Gross,2019-06-04 During the late 1980s the near worship of artistic genius produced auction sales of works by Vincent Van Gogh and Pablo Picasso for tens of millions of dollars over 15 million for a painting by Jasper Johns and record prices for works by many other deceased and even living masters At the same time it was no longer controversial in academic and intellectual circles to maintain that art works are the products of what Howard Becker has termed collective activity carried out within loosely defined art worlds Works of art from this point of view are not the products of individual makers artists who possess a rare and special gift They are rather joint products of all the people who cooperate via an art world s characteristic conventions to bring works like that into existence Artists are some sub group of the world s participants who by common agreement possess a special gift therefore make a unique and indispensable contribution to the work and thereby make it art 1982 35 The concept of the art world with its central focus on the collective social and conventional nature of artistic production distribution and appreciation confronts and potentially undermines the romantic ideology of art and artists still dominant in Western societies **The Grove Encyclopedia of American Art** Joan M. Marter,2011 Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries

Senf,2020-02-08 An unprecedented and eye opening examination of the early career of one of America s most celebrated photographers One of the most influential photographers of his generation Ansel Adams 1902 1984 is famous for his dramatic photographs of the American West Although many of Adams s images are now iconic his early work has remained largely unknown In this first monograph dedicated to the beginnings of Adams s career Rebecca A Senf argues that these early photographs are crucial to understanding Adams s

artistic development and offer new insights into many aspects of the artist's mature oeuvre. Drawing on copious archival research, Senf traces the first three decades of Adams's photographic practice beginning with an amateur album made during his childhood and culminating with his Guggenheim-supported National Parks photography of the 1940s. Highlighting the artist's persistence in forging a career path and his remarkable ability to learn from experience as he sharpened his image-making skills, this beautifully illustrated volume also looks at the significance of the artist's environmentalism, including his involvement with the Sierra Club.
