**Through Astronaut Eyes** Jennifer K. Levasseur, 2020-06-15 Featuring over seventy images from the heroic age of space exploration Through Astronaut Eyes presents the story of how human daring along with technological ingenuity allowed people to see the Earth and stars as they never had before Photographs from the Mercury Gemini and Apollo programs tell powerful and compelling stories that continue to have cultural resonance to this day not just for what they revealed about the spaceflight experience but also as products of a larger visual rhetoric of exploration The photographs tell us as much about space and the astronauts who took them as their reception within an American culture undergoing radical change throughout the turbulent 1960s This book explores the origins and impact of astronaut still photography from 1962 to 1972 the period when human spaceflight first captured the imagination of people around the world Photographs taken during those three historic programs are much admired and reprinted but rarely seriously studied This book suggests astronaut photography is particularly relevant to American culture based on how easily the images were shared through reproduction and circulation in a very visually oriented society Space photography's impact at the crossroads of cultural studies the history of exploration and technology and public memory illuminates its continuing importance to American identity

**The Heroic Age of Antarctic Exploration on Film and Television, Volume 1** John Atkins, 2025-09-17 This book examines in detail for the first time the screen legacy of the great Irish born Antarctic explorer Sir Ernest Shackleton 1874-1922. It encompasses the pioneering expedition films he made from 1909 to 1922 and the documentary and drama productions he has inspired since then. The book provides a unique and original approach to understanding Shackleton, including the first comprehensive account of the original Antarctic documentary film now lost that recorded the achievements of the 1908-09 Nimrod expedition. Drawing on much original source material, films, diaries, contemporary newspapers and journals that has not been unearthed by previous authors, this volume presents a fresh perspective and includes a filmography with more than 100 entries spanning 1908 to 2024.
