic

Generative Phonology of Tamil T. Vasanthakumari, 1989

Lenition and Contrast Naomi Gurevich, 2013-05-13 This book analyzes 153 languages from a large variety of families to establish a previously unexplored relationship between phonetically conditioned sound changes such as lenitions and functional meaning maintenance related considerations Carefully collecting numerous inventories of consonants this collection is likely to become an important resource for future linguistics research By distinguishing between phonetic and phonological neutralization and showing that the first does not necessarily result in the second Naomi Gurevich uncovers previously unexplored and often surprising trends in the relationship between phonetics and phonology

Sonic Signatures Geoff Lindsey, Andrew Nevins, 2017-11-30 *Sonic Signatures* is devoted to the representation of sound patterns and sound structures across a diverse range of typologically distinct languages with the overall aim of understanding the nature of linguistic data structures from a principled balance between representational economy and the interfaces of phonology with other domains including acoustic and visual The volume embraces data spanning from Nivkh vowel harmony to Maxakal sign language and from the representation of consonant clusters in adult Laurentian French and to those found in child Greek and child Brazilian Portuguese The volume strives towards concrete commitments to the theoretical understanding of empirical territory both

familiar but with a novel take English stress and novel but with immediate relevance Hungarian suffix allomorphy With authors contributing from five continents the book offers a range of perspectives on the representation of sound patterns while nonetheless retaining a tight focus on the core questions of which characteristics and signatures are specifically encoded for these patterns in the phonological component of the language faculty **Language Change** Joan Bybee, 2015-05-28 This new introduction explores all aspects of language change with an emphasis on the role of cognition and language use *Consonant Strength* Lisa M. Lavoie, 2001-01-29 This book is a detailed examination of the phonetics and phonology of consonant strength drawing data from parallel acoustic and articulatory studies of English and Spanish as well as a cross linguistic survey of lenition and fortition **Principles of Generative Phonology** John Tillotson Jensen, 2004-01-01 Principles of Generative Phonology is a basic thorough introduction to phonological theory and practice It aims to provide a firm foundation in the theory of distinctive features phonological rules and rule ordering which is essential to be able to appreciate recent developments and discussions in phonological theory Chapter 1 is a review of phonetics chapter 2 discusses contrast and distribution with emphasis on rules as the mechanism for describing distributions chapter 3 introduces distinctive features natural classes and redundancy chapter 4 builds on the concept of rules and shows how these can account for alternations chapter 5 demonstrates the use of rule ordering chapter 6 discusses abstractness and underlying representations chapter 7 discusses post SPE developments serving as a prelude to more advanced texts Each chapter includes exercises to guide the student in the application of the principles introduced in that chapter and to encourage thinking about theoretical issues The text has been classroom tested **Lenition and Fortition** Joaquim Brandão de Carvalho, Tobias Scheer, Philippe Ségéral, 2008-12-18 There are books on tone coronals the internal structure of segments vowel harmony and a couple of other topics in phonology This book aims to fill the gap for Lenition and Fortition which is one of the first phenomena that was addressed by phonologists in the 19th century and ever since contributed to phonological thinking It is certainly one of the core phenomena that is found in the phonology of natural language together with assimilations the other important family of phenomena Lenition and Fortition constitute the heart of what phonology can do to sound The book aims to provide an overall treatment of the question in its many aspects historical typological synchronic diachronic empirical and theoretical Various current approaches to phonology are represented The book is structured into three parts 1 properties and behaviour of Lenition Fortition 2 lenition patterns in particular languages and language families 3 how Lenition Fortition work Part 1 describes the properties of lenition and fortition what counts as such What kind of behaviour is observed Which factors bear on it positional stress related Which role has it played in phonology since and even before the 19th century The everything you always wanted to know about lenition and fortition philosophy that guides the conception of the book supposes a descriptive generalisation oriented style of writing that relies on a kind of phonological lingua franca rather than on theory laden vocabulary Also no prior knowledge other than about general

phonological categories should be required when reading through Part 1 The goal is to provide a broad picture of what lenition is how it behaves which factors it is conditioned by and what generalisations it obeys This record may then be used as a yardstick for competing theories Part 2 presents a number of case studies that show how Lenition Fortition behave in a number of languages that include systems which are notoriously emblematic for Lenition Fortition Celtic Western Romance Germanic and Finnish Finally Part 3 is concerned with the analysis of the patterns that have been described in Parts 1 and 2 Given their analytic orientation Part 3 chapters are theory specific They look at the same empirical record or at a subset thereof and try to explain what they see Even though Part 3 chapters are couched in a specific theoretical environment that most of the time supposes prior conceptual knowledge authors have been asked to assure theoretical interoperability as much as they could

The Bantu Languages Derek Nurse, Gérard Philippson, 2006-03-21 Gerard Philippson is Professor of Bantu Languages at the Institut National des Langues et Civilisations Orientales and is a member of the Dynamique de Langage research team of the Centre National de la Recherche Scientifique Lyon II University He has mainly worked on comparative Bantu tonology Other areas of interest include Afro Asiatic general phonology linguistic classification and its correlation with population genetics

Towards a Critical Sociolinguistics Rajendra Singh, 1996-05-24 This collection of twelve essays some of which have been written specifically for this volume by well known European and North American sociolinguists reflects an increasing recognition within the field that sociological and theoretical innocence can no longer be underwritten by it and offers a multi pronged and multi methodological way to move towards a critical reflexive and theoretically responsible socio linguistics It explores with courage and sensitivity some very important areas in the enormous space between Bloomfieldian idiolect and Chomskyan UG in order to situate the human linguistic enterprise and offers valuable insights into human linguisticity and sociality These explorations expose the limits of correlationism determinism and positivistic reificationism and offer new ways of doing sociolinguistics Intended for both practicing and future sociolinguists it is an ideal text book for the times particularly for graduate and advanced undergraduate students

Descriptive and Theoretical Approaches to African Linguistics Galen Sibanda, Deogratias Stan Ngonyani, Jonathan Choti, Deo Ngonyani, Ann Biersteker, 2022 Descriptive and Theoretical Approaches to African Linguistics contains a selection of revised and peer reviewed papers from the 49th Annual Conference on African Linguistics held at Michigan State University in 2018 The contributions from both students and more senior scholars based in North America Africa and other parts of the world provide a glimpse of the breadth and quality of current research in African linguistics from both descriptive and theoretical perspectives Fields of interest range from phonetics phonology morphology syntax semantics to sociolinguistics historical linguistics discourse analysis language documentation computational linguistics and beyond The articles reflect both the typological and genetic diversity of languages in Africa and the wide range of research areas covered by presenters at ACAL conferences

Turbulent Sounds Susanne Fuchs, Martine Toda, Marzena Żygis, 2010 This series consists of collected volumes and monographs about specific issues dealing with interfaces among the subcomponents of linguistic structure phonology morphology phonology syntax syntax semantics syntax morphology and syntax lexicon Recent linguistic research has recognized that the subcomponents of grammar interact in non trivial ways What is currently under debate is the actual range of such interactions and their most appropriate representation in grammar and this is precisely the focus of this series Specifically it provides a general overview of various topics by examining them through the interaction of grammatical components The books function as a state of the art report of research The Structure and Status of Pidgins and Creoles Arthur Kean Spears, Donald Winford, 1997-01-01 Destined to become a landmark work this book is devoted principally to a reassessment of the content categories boundaries and basic assumptions of pidgin and creole studies It includes revised and elaborated papers from meetings of the Society for Pidgin and Creole Linguistics in addition to commissioned papers from leading scholars in the field As a group the papers undertake this reassessment through a reevaluation of pidgin creole terminology and contact language typology Section One a questioning of process and evolution in pidginization creolization and other language contact phenomena Section Two a reinterpretation of the sources and genesis of grammatical aspects of Saramaccan and Atlantic creoles in general Section Three a reconsideration of the status of languages defying received definitions of pidgins and creoles Section Four and analyses of aspects of grammar that shed light on the issue of what a possible creole grammar is Section Five An Effort Based Approach to Consonant Lenition Robert Kirchner, 2013-12-16 The first serious typological survey of the lenition process in modern phonological literature A View of Language Pieter A. M. Seuren, 2001 This book collects the best and most influential essays of one of the world's most original linguistic scholars and thinkers They show Pieter Seuren's remarkable erudition from classical antiquity to current theory his descriptive and theoretical sophistication and his beautiful clarity of style They provide many examples of the cogency of his argument and his willingness to speak out trenchantly against accepted wisdom In the extensive introduction the author describes the evolution of his theoretical position and its development in relation to Chomskyan syntactic theory and model theoretic semantics He argues here and throughout the book that grammar and semantics should be studied as branches of cognitive

science not as mere formalisms He propounds develops and applies a theory of semantic syntax in which a grammar is seen as a mediating device between propositionally structured thoughts and corresponding surface structures He rejects conventional notions of autonomous grammar as unsustainable and in a realist theory of language unnecessary He demonstrates that his semantic theory achieves empirically adequate and formally precise explanatory generalizations developing a theory of discourse semantics as a means of providing elegant accounts of topic comment structure The twenty two essays are divided into four parts dealing broadly with general theory syntax semantics and the linguistics of creole languages Many of the author s classic papers will be found here including those on autonomous versus semantic syntax predicate raising and datives clitic pronoun clusters donkey anaphora every man who owns a donkey beats it serial verb constructions and many more Provocative and thoughtful accessible and entertaining they add up to a book of real enduring value

Hearing, Speech, and Communication Disorders Information Center for Hearing Speech and Disorders,2012-12-06 Information analysis centers were developed to help the scientist and practitioner cope with the ever increasing mass of published and unpublished information in a specific field Their establishment resulted from a further extension of those pressures that had brought about the formation of the specialized primary journal and the abstracting services at the turn of the century The information analysis center concept was greatly advanced by the 1963 report of the President s Science Advisory Committee Panel on Science Information This report stated scientific interpreters who can collect relevant data review a field and distill information in a manner that goes to the heart of a technical situation are more help to the overburdened specialist than is a mere pile of relevant documents Such specialized information centers are operated in closest possible contact with working scientists in the field These centers not only furnish information about ongoing research and disseminate and retrieve information but also create new information and develop new methods of information analysis synthesis and dissemination The continually expanding biomedical literature produced by scientists from the world s laboratories research centers and medical centers led the National Institute of Neurological Diseases and Stroke in 1964 to initiate a National Neurological Information Network of specialized centers for neurological information The Centers are designed to bring under control and to promote ready access to important segments of the literature

In Hot Pursuit of Language in Prehistory John D. Bengtson,2008 Compiled in honor and celebration of veteran anthropologist Harold C Fleming this book contains 23 articles by anthropologists in the general sense from the four main disciplines of prehistory archaeology biogenetics paleoanthropology and genetic historical linguistics Because of Professor Fleming s major focus on language he founded the Association for the Study of Language in Prehistory and the journal Mother Tongue the content of the book is heavily tilted toward the study of human language its origins historical development and taxonomy Because of Fleming s extensive field experience in Africa some of the articles deal with African topics This volume is intended to exemplify the principle in the words of Fleming himself that each of the four disciplines is enriched when it combines with

any one of the other four The authors are representative of the cutting edge of their respective fields and this book is unusual in including contributions from a wide range of anthropological fields rather than concentrating in any one of them
