Photodynamic Therapy and Biomedical Lasers Pasquale Spinelli, Marco Dal Fante, Renato Marchesini, 1992

Nowadays lasers are widely used in many areas of medicine from diagnostic to therapeutic purposes from basic to clinical research. The aim of the above mentioned Conference was twofold. Firstly to provide a forum for an in depth examination of the fields of laser applications where thermal and non thermal effects in the tissue light interaction are exploited. Secondly to improve communications between the current developments of basic research and users of therapeutical techniques. Approximately 460 participants representing 30 countries attended the Conference. The plenary lectures and a large fraction of the contributed papers presented at the above mentioned conference are collected in this publication. Invited lectures were given from the most outstanding specialists in the different fields of experimental and clinical applications. It is hoped that this collection of manuscripts represents material which can be used widely for consultation and for the information of anyone involved in medical applications of lasers and photodynamic therapy.

Interventions in Pulmonary Medicine

Jose Pablo Díaz-Jimenez, Alicia N. Rodriguez, 2013-01-29. *Interventions in Pulmonary Medicine* is an important new volume that addresses all areas of interventional pulmonology: a minimally invasive endoscopic way to diagnose and treat lung disorders. This volume contains dedicated chapters that outline the many issues related to lung cancer both in early and advanced stages from diagnosis to personalized treatment. It also covers bronchoscopic therapeutic options to benign conditions that are highly prevalent such as COPD and asthma. Techniques described in this volume are laser therapy, argon plasma coagulation therapy, cryotherapy, brachytherapy, placement of intrapleural drainage systems, endoscopic treatment of emphysema, stents in the airway and thermoplasty for bronchial asthma. Diagnostic procedures that are covered are medical thoracoscopy, flexible and rigid bronchoscopy, endobronchial ultrasound, electromagnetic navigation and trends in personalized treatment for lung cancer and other benign lung conditions. Chapters are written by experts and the developers of the techniques that are currently considered gold standard. Evidence based reviews are presented for all topics and indications and contraindications are discussed. *Interventions in Pulmonary Medicine* is a must have for pulmonologists, endoscopists, pulmonary oncologists, ENT physicians, thoracic surgeons, anesthesiologists and intensive care specialists and their teams.

Interventional Bronchoscopy Christoph T. Bolliger, Praveen N. Mathur, 2000. This book covers all aspects of diagnostic and therapeutic bronchoscopy which go beyond the techniques of inspection, simple lavage and biopsies of the tracheobronchial tree. In a first section historical aspects as well as the modern use of both rigid and flexible instruments, the set up of a bronchoscopy unit, anaesthetic techniques and functional evaluation for patients undergoing interventional bronchoscopy are discussed. A diagnostic section on transbronchial needle aspiration and bronchoscopic ultrasound is followed by extensive coverage of all existing therapeutic techniques: foreign body removal, laser resection, electrocautery.

argon plasma coagulation cryotherapy brachytherapy photodynamic therapy stenting and a chapter on multi modality treatment of advanced pulmonary malignancies A fourth section deals with percutaneous image guided procedures percutaneous dilatational tracheostomy and transtracheal oxygen therapy The last section provides an in depth look at emerging bronchoscopic technology such as autofluorescence virtual bronchoscopy and gene therapy Written by the world's leading authorities in the field and beautifully illustrated this book presents the state of the art of interventional bronchoscopy It is recommended reading for pulmonologists thoracic or ENT surgeons oncologists and physicians who take an interest in bronchoscopy **The Cumulative Book Index** ,1994 A world list of books in the English language
