Classical Spies Susan Heuck Allen, 2011-10-05 Classical Spies will be a lasting contribution to the discipline and will stimulate further research Susan Heuck Allen presents to a wide readership a topic of interest that is important and has been neglected William M Calder III University of Illinois Urbana Champaign Classical Spies is the first insiders account of the operations of the American intelligence service in World War II Greece Initiated by archaeologists in Greece and the eastern Mediterranean the network drew on scholars personal contacts and knowledge of languages and terrain While modern readers might think Indiana Jones is just a fantasy character Classical Spies discloses events where even Indy would feel at home burying Athenian dig records in an Egyptian tomb activating prep school connections to establish spies code named Vulture and Chickadee and organizing parachute drops Susan Heuck Allen reveals remarkable details about a remarkable group of individuals Often mistaken for mild mannered professors and scholars such archaeologists as University of Pennsylvania s Rodney Young Cincinnati s Jack Caskey and Carl Blegen Yale s Jerry Sperling and Dorothy Cox and Bryn Mawr s Virginia Grace proved their mettle as effective spies in an intriguing game of cat and mouse with their Nazi counterparts Relying on interviews with individuals sharing their stories for the first time previously unpublished secret documents private diaries and letters and personal photographs Classical Spies offers an exciting and personal perspective on the history of World War II

Educating across Cultures William McGrew, 2015-04-16 This compelling book chronicles a remarkable American educational undertaking that spanned two continents and survived three wars William McGrew recounts the challenges faced by Anatolia College s leaders and the solutions they found to achieve their goals within the often turbulent social religious and political environments of their host countries McGrew begins with Anatolia s nineteenth century Boston based founders who initially hoped to bring Calvinist Christianity to the diverse peoples of the Ottoman Empire and gradually shifted their emphasis to educational goals While seeking to enrich the lives of the inhabitants of Asia Minor and beyond from the College s campus south of the Black Sea Protestant educators also encountered rampant ethnic strife and the loss of many students and staff Most memorable was the pursuit on horseback across Turkey s plains by two

American women to save some fifty girls otherwise destined to perish at the hands of Turks Renewed violence following World War I forced Anatolia to relocate from Turkey to Thessaloniki the major city of northern Greece The book follows Anatolia over the subsequent decades as it embraced a society experiencing an often violent trajectory including the Nazi occupation followed by civil war Nonetheless the College succeeded in developing a spacious campus and in drawing able students from all parts of Greece through generous scholarships Close collaboration between Greek and American educators in merging the Hellenic cultural legacy with the strongest features of American instruction enabled Anatolia to become today one of Greece's most outstanding institutions at both the school and college levels Its rich history provides a unique window on the American missionary movement the Armenian genocides the Greek Turkish conflict two world wars and ongoing achievements in international education through the prism of the survival and growth of an American college caught in near perpetual upheaval **Small Press Record of Books in Print**, 1982 *Bulletin* Modern Greek Studies Association, 1996

Camera Graeca: Photographs, Narratives, Materialities Philip Carabott, Yannis Hamilakis, Eleni Papargyriou, 2016-03-09 While written sources on the history of Greece have been studied extensively no systematic attempt has been made to examine photography as an important cultural and material process This is surprising given that Modern Greece and photography are almost peers both are cultural products of the 1830s and both actively converse with modernity *Camera Graeca* Photographs Narratives Materialities fills this lacuna It is the first inter disciplinary volume to examine critically and in a theorised manner the entanglement of Greece with photography The book argues that photographs and the photographic process as a whole have been instrumental in the reproduction of national imagination in the consolidation of the nation building process and in the generation and dissemination of state propaganda At the same time it is argued that the photographic field constitutes a site of memory and counter memory where various social actors intervene actively and stake their discursive material and practical claims As such the volume will be of relevance to scholars and photographers worldwide The book is divided into four tightly integrated parts The first *Imagining Greece* shows that the consolidation of Greek national identity constituted a material cum representational process the projection of an imagery although some photographic production sits uneasily within the national canon and may even undermine it The second part *Photographic narratives alternative histories* demonstrates the narrative function of photographs in diary keeping and in photobooks It also examines the constitution of spectatorship through the combination of text and image and the role of photography as a process of materializing counter hegemonic discourses and practices The third part *Photographic matter realities* foregrounds the role of photography in materializing state propaganda national memory and war The final part *Photographic ethnographies* *Publishers Directory*, 1990 *American Book Publishing Record*, 1979 *The American Bibliography of Slavic and East European Studies*, 1982 **Audiovisual Media and Identity Issues in Southeastern Europe** Eckehard Pistrick, Nicola Scaldaferri, Gretel Schwörer, 2011-05-25 The edited volume *Audiovisual Media and Identity Issues in*

Southeastern Europe is an attempt to meet the challenges of text based scholarship to break medial one dimensionality dictated by textuality and to shift the focus to the aural and visual dimensions of identity in a part of Europe heavily marked by the dynamics of political cultural and social change particularly during the last decades The objective of this endeavour is to examine identity in Southeastern Europe by means of its communication media specifically that of the photographic image and the sound recording How are identities communicated How are they performed and made physically perceptible Brought to a point the primary issue is one of how people perceive themselves and their environment on the basis of communication media seen through a lens of different disciplines social anthropology ethnomusicology media studies sociology and history and methodologies from the point of view of scholars from Southeastern Europe and their Western European colleagues The book pursues a distinct comparative and historical perspective examining the media representations from socialist and pre socialist periods in relation to the role media play in the postsocialist discourse Another focus is laid on local media representations and their impact on local self images This distinct historical and local approach allows new insights into how identities are constructed performed and negotiated in the light of media resulting in different forms of interpreting re appropriating and re evaluating the past and traditions This opens up questions on the role of media in relation to cultural policies and their potential to preserve or to transform local cultural heritage The book is also an important contribution to the field of postsocialist studies in anthropology It sheds a distinct cultural view on postsocialist transformation processes Through a wide range of examples and first hand results of basic field research from Greece Bulgaria Romania Serbia Albania and Slovenia this volume provides an opportunity for a comparative reconsideration of similar phenomena across national borders It may serve also as a methodological reference work for scholars who are interested in the different ways of how to develop and practice media reflexivity in their own field research
